

Your Belgian ally against aging and degeneration

Sili-Fert A

Choline stabilized OrthoSilicic Acid

Optimizes the growth, recovery after injuries and the resistance of animals to stress and diseases... for an optimal metabolism and a boost of the own immune or defense system!

What can SILI-FERT A do for your animal?

- Si **SILI-FERT A** is an activating cellular nutrient and suitable for any animal
- Si **SILI-FERT A** is a regulator + stimulator and boosts the immune system
- Si **SILI-FERT A** is compatible with each type of fertilizer and can be mixed
- Si **SILI-FERT A** provides optimal growth stimulation in young animals and foals
- Si **SILI-FERT A** works to minimize injuries and developed to heal wounds faster

Advantages

- Si 100% doping-free bioavailable organic supplement for all animals
- Si helps against aging of organs and dehydration of the skin
- Si improves metabolism of all body cells and regeneration
- Si only 0.05 ml per 10 kg = 1 drop per 10 kg per day!

*The best results are obtained through daily intake of
Choline-stabilized liquid orthosilicic acid;
SILI-FERT A is therefore a preventive and
essential addition for a balanced diet of your animals.*

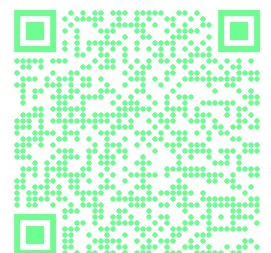

Orthosilicic acid from SILI-FERT A is the only form of Silicon that is 100% absorbable and is necessary for all important functions of the organs and for general health.

SILI-FERT A improves the growth and natural resistance of all kinds of mammals and birds

SILI-FERT A is suitable for young, adult and older animals for professional farming and pet animals

