

YOUR Child. YOUR Choice.

As parents, we want the best for our children & to keep them as safe & healthy as possible. It's vital to review ALL the available information because the decision to have the Covid 19 injections cannot be reversed.

Are there any risks associated with the covid 19 injection?

Yes, global monitoring systems report high levels of adverse reactions & deaths.

Are children at risk from Covid 19?

No, statistical risk to children is zero. Alpha & Delta recovery in under 15's is 99.997% Omicron is milder.

How effective are vaccines against Omicron?

Reports suggest that present vaccines are just 10% effective against Omicron.

Do these vaccines protect against future variants?

There is no evidence that the currently available vaccines will provide such protection.

Do these vaccines stop infection & transmission?

There is no evidence of any significant reduction in infections & transmission following injection.

I've heard a lot about myocarditis, what is it?

Heart muscle inflammation with long term implications. There have been adverse reactions and deaths reported in global monitoring systems.

Is vaccine induced immunity better than natural immunity?

Studies show natural immunity is broader & longer lasting. Approx 85% of 5-11's already have natural immunity.

What about schooling and travel?

Vaccines didn't reduce absences notably in 12-15's. Global restrictions are being rescinded. A holiday can be rebooked, this technology cannot be removed from the body.

These are some of the many questions parents have about this issue. Please see overleaf for sources of essential reading that will help you weigh up these risks & benefits for your child.

The most important part of this decision making process is weighing up the risks & benefits of this injection versus the risk posed by covid 19 to your child. Thousands of experts agree that the benefits of this injection simply do not outweigh the potential risks for children.

Please view the following open letters, authored & signed by thousands of esteemed medical professionals worldwide:

UK - Open letter to MHRA signed by more than 650 medical professionals calling for pause in the programme for under 18s, as they are at no risk from covid & there are alarm signals of potential harms from this injection:

<https://childrensunion.org/cvag-pause-covid-roll-out/>

GLOBAL - 16,000 physicians & medical scientists around the world signed a declaration publicly declaring healthy children should NOT be vaccinated for COVID-19:

<https://doctorsandscientistsdeclaration.org/>

USA - Letter to FDA by the Childrens Health Defense calling for a halt to the roll out for under 18s due to the imbalance of the risk/benefit analysis.

<https://doctors4covidethics.org/letters/other-letters/>

ISRAEL - 93 Israeli Doctors issue directive to not use the Covid-19 vaccine on children: "We believe that not even a handful of children should be endangered through mass vaccination against a disease not dangerous to them."

Finally, please note global Covid-19 vaccine monitoring systems report these adverse events:

UK - Yellow Card System.

Over 2,000 deaths & more than 1.4 million injuries¹

USA - VAERS Database.

Over 24,000 deaths & more than 5.3 million injuries²

EUROPE - Eudravigilance Database.

Over 40,000 deaths & more than 3.6 million injuries³

¹<https://www.gov.uk/government/publications/coronavirus-covid-19-vaccine-adverse-reactions/coronavirus-vaccine-summary-of-yellow-card-reporting>

²<https://openvaers.com/covid-data>

³https://www.adrreports.eu/en/search_subst.html#

NB: Studies show only 1-10% of events are reported, so the actual numbers are likely much higher.

* data correct as of 12th Feb 2022
