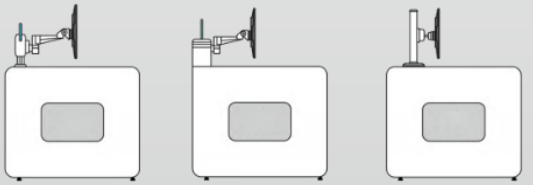
SCA-23

Screen Type:



SCA-23 / SCA-23-P

- High strength aluminum profile frame system
- Environmental protection HPL decorative panel
- Professional large capacity strong and weak electrical cable management
- Aluminum screen + luminous acrylic plate (SCA-23)
- Equipped with ground atmosphere lighting system
- Large size of bottom cabinet space
- Modular quick-pack design
- Natural cooling channel design
- Custom side panel light up logo
- Surface friendly powder coating

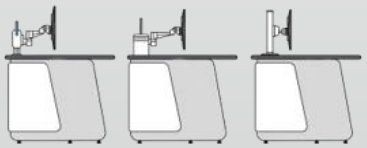
SCA-23

SCA-23-P

SCB | series

SCB-23

Screen Type:



SCB-23 / SCB-23-E

- High strength aluminum profile frame system
- Environmental protection HPL decorative panel
- Professional large capacity strong and weak electrical cable management
- Aluminum screen + luminous acrylic plate
- Equipped with ground atmosphere lighting system
- Large size of bottom cabinet space
- Modular quick-pack design
- Natural cooling channel design
- Custom side panel light up logo
- Surface friendly powder coating.

