Product	Article Nr.	Description
<p align="center">Updater for License for 12 Months of updates*</p>	<p align="center">0800.71030.00</p>	<p>Yearly fee for continuously updated VaDia Suite. See detailed information below.</p>

* All new VaDia Suite licenses have 12 months free updates from

the date the license is activated in the VaDia Suite PC Program. After 12 months the Updater Fee of 100 EUR must be paid to have access to new updates and support from BioControl. The PC Software can be used without paying the yearly fee, but no new updates will be downloaded if the license is not updated yearly.

Additional modules can be added to existing licenses. If you wish to add a module to an existing license ID, please inform us of this when you send us the order with your VaDia Suite License ID. See chapter 'licensing' for license details and conditions. The license ID and Password are printed on the invoice.

Note: All manuals, instructions and support are in English language.

Replacement discount:

BioControl offers a replacement discount when a VaDia2 (#71054/55) is returned to BioControl for repair outside the warranty conditions.

This replacement discount is based on the age of the VaDia2 (production date) as follows:

VaDia2 #71054/55 age (production	< 1	1-2	2-3	3-4	> 4	Years
List price discount when buying new #71054/55	40	30	20	10	0	%

The replacement discount is offered when the VaDia2 is returned following BioControl's Return Of Goods procedures (ROG-form).

PC and OS requirements:

VaDia Suite is designed for PC's with Microsoft Windows Operating System.

Processor: Intel i3 or Ryzen 3 (no ARM processors)

Minimum OS: Windows 10/11 x64 with .NET Framework 4.5

Minimum RAM: 4GByte

Licensing:

The PC-program 'VaDia Suite' is divided in modules. At present the modules 'Milking Time Testing', 'Pulsator Testing' and 'Falloff Testing', and 'Extras' are available. After you have installed VaDia Suite, you can

request a test license to try the complete VaDia Suite with all modules activated for a 14 days evaluation period. The VaDia Android Mobile Application can be downloaded from the Google Play Store. Price is given in local currency with VAT, please see your local Google Play Store. Your

VaDia Suite license ID must be activated in the VaDia mobile app to have access to the same functionality as in your VaDia Suite license. Contact our support team for any questions: support@biocontrol.pl VaDia Suite is copy-protected by a software key. This software key is a unique combination of license ID and password that can be purchased from BioControl. The purchase of a software key is equivalent to one user license for one user.

VaDia Suite will work when it is not connected to the internet, but the PC must be connected to the internet to activate the user license. VaDia Suite will stop working on the PC if the user license is not activated within the evaluation period after the test license has expired.

Included in the VaDia Suite user license is the right to automatic updates for a period of 12 months after activation. Updating warrants that VaDia Suite is always according to the latest modifications, improvements, insights and features. Automatic updating is done with 'VaDiaSuiteUpdater', a program that is part of VaDia Suite. When starting VaDia Suite, the VaDiaSuiteUpdater automatically makes contact with the BioControl server and looks for VaDia Suite updates. If available it will ask the user if the updates should be installed.

Extension for another 12 months automatic updating can be purchased from BioControl for EUR 100 at the end of the automatic updating period. Declining this extension implies that VaDia Suite will not be updated after this period. We recommend automatic updating so that you will always have the latest insights and features available and your system will continue to work, e.g. in case of Operating System increments. Additional modules can be added to existing licenses. If you wish to add a module to an existing license ID, please inform us of this when you send

us the order with your VaDia Suite License ID. See chapter 'licensing' for license details and conditions. The license ID and Password are printed on the invoice.

Note: All manuals, instructions and support are in English language.

Additional license activation:

A VaDia Suite licensee is entitled to additional activation under the following conditions:

The same user wants to use VaDia Suite on maximum one additional PC (e.g. a desktop PC for in the office and a notebook PC for en-route).
The user wants to activate the license in the VaDia Mobile Android Application on one device.

Requests can be sent to support@biocontrol.pl (note the PLextension!), the email should include the license number, user name (as entered in the activation) and reason for the additional activation. BioControl reserves the right to refuse additional activation requests in case of serious concerns regarding illegal copying.

Terms and conditions:

By installing and running the VaDia Suite software the user accepts 'BioControl General Conditions of Sale and Delivery' that is listed on the BioControl website.

BioControl reserves the right to deactivate any licenses that are misused. The VaDia Suite license is to be used by one user only.

Please see BioControl Personal Data Transfer Agreement, Privacy Policy and End-User License Agreement on our webpage or in VaDia Suite PC Program.
