

The Pines Dental

Safety Precautions against CoVid19 novel coronavirus

1. Thorough pre-screening process (Touchless temperature taking, screening questions, blood oxygen measurement) to identify CoVid19 positive patients to facilitate delay of treatments for those patients.
2. Written log of Daily AM and PM CoVid19 Screening for all staff and service technicians.
3. Office wide provision of hand sanitizer, and appropriate PPE to patients and all staff as required by the Ministry of Health and Royal College of Dental Surgeons of Ontario.
4. Maintenance of 2m social distancing whenever possible.
5. Office wide medical grade HEPA air filtration.
6. Antiviral rinse administration prior to all treatments.
7. Daily disinfection of all touch surfaces, multiple times per day.
8. Complete disinfection of all surfaces in dental operatories before and after patient visits.
9. Non-overlapping appointments to minimize patient to patient interaction and the number of people in the clinic at one time.
