## EDUCATION

Miami Beach Senior High School – Miami Beach, Florida

Expected Graduation: June 3, 2025

High School Diploma

GPA: Weighted – 4.000 | Unweighted – 3.344

## INTERNSHIPS

Experience Aviation – Barrington Irving

*August 2023*

During my internship with Barrington Irving, I assisted with program operations, including research on hand-made constructible drones for his curriculum named, Flying Classroom, which encompasses STEM+. Barrington Irving gave me insights from being the only African – American to fly around the world solo and is now one of my key mentors to assist me with becoming a commercial pilot.

Miami Beach Convention Center

*July- August 2024*

During the summer of 2024 I had the opportunity to work within the Miami Beach Convention center where I got an inside view on how Event Management operates. I worked along-side my mentor, helping with laying out client's needs, how to obtain, store, and organize information, and walking around to make sure objects are placed in the correct locations that fit the client's needs. Not only do clients send information to the department but, the department asks for certain information to be able to provide the client with the right amount of support.

## EXTRA-CURRICULAR ACTIVITIES

OBAP (Organization of Black Aerospace Professionals)

*Miami Beach/ Fort Lauderdale          June 2023*

I attended two academies during the summer of 2023 for aviation, both were organized by OBAP. These academies brought in many people from different careers in aviation, from ATC Tower, Ramp Services, Mechanics, FAA (Federal Aviation Administration), Cargo Captain Pilots, Commercial Captain Pilots, and four Chief Pilots of Airblue, Spirit, Commute Air, and American Airlines. I was able to experience drone flight, a hands-on project to build cardboard/Styrofoam planes. The highlights were when we toured Miami International Airport and had the privilege to view all the different types of aviation careers from within. The most exciting event of all was being able to enter the cockpit of a Boeing 787 Dreamliner and a Boeing 777. Through these two academies I learned a great deal and made a lot of contacts, including pilots in the Military, as well as gaining hands-on experience on what it takes to become a commercial pilot.

Miami Beach Fire Cadet

*2022-2023*

I attended the sixteen-week Fire Cadet Academy at Fire Rescue Station 3 right next to Miami Beach Senior High. This academy Participated in the fire fighter training such as putting on bunker gear, search and rescue, enclosed space training, pulley device training, and nozzle and hose techniques. I earned my CPR and shallow water life guarding certification.
