## PROFILE

My life goal is to become a Commercial Pilot First Officer. Ever since I was a young boy I had a strong interest in flying planes, their style, their aero dynamics, and especially their mechanical components from my desire to build/create models. Soaring through the air feels like freedom from my perspective.

## EDUCATION

### **Miami Beach Senior High- August, 2021 - June, 2025**

My near term goal to further my career path is to earn excellent grades and obtain my High School diploma. During college I plan to achieve a Bachelor's Degree in Aviation.

## INTERNSHIPS

### **Experience Aviation - Barrington Irving- August 2023**

Opa-Locka Airport, Miami

During my internship with Barrington Irving, I assisted with program operations, including hand-made constructible drones for his curriculum named, Flying Classroom, which encompasses STEM+. Barrington Irving gave me insights from being the only African - American to fly around the world solo, and is now one of my key mentors to assist me with becoming a commercial pilot.

## EXTRA-CURRICULAR ACTIVITIES

### **OBAP (Organization of Black Aerospace Professionals)- June, 2023**

Miami/ Fort Lauderdale

I attended two academies during the summer of 2023 for aviation, both were organized by OBAP. These academies brought in many people from different careers in aviation, from ATC Tower, Ramp services, mechanics, FAA (Federal Aviation Administration), Cargo Captain Pilots, Commercial Captain Pilots, and three Chief Pilots of Airblue, Spirit, Commute Air, and American Airlines. I was able to experience drone flight, a hands on project to build cardboard/styrofoam planes, the highlight was when we toured Miami international Airport and had the privilege to view all the different types of aviation careers from within. The most exciting event of all was being able to enter the cockpit of a Boeing 787 dreamliner and a Boeing 777. Through these two academies I learned a great deal and made a lot of contacts, meeting new people and gaining knowledge, including pilots in the Military, as well as gaining hands on experience on what it takes to become a commercial pilot.

### **Miami Beach Fire Cadet- 2022- 2023**

I attended the sixteen week Fire Cadet Academy at Fire Rescue Station 3 right next to Miami Beach Senior High. This academy participated in fire fighter straining such as putting on bunker gear, search and rescue, enclosed space training, pulley device training, and nozzle and hose techniques. I earned my CPR and shallow water life guarding certification.
