

InfiniTEM® XL: Innovation, the future of exploration

InfiniTEM® XL has 4 times more power than its predecessor InfiniTEM®
Off-hole anomaly detected, 728 m off-hole at 930 m deep

InfiniTEM®XL: Increase effectiveness in exploration from surface or borehole

- Increased depth of exploration
- Increased lateral range of exploration
- Allows increased line spacing when searching for large and/or deep bodies
- Reduced interference from surficial conductors
- Opportunity for rapid reconnaissance at wider line and station spacing
