

A COMPLETE DATA SECURITY SOLUTION

Monitoring. Evaluation. Encryption

Offering small and medium size companies an affordable solution to achieve maximum data security with just a click of a button

ACTIFILE: A COMPLETE DATA SECURITY SOLUTION

Actifile is a simple, flexible and intuitive security solution. Our proprietary software protects your company against all known threats, and puts you firmly in control of your data, working automatically 24/7 to identify and safeguard your sensitive data.

Actifile delivers multi-level protection. CEOs and IT managers have real time control over all sensitive data. You can identify and solve every problem with a single click of your mouse!

Actifile will keep your data safe, no matter what the threat!

Actifile is democratizing data security and giving every company and organization the tools to locate and secure sensitive data.

Our mission is to provide a rock solid foundation of cyber security that allows your business or service to grow and achieve its fullest potential.

We're revolutionizing cyber security with the first truly autonomous data security platform!

WHY YOU NEED ACTIFILE!

Companies and service providers of all sizes are uniquely vulnerable to data leakage and ransomware attacks, and face devastating financial consequences when sensitive data is compromised.

Firewalls and antiviruses are just a first line of defense. If you depend on a firewall, you're betting the entire future of your company on the strength of a single shield.

- The average initial cost of a data breach is \$4 million.
- 60% of companies that suffer data leaks or ransomware attacks go bankrupt and close their doors within 6 months.

Don't wait and let this happen to your company!

Get Actifile Now!

Locate sensitive data and map risks in real time

Calculate financial penalties and liabilities for data leaks and ransomware attacks

Remediate data risks and apply automated encryption

Contact us today for a FREE data risk assessment!

A free Actifile audit will scan all your systems, locate vulnerable data, and apprise you of potential financial losses if that data is compromise

WHO SHOULD USE ACTIFILE?

Actifile is the perfect and affordable solution for small and medium size companies to achieve maximum data security with just a click of a button! Existing cyber security solutions are complicated, frequently unwieldy, and seldom provide genuine multi-level protection. They come with a high TCO and are rarely user-friendly for the average employee

Actifile's game-changing autonomous data security solution is non-intrusive and easy to use. It won't slow your systems, disrupt your workflow, or alienate your employees.

Sleep soundly at night, and focus on future growth without fear of being hacked or compromised. Your company's data, R&D, future projects, and financial data is safe from malicious actors, and employee negligence or sabotage.

Actifile will keep your data safe, no matter what the threat!

Actifile is democratizing data security and giving every company and organization the tools to locate and secure sensitive data. Our mission is to provide a rock solid foundation of cyber security that allows your business or service to grow and achieve its fullest potential.

Protection for new start-ups, growing businesses and major enterprises.

Your employees can work remotely and across multiple devices. Your sensitive data is always secure.

Make a safe transition to a cloud based solution. Your encrypted data is worthless to hackers.
