FinLitX
Education
Technology

Imagining a world where **everyone** of earth has **equal access** to the future.
Education, training, and the world of work have been significantly impacted by the COVID-19 pandemic and the role of digital will be core to the future of learning - from **early childhood**, **K12**, **higher education** through to workforce **upskilling**.

We are seeing full spectrum **innovation** from digital content, **online learning**, advanced technology from **AI** to robotics and, web3 to the metaverse into **language** learning, tutoring, **assessment**, up-skilling and beyond.
Capital for innovation is flowing into the sector as traditional education systems urgently seek **digital solutions** right across the **learner lifecycle** and new models, approaches and solutions emerge to build new competitive landscapes.

PreK to 12
Driven by the move from print to digital resources, interactive online environments, and formative assessment, digital will become a more integral part of PreK-12 education, both at school and in the growing D2C market. Hear from those making policy, delivering solutions and funding innovation about where things are heading.

Higher Education
Digital transformation efforts in Higher Education have been accelerating, driven by major shifts to online, blended and hybrid learning, new credentials, expanding partnership models, and closer ties between education and work. Engage with leaders who are playing a key role in the new competitive landscape of higher education and join the conversation on digital transformation.

Workforce and Up-Skilling
New jobs, new skills and new ways of working are challenging employers and whole industries like never before. Learn about how technology is shaping the future of upskilling and the emerging models for upskilling and reskilling that are likely to dominate in the future. Meet industry leaders and hear what they have to say about workforce needs and how learning might look in the future of work.

FinLitX Leads the Way
FInLitX, a leader in the EdTech industry offers an online platform to both consumers and education institutions to satisfy the above education demands and offer investors a unique 10x investment opportunity.
