## Our Story

While most folks enjoy the leisure and free time that retirement bring, for Australian engineer Peter Snelling, it was only the beginning of his next chapter of innovation...

Having spent his career in commercial swimming pool construction and ensuring a safe environment for his community and more as a water treatment and air quality control engineer, Peter wasn't ready for the poolside when it came time to retire in 2007.

The idea for ThinTanks was, however, born from a lounge chair in the backyard, as Peter observed the wood piling fence surrounding his home and thought there had to be a way to make it more functional. It wasn't long before the idea of a multipurpose and attractive water storage tank with a small footprint formed and became a reality.

The idea was that a necessary part of the landscape, water storage, could be reinvented in a way that would allow it to function as both a fence and a vertical garden. By 2008 the idea had taken shape. Manufacturing of the first 1000L ThinTanks began and interest grew across the county. Just a year later, the 2000L was introduced and quickly became their best seller.

Over the next decade, seven additional sizes were introduced, and ThinTanks were being shipped worldwide. They offer a unique solution for environmental design and low impact development in communities where water restrictions exist due to either scarcity or storm-water planning. Manufacturing expanded from Australia to their neighbors in New Zealand, not long after to Germany, and by 2022, the US had joined the ranks of ThinTanks worldwide manufacturing by introducing the latest 300G tank, designed specifically for the North American market.

As for the tanks, what began as an attractive water collection storage tank, has grown into countless other applications, from residential to commercial and more. The Australian Military filled them with sand for laser target practice. They were installed as gray water holding tanks on houseboats. A US based manufacturer fitted them to trucks and trailers for water on the go. With so many sizes, colors and options, there's a ThinTank for every application.

# Product Line

## 300G ThinTank

Designed and manufactured in the USA. Constructed from rotationally molded NSF 61 listed, UV stabilized, BPA free, and FDA compliant PE resin resulting in a beautiful seamless finish.

Length	94.5"
Height	78"
Width	11.25"
Weight	223 lbs
Part #	PD-2006

## 500L ThinTank (132 Gal)

Length	47.25"
Height	47.25"
Width	15.75"
Weight	94 lbs
Part #	PD-2901

## 1333L FatTank (352 Gal)

Length	40"
Height	77"
Width	29.75"
Weight	210 lbs
Part #	PD-2904

## 2000L ThinTank (528 Gal)

Length	94.5"
Height	77.75"
Width	18.5"
Weight	298 lbs
Part #	PD-2905

## 2000L FatTank (528 Gal)

Length	59.25"
Height	77"
Width	29.75"
Weight	298 lbs
Part #	PD-2906

## 3000L ThinTank (793 Gal)

Length	117.5"
Height	77.75"
Width	23"
Weight	385 lbs
Part #	PD-2907

## 4000L ThinTank (1057 Gal)

Length	117.5"
Height	77.75"
Width	29.75"
Weight	428 lbs
Part #	PD-2908

## Tank Features & Options

- Inlet Strainers, Lids, and Vents
- 1" Brass or Stainless Steel Outlet Connections
- Freestanding or Wall-Supported Installation Options

Color variations may occur in resin.

# Innovative & Versatile Design

## Durable Stainless Steel Outlets

ThinTanks stand apart with molded-in stainless steel outlets, ensuring long-lasting durability and reliability.

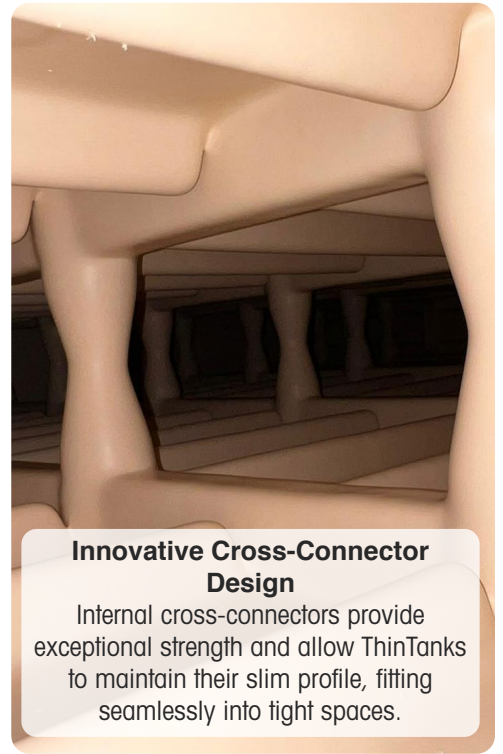

## Vertical Gardening

Tanks can be utilized as a unique and attractive vertical garden system with the addition of optional ThinPots. Designed to allow connection of planter pots onto tank for floral or vegetable gardens, pots are capable of self-watering or manual irrigation.

## Innovative Cross-Connector Design

Internal cross-connectors provide exceptional strength and allow ThinTanks to maintain their slim profile, fitting seamlessly into tight spaces.

## Unique 4x4 Design

Designed with 4x4 post rebates in end of tank for easy installation and seamless integration into existing fences or walls.

## Versatile Installation Options

ThinTanks can be installed freestanding or wall-supported. Connect multiple tanks in series without gaps, creating a continuous water storage solution that doubles as a functional privacy fence. Available in multiple sizes for countless applications.

## Space Saving

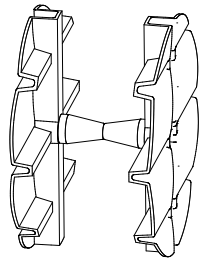

Maximize your space with ThinTanks' slim, rectangular design. Perfect for use as a privacy fence, alongside structures, or in any location where space is limited.

## Why Choose ThinTanks?

ThinTanks offer a superior water storage solution, blending exceptional performance with aesthetic appeal. Here's why they stand out:

- **Peace of Mind:** Invest with confidence knowing your ThinTank is protected by a robust 10-Year Warranty, ensuring long-lasting performance.
- **Unrivalled Durability:** Built to Last. ThinTanks deliver unparalleled strength and longevity. Featuring a robust network of strategically placed intersecting ribs and interior cross-connectors, ThinTanks are engineered to withstand the test of time and provide years of reliable service.
- **Flexible Placement:** Maximize your space with ThinTanks' versatile installation options. Their compact footprint and range of sizes allow for placement in almost any location.
- **Enhance Your Landscape:** Don't just store water, elevate your outdoor space. ThinTanks offer a functional and attractive design that seamlessly integrates with and enhances your landscape
