

## Rainwater Collection Has Never Looked So Good

ThinTanks USA 300G Slim Rainwater Storage Tank is a thoughtfully designed narrow, rectangular, rainwater collection container. ThinTanks are ideal for use in any residential, commercial or industrial settings that would benefit from water storage.

- **Space Saving:** The tank is designed to minimize footprint with a width of 11 1/4", and to fit between 4x4 timber posts on an 8 ft center designed to blend seamlessly with existing landscape.
- **Versatile Installation:** Tank is capable of freestanding or wall supported installations and allows for connection of two or more tanks in series without gaps between ends, allowing for use in narrow spaces, along existing walls, fencing or freestanding, making it a multi-functional privacy fence.
- **Vertical Gardening:** Tanks can be utilized as a unique and attractive vertical garden system with the addition of optional ThinPots. ThinPots are designed to allow connection of planter pots onto tank for floral or vegetable gardens, and are capable of self-watering or manual irrigation.
- **Made in Texas, USA:** Constructed from rotationally molded NSF 61 listed, UV stabilized, BPA free, and FDA compliant PE resin resulting in a beautiful seamless finish.
