

COVID VACCINES FOR YOUNG CHILDREN: SAFE & EFFECTIVE?

The UK government is now offering two doses of Pfizer to all 5-11 year olds, including healthy children, starting in April 2022.

Before vaccinating your young child, please consider the following information. Do your own research; these figures come from official UK government sources.

3,674 Injuries and Deaths in UK Children after Covid Vaccination

Official UK government statistics on Covid Vaccine Injuries. Child reports are not separated out into deaths and injuries. The UK's MHRA estimates injuries are underreported by a factor of 10. To 16/3/2022. Source: gov.uk

	<u>Reports</u>	<u>Injuries</u>	<u>Deaths</u>
Children	3,674		
Adults Dose 1&2	450,029	1,473,586	2,071
Boosters	47,418		

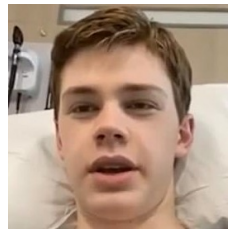

Confirmed Injured or Dead after Covid Vaccines

Luisa Petenuci
10, Brazil
Cardiac arrest 12 hours after Pfizer

Maddie de Garay
12, USA
Pfizer, Paralyzed from waist down

16, Manchester
Bleed on Brain
Died 16th Feb.

Phoebe Smith
12, Liverpool
Brain Aneurysm
Died 17th Mar

Apryl Scorer
16, Wycombe
Cardiac issues
Died Aug '21

Robbie Taylor
19, Falkirk
Died Oct '21

In each case above the media does not mention if they were vaccinated. Conditions such as heart attack and bleeding on the brain are closely associated with Covid-19 vaccines. There are two possibilities:

1. **If they were not vaccinated**, Doctors or the CMO should immediately inform us, to reassure the public.
2. **If they were vaccinated**, it is massively, massively reckless, and likely criminal, to not inform the public.
