Biography

Khi Lo is an R&B artist for those of us who stayed up too late coding, fell in love once and never got over it, and still believe in meaning over the algorithm. Whether you're a comp-sci major in Virginia, a med school student in New Jersey, or a poet hiding behind spreadsheets in London, Khi Lo's music creates space to feel deeply and unapologetically.

He blends **sensual drill, moody R&B**, and the **Asian American experience** into romantic soundscapes that reject hookup culture and remind us that real love still hits the hardest. With **over 1 million streams**, support from **Spotify's Discover Weekly** and the official *This Is Khi Lo* editorial playlist, and **co-signs from Vic Mensa, Johan Lenox, Taylor Gang, and YesJulz**, Khi Lo is redefining emotional depth in modern music. His recent releases, *SLIDE* and *ROCK DA BOAT*, draw comparisons to *Take Care* for a new generation.

With a steady base of **5–7k monthly Spotify listeners** and a genre blend of **R&B, house, and drill**, Khi Lo speaks directly to the suburban diaspora kid with immigrant parents and a big heart — maybe the oldest sibling, the group's emotional anchor, or the one still writing love letters in 2025.

Since **headlining a sold-out show at Songbyrd Music House in D.C.** with viral rapper **Noochie**, Khi Lo has been developing his sound and live presence. This summer, he'll debut his hit *SLIDE* as an **EDM remix in Toronto** alongside underground DJ **Fifthchild**, expanding his sonic universe even further.

Khi Lo's producer on *SLIDE* also crafted the viral **Kehlani x Jordan Adetunji** collaboration *KEHLANI*, and that same DNA runs through Khi Lo's track— textured, emotional, and heavy with intention.

Beyond music, he curates and hosts **community-driven shows** across D.C. (Pentagon City Mall, smallwoodenbox) and NYC (The Delancey, 3NY in SoHo), creating intimate, expressive spaces for fans who come for the bass but stay for the healing.

Raised sheltered and shaped by therapy and reflection, **Khi Lo sings what most are afraid to say**: that love matters. That sex can be sacred. That vulnerability isn't weakness — it's survival.