SILI-FERTA

Growth regulator, immunity enhancer + fast recovery based on orthosilicic acid

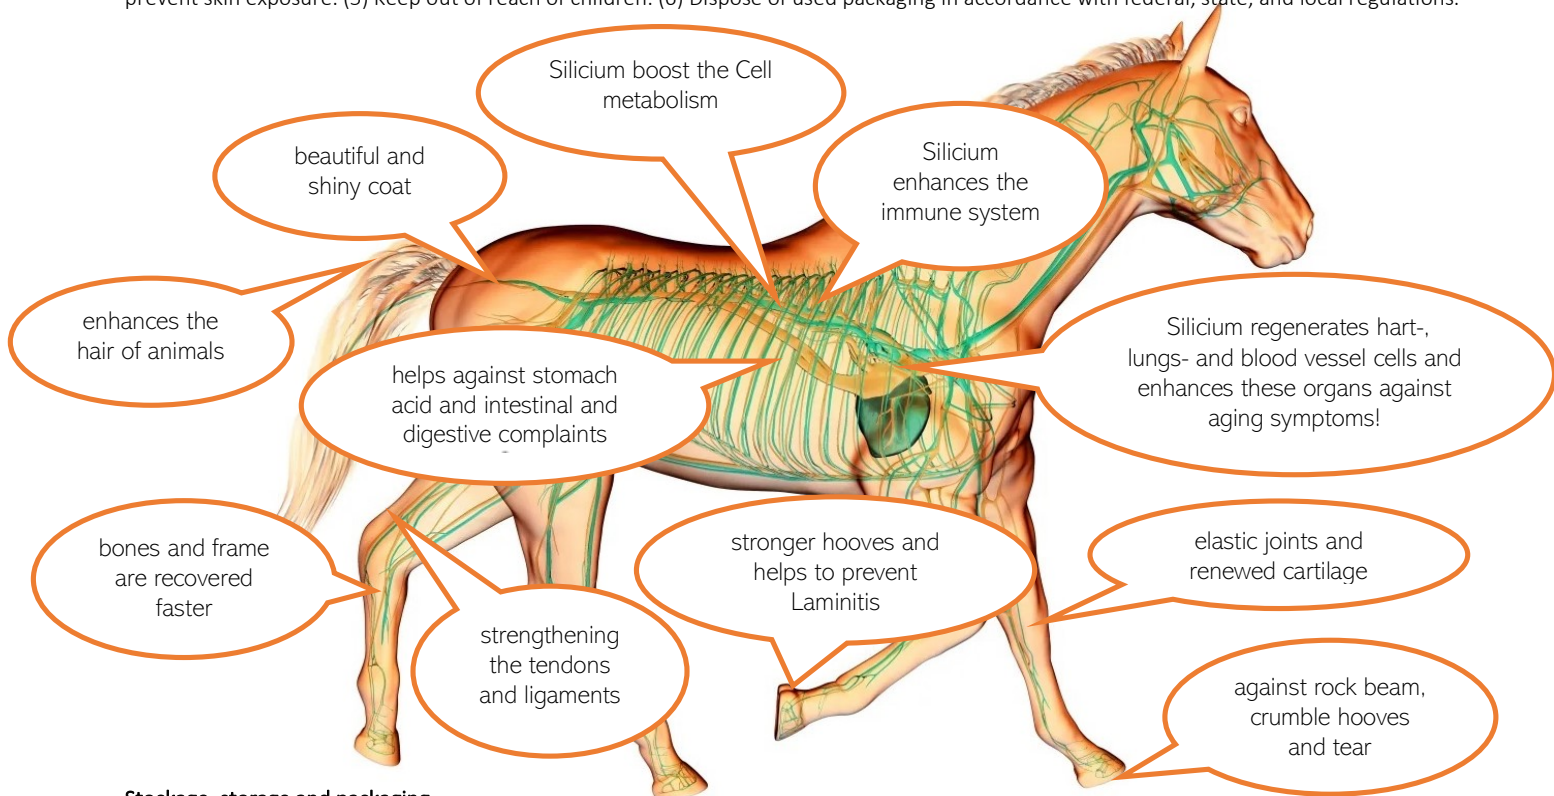

Sili-Fert A is a concentrated form of 100% bioavailable and 100% soluble Orthosilicic acid [Si(OH)₄], approved for animals to improve the immune system, the regeneration of cartilage for joints and bones, stronger hooves, more beautiful coat and hair... by adding Liquid Silicium, (sports) injuries and wounds will heal faster!

Guaranteed Minimum Analysis

→ 100% BIO available Orthosilicic acid [Si(OH)₄] :	2.2%
→ Stabilized with Choline :	14.6%
→ Enriched with MSM (MethylSulfonylMethaan) :	6.0%

Disclaimer: (1) If additional stresses are observed, the frequencies and/or volumes of the treatments may be increased by a maximum of 2 to 3 drops per 10 kg of body weight per day. (2) For standard treatments as directed, use one drop per 10 kg of weight. A 500 kg horse needs a daily dose of 50 drops ~ 2.5 ml; this dose may therefore be increased to 5 ml (for a maximum of 2 weeks) and to 7.5 ml per day for a maximum of 1 week. (3) Treatment should be started immediately and the recommended dose should be administered daily via drinking water. (4) **Sili-Fert A** can also be diluted in a glass of water and sprinkled over the feed. (5) Guideline: 20 drops = 1 ml for a 200 kg animal; cats, dogs, etc. weighing less than 10 kg: 1 drop per day

Other directives: (1) **Sili-Fert A** should be administered after dilution, preferably in the morning. (2) Administer consistently daily and maintain treatment for 2 to 3 months. (3) Wear appropriate safety goggles or chemical safety goggles. (4) Wear suitable protective clothing and gloves to prevent skin exposure. (5) Keep out of reach of children. (6) Dispose of used packaging in accordance with federal, state, and local regulations.

Stockage, storage and packaging

Sili-Fert A can be stored for 2 years after opening (15° and 25°C) | Lot Number: Expiring date:.....

Containers : 100 ml (Netto weight = 0.113kg), 1 Liter (Netto weight = 1.13kg), 5 Liter (Netto weight = 5.65kgs)

Registration number : BE355
