AUTONOMOUS DATA SECURITY

COMPLETE DATA SECURITY FOR MSPS

Monitoring. Evaluation. Encryption

Actifile is a single, comprehensive cyber security solution that is transforming how MSPs protect their clients' sensitive data

COMPLETE DATA SECURITY FOR MSPS

When you're responsible for clients' data security, you can't take chances. A single data breach can have disastrous consequences.

Actifile is a single, comprehensive cyber security solution that is transforming how MSPs protect their clients' sensitive data.

MAKE ACTIFILE YOUR PRIMARY WEAPON OF DEFENSE!

You can become a true top tier service provider when you make Actifile your primary weapon of defense!

Companies that use Actifile can safely allow employees to work remotely across multiple devices. Businesses can also make the transition to cloud, with invisibly encrypted data. Even if a hacker breaches your client, the stolen data will be worthless to them!

> We're revolutionizing cyber security with the first truly autonomous data security platform!

WHY YOU NEED ACTIFILE

- Increase your revenues from each client, while reducing your overheads and streamlining your processes.

- Guarantee your clients full protection against malicious actors, industrial espionage, and employee negligence or sabotage.

- Protect your clients, protect your reputation, safeguard everybody's future!

Locate sensitive data and map risks in real time

Calculate financial penalties and liabilities for data leaks and ransomware attacks

Remediate data risks and apply automated encryption

Contact us today for a FREE data risk assessment!
A free Actifile audit will scan all your systems, locate vulnerable data, and apprise you of potential financial losses if that data is compromise

AUTONOMOUS DATA SECURITY

ACTIFILE LETS MSPS (IT SERVICES COMPANIES) SLEEP AT NIGHT!

Actifle's autonomous software is non-intrusive, user friendly, and works silently in the background. It guards your clients - actively and proactively - against all known threats.

Firewalls and antiviruses are just a first line of defense. Organizations that depend on a firewall, are betting everything on the strength of a single shield.

- The average initial cost of a data breach is $4 million
- 60% of companies that suffer data leaks and ransomware attacks go bankrupt, and close their doors in a matter of months.

Don't let it happen to your clients!   Partner With Actifile Today!

WORK LIFE BALANCE

Finding it hard to sleep at night because you are worried about your clients?
We know that you work tediously around the clock managing your business and taking care of your clients.
Or maybe it is the competition that keeps you awake at night?