SCB-23-E

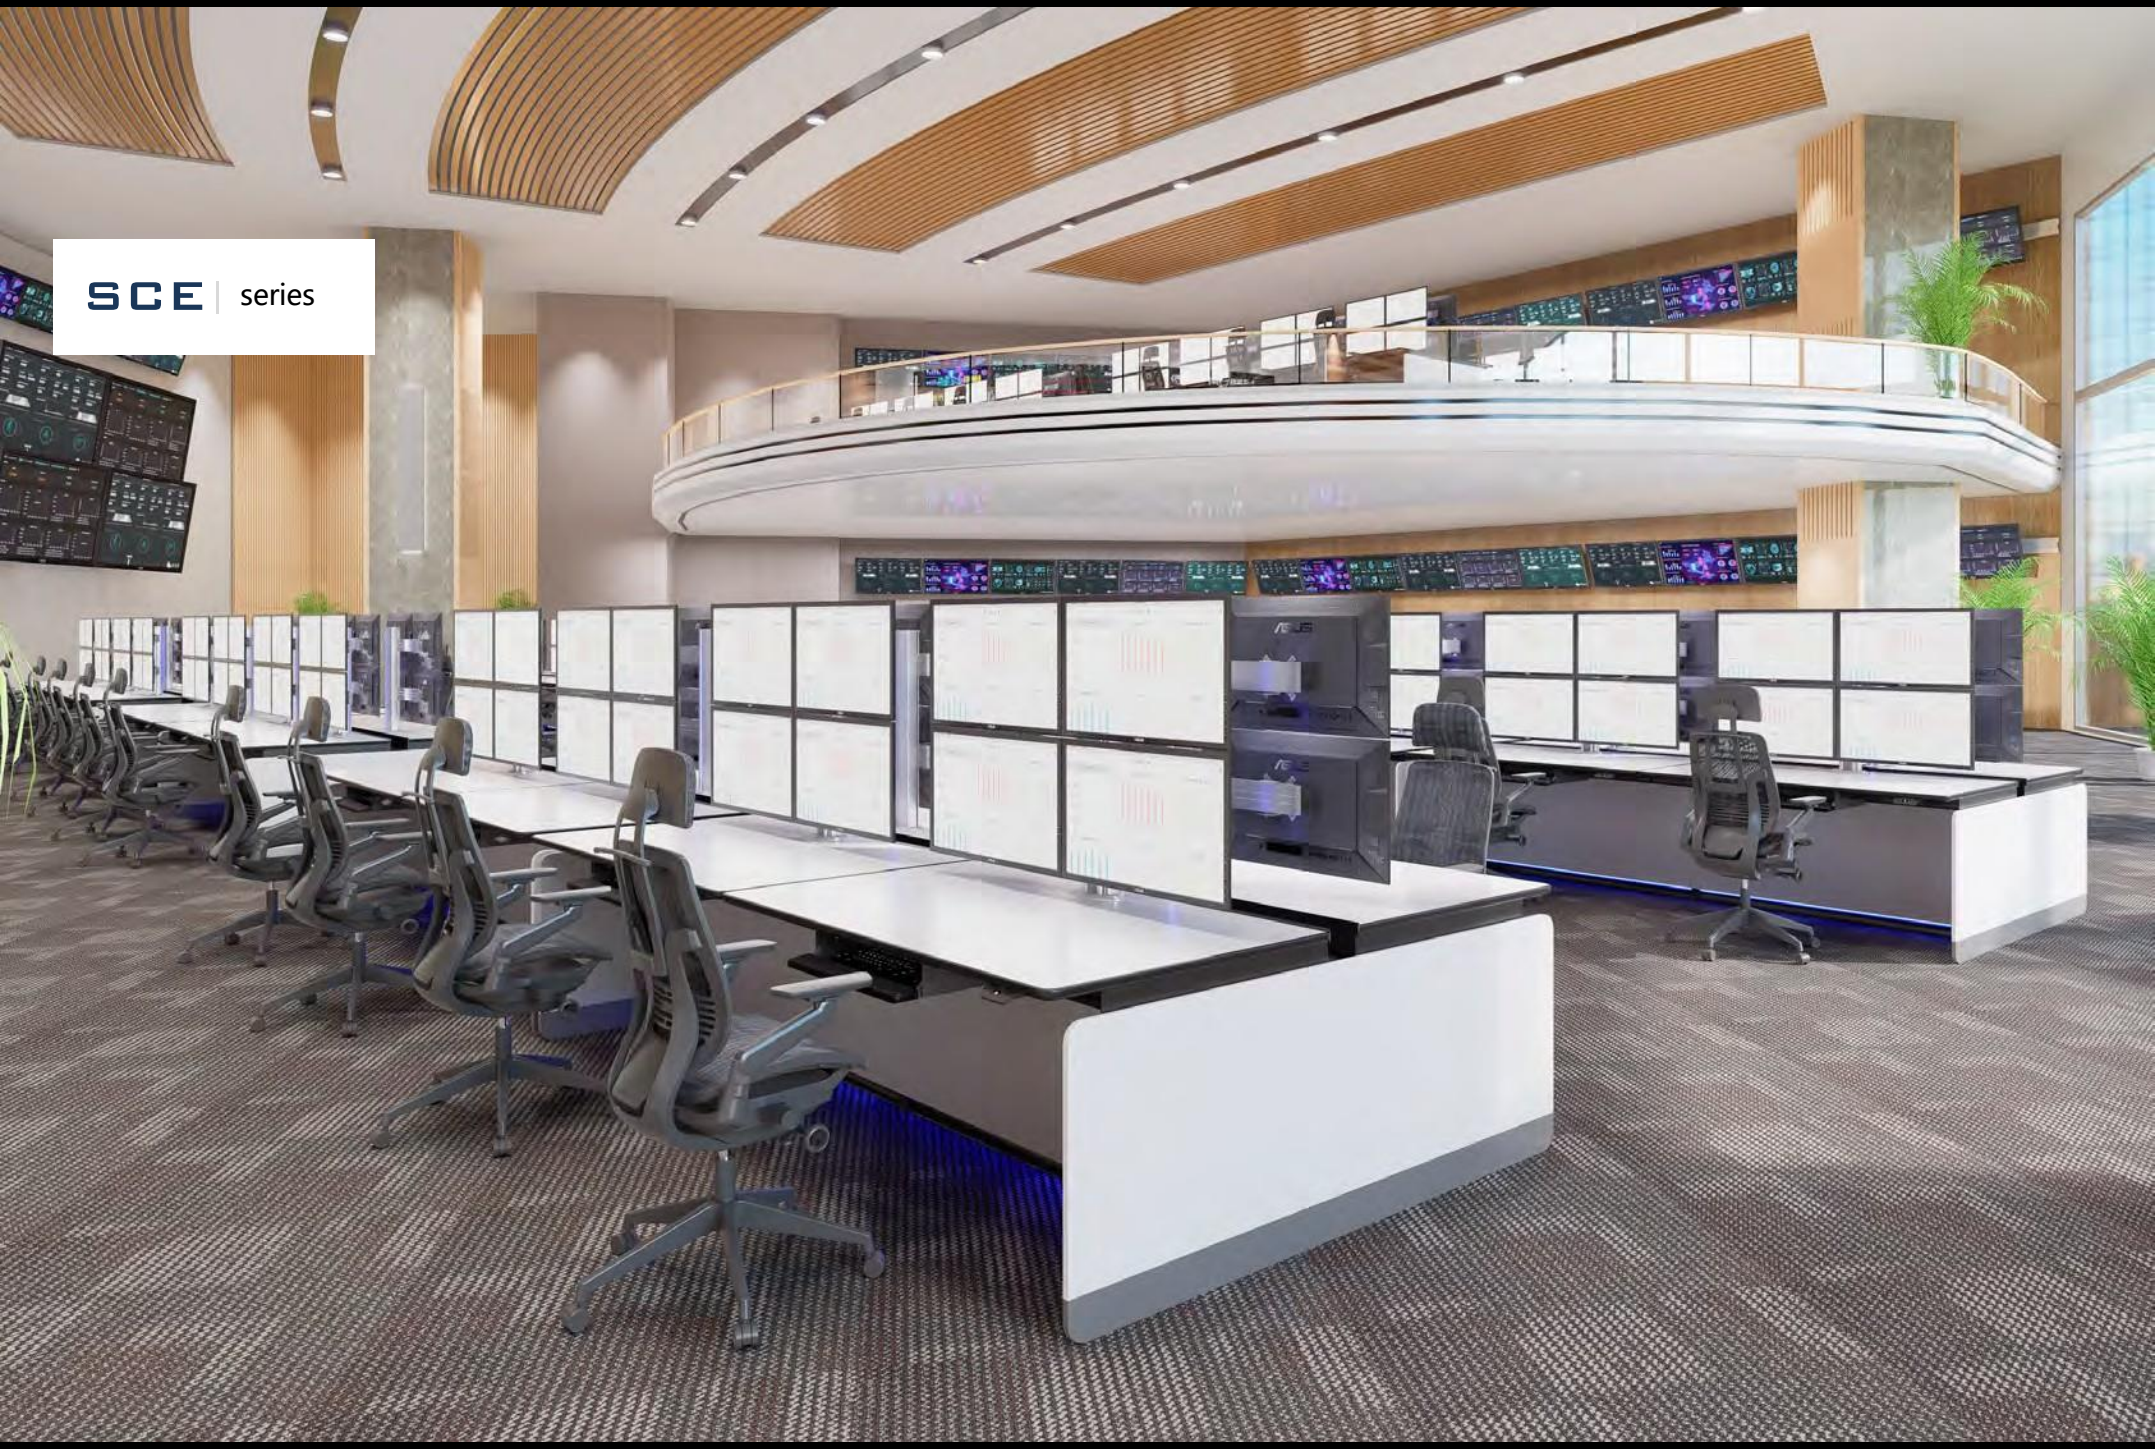
SCD | series

SCD-23

Screen
Type:

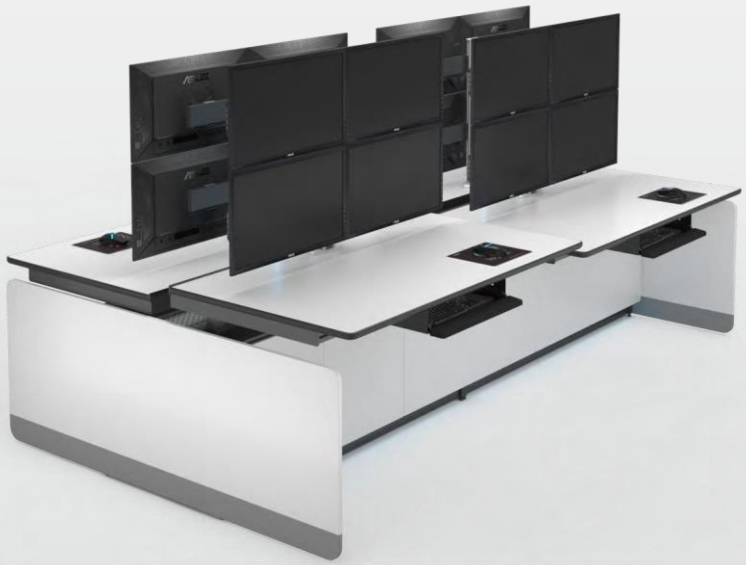
SCD-23

- High strength aluminum profile frame system
- Environmental protection HPL decorative panel
- Professional large capacity strong and weak electrical cable management
- Aluminum screen + luminous acrylic plate
- Equipped with ground atmosphere lighting system
- Large size of bottom cabinet space
- Modular quick-pack design
- Natural cooling channel design
- Custom side panel light up logo
- Surface friendly powder coating.



