

In December 2020, 1 day prior to the rollout of the covid 'vaccine' in the UK, Oracle Films and CoviLeaks released a film called Ask The Experts featuring a collection of doctors, scientists and professionals who warned that the covid 'vaccines' were not safe nor effective and that there was no evidence of a pandemic. They were correct.

Here are the email exchanges between myself and the BBC executive producer Steve Anderson. Marianna Spring featured in the Panorama as the 'investigative journalist' apparently specialising in 'misinformation'. She is now embarking on a new venture called 'Marianna in Conspiracy Land'.

Subject: BBC Panorama programme

Dear Ms. Hine,

I am the Executive Producer on a BBC Panorama investigation due to be broadcast on February 15th which features a video by Oracle Films. You are credited as being involved with the film, which is called 'Ask the Experts'.

The video includes and advances false and misleading claims about the coronavirus vaccine and the pandemic - including that it is not real, that the vaccine will change your DNA and that it is dangerous. Claims of this nature are contradicted by the overwhelming consensus of mainstream scientific opinion.

Our research leads us to believe that this video has negatively impacted individuals making life-changing decisions about taking the coronavirus vaccine.

Eminent experts in the fields of epidemiology and microbiology have strongly warned about the threat the video poses.

You are also the General Secretary of the World Doctors Alliance - a group of people who have a history of promoting misleading claims during the pandemic.

We are writing to invite you to respond to / comment on the above issues and matters in a written response. If you wish to do so, we should need to receive this at the latest by Thursday 11th February at 1700 in order for us to be able to take account of it as we finalise the programme.

Yours sincerely,

Steve Anderson
Executive Producer

Dear Steve,

As the founder of CoviLeaks, I worked in collaboration with Oracle Films to produce 'Ask The Experts'. One must wonder why a single viewpoint or narrative, concerning science, is

uncritically accepted (when science is rarely absolute) and there is no scientific debate, hence why I was part of making this film; to show that there is indeed scientific evidence that contradicts the governments science. Lockdowns were based on proven flawed modelling by Neil Ferguson and Matt Hancock himself confessed to using the Hollywood film 'Contagion' as inspiration for the vaccine rollout regarding the 'order of priority' and pace.

You have a duty to provide the public with truthful and unbiased news; open debate should be encouraged with critique of unsettled science, but you have done nothing but share distressing images, fearmongering 'news' reports with a rolling daily death count several times a day; a count that includes death for ANY REASON within 28 days of a positive test. Where is the investigative journalism? Why has there been no discussion or debate between government scientific advisors and those scientific experts who present evidence opposing the narrative?

Debate specifically addressing vaccines is much needed since pre-clinical trials have been bypassed to rush vaccines to market, all for a 'disease' that has not been an HCID since 19th March 2020 and 'rarely' leads to severe illness, with an IFR of less than 1% (comparable to the seasonal flu). Perhaps you could investigate why flu and pneumonia deaths have effectively been re-classified as Covid-19?

The fact is that you are a mouthpiece for government propaganda, you have repeated false statistics with no apology: Statistics based on a PCR test with a Ct of greater than 35 or equal to 45 (which the WHO advises is too high to be accurate), a test that cannot distinguish between an infectious and non-infectious virus. Flawed statistics enabling the dictatorship under which we now live. When critical voices are heard with evidence-based views opposing the narrative, they are censored and 'fact checked', defamed and ridiculed. Your doomsday forecasting enables the suppression of science for financial and political gain.

You should be ashamed.

Finally, subsequent to my off the record conversation with Marianna Spring, if there appears in print or in this Panorama programme, any direct allusion(s) or suggestion(s) whatsoever to myself or my work as 'covid-denier/denial', 'pseudoscientific' 'conspiracist', 'anti-vaxx' and/or 'conspiracy theorist' then I will arrange to take appropriate action(s) against you, Marianna Spring, the BBC, anyone involved in the production of this Panorama programme or anyone concerned in order to redress any defamation and libel.

Sincerely,
Fiona Hine