SCE | series

SCE-D



Screen Type:

Intelligent lift

SCE-D/SCE-S

- High strength aluminum profile frame system
- Environmental protection HPL decorative panel
- Professional large capacity strong and weak electrical cable management
- Equipped with independent 800N lifting system
- Equipped with ground atmosphere lighting system
- Large size of bottom cabinet space
- Modular quick-pack design
- Natural cooling channel design
- Custom side panel light up logo
- Surface friendly powder coating.

SCE-D

SCE-S

SCF | series

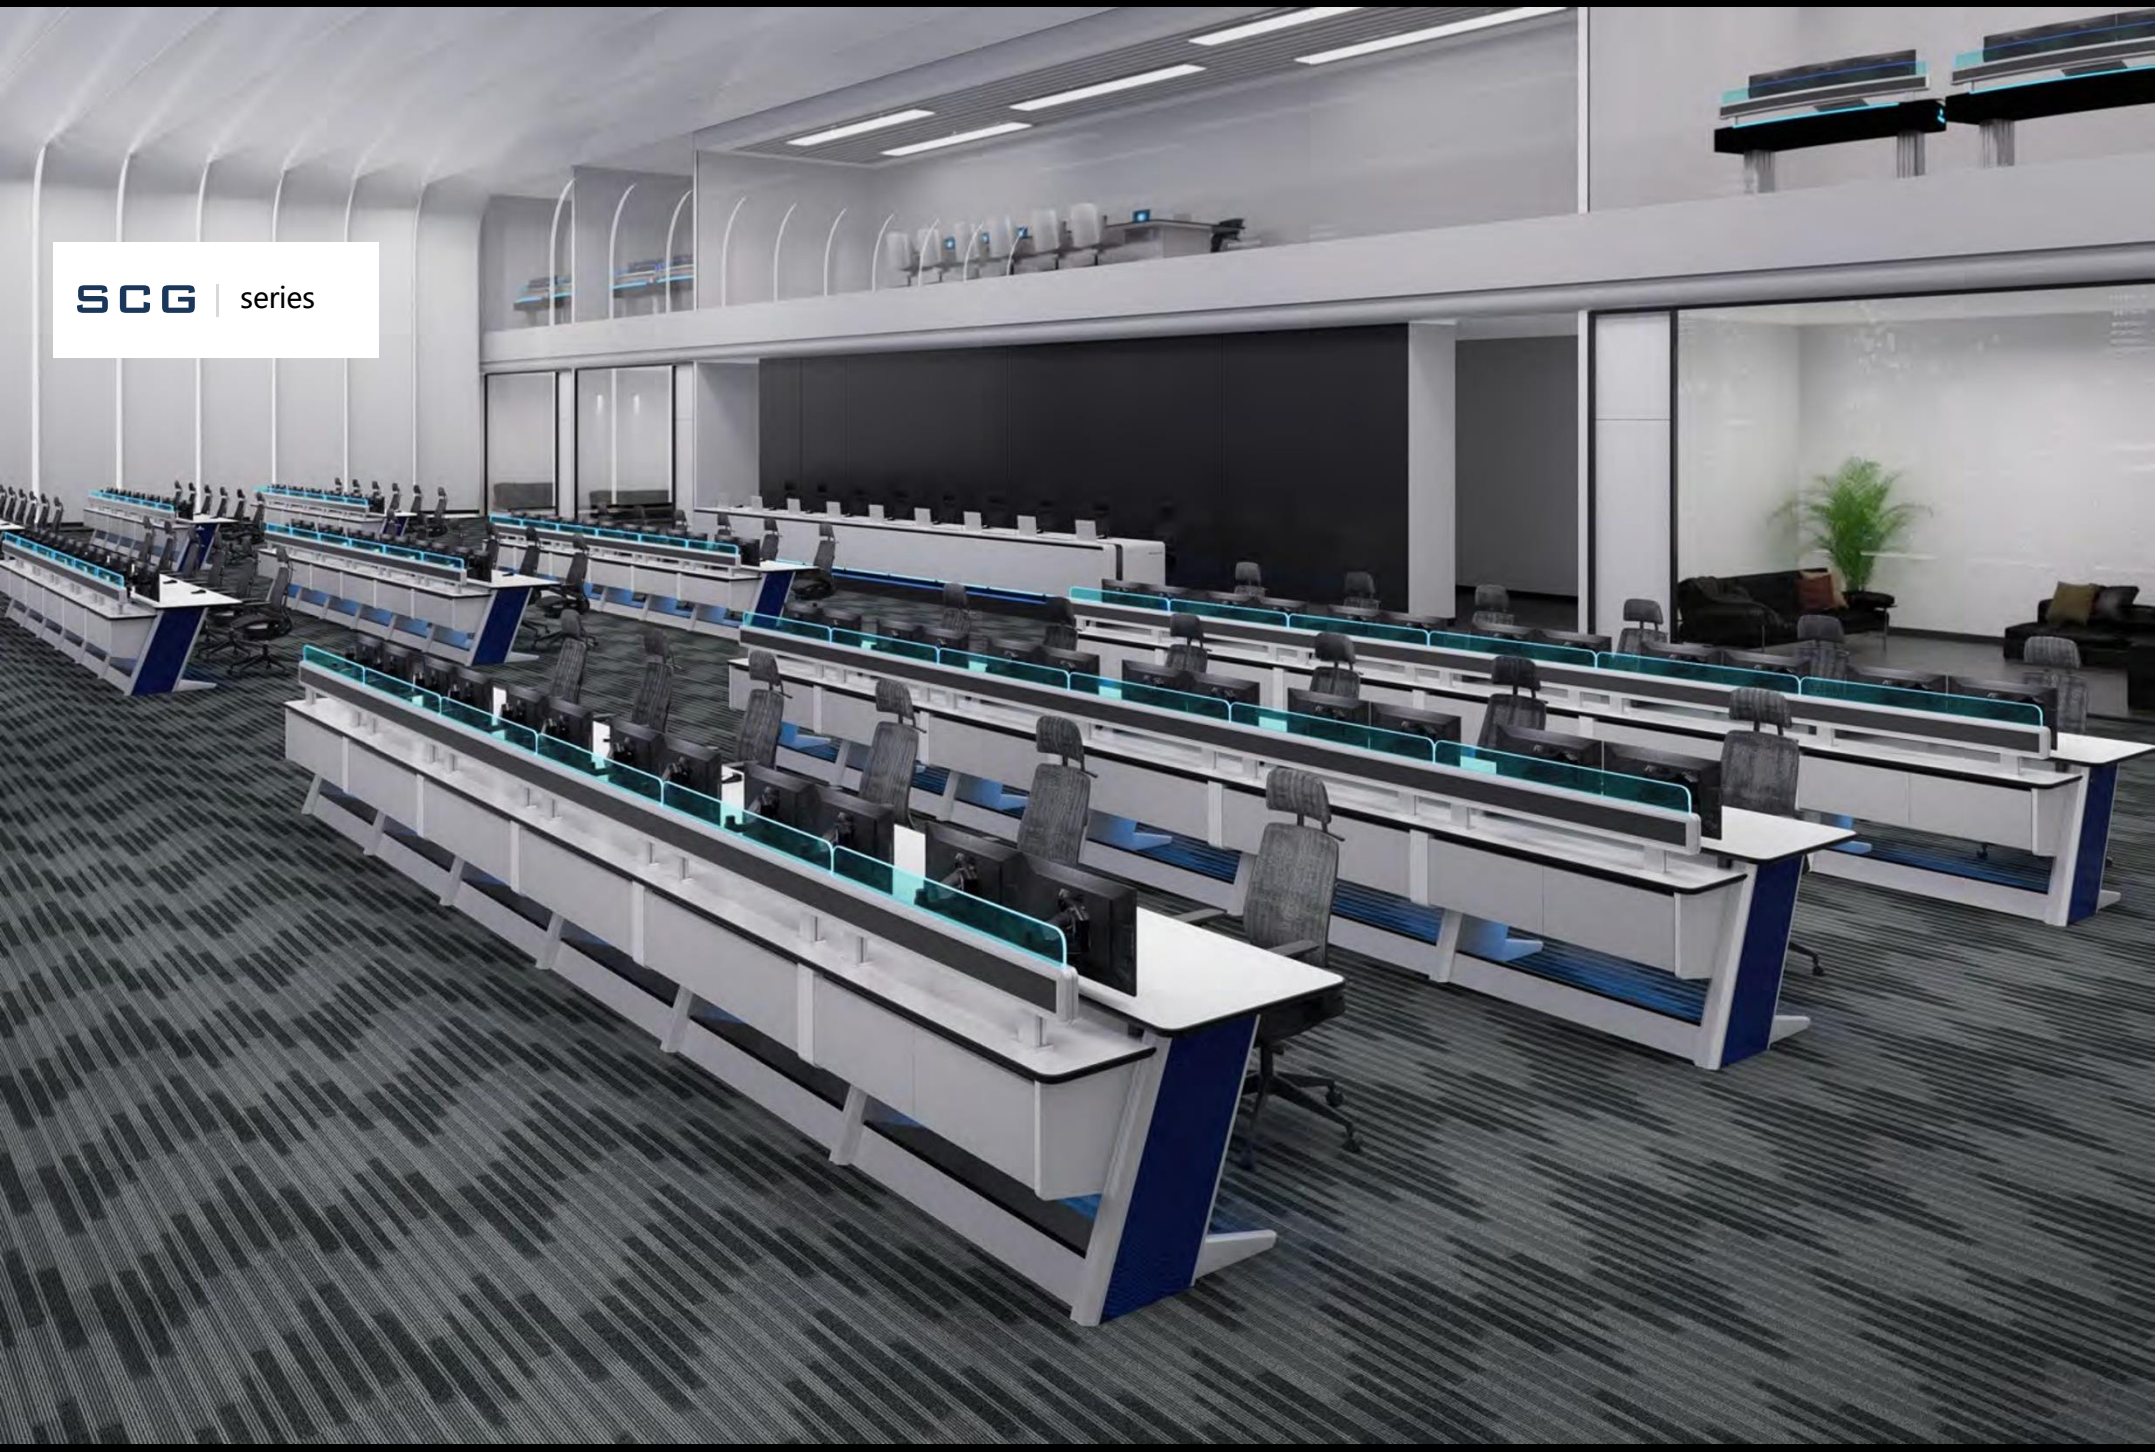
SCF-23

Screen Type:

Intelligent lift

SCF-23

- High strength aluminum profile frame system
- Independent electric double lift control system for front and rear desktops
- Environmental protection HPL decorative panel
- Professional large capacity strong and weak electrical cable management
- Aluminum screen + luminous acrylic plate
- Equipped with ground atmosphere lighting system
- Large size of bottom cabinet space
- Modular quick-pack design
- Natural cooling channel design
- Custom side panel light up logo
- Surface friendly powder coating.



SCG | series

SCG-23

Screen Type:

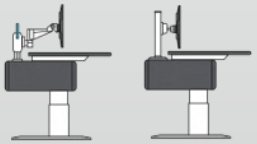
SCG-23

- High strength aluminum profile frame system
- Environmental protection HPL decorative panel
- Professional large capacity strong and weak electrical cable management
- Aluminum screen + luminous acrylic plate
- Equipped with ground atmosphere lighting system
- Easy to maintain host tray design
- Modular quick-pack design
- Natural cooling channel design
- Custom side panel light up logo
- Surface friendly powder coating.

SCH | series

SCH-23

Screen Type:

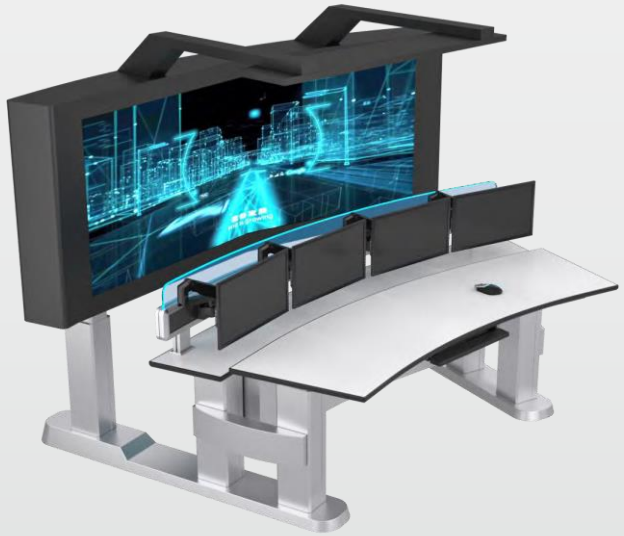


Intelligent lift

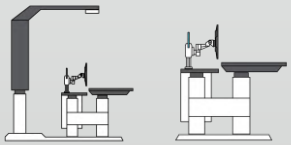
SCH-
23

- High strength aluminum profile frame system
- Large load-bearing 2000N lifting system
- Environmental protection HPL decorative panel
- Professional large capacity strong and weak electrical cable management
- Aluminum screen + luminous acrylic plate
- Easy to maintain host tray design
- 2 sets of 4 "silent fan cooling design
- Custom side panel logo
- Surface friendly powder coating.

SCH-GROUP X



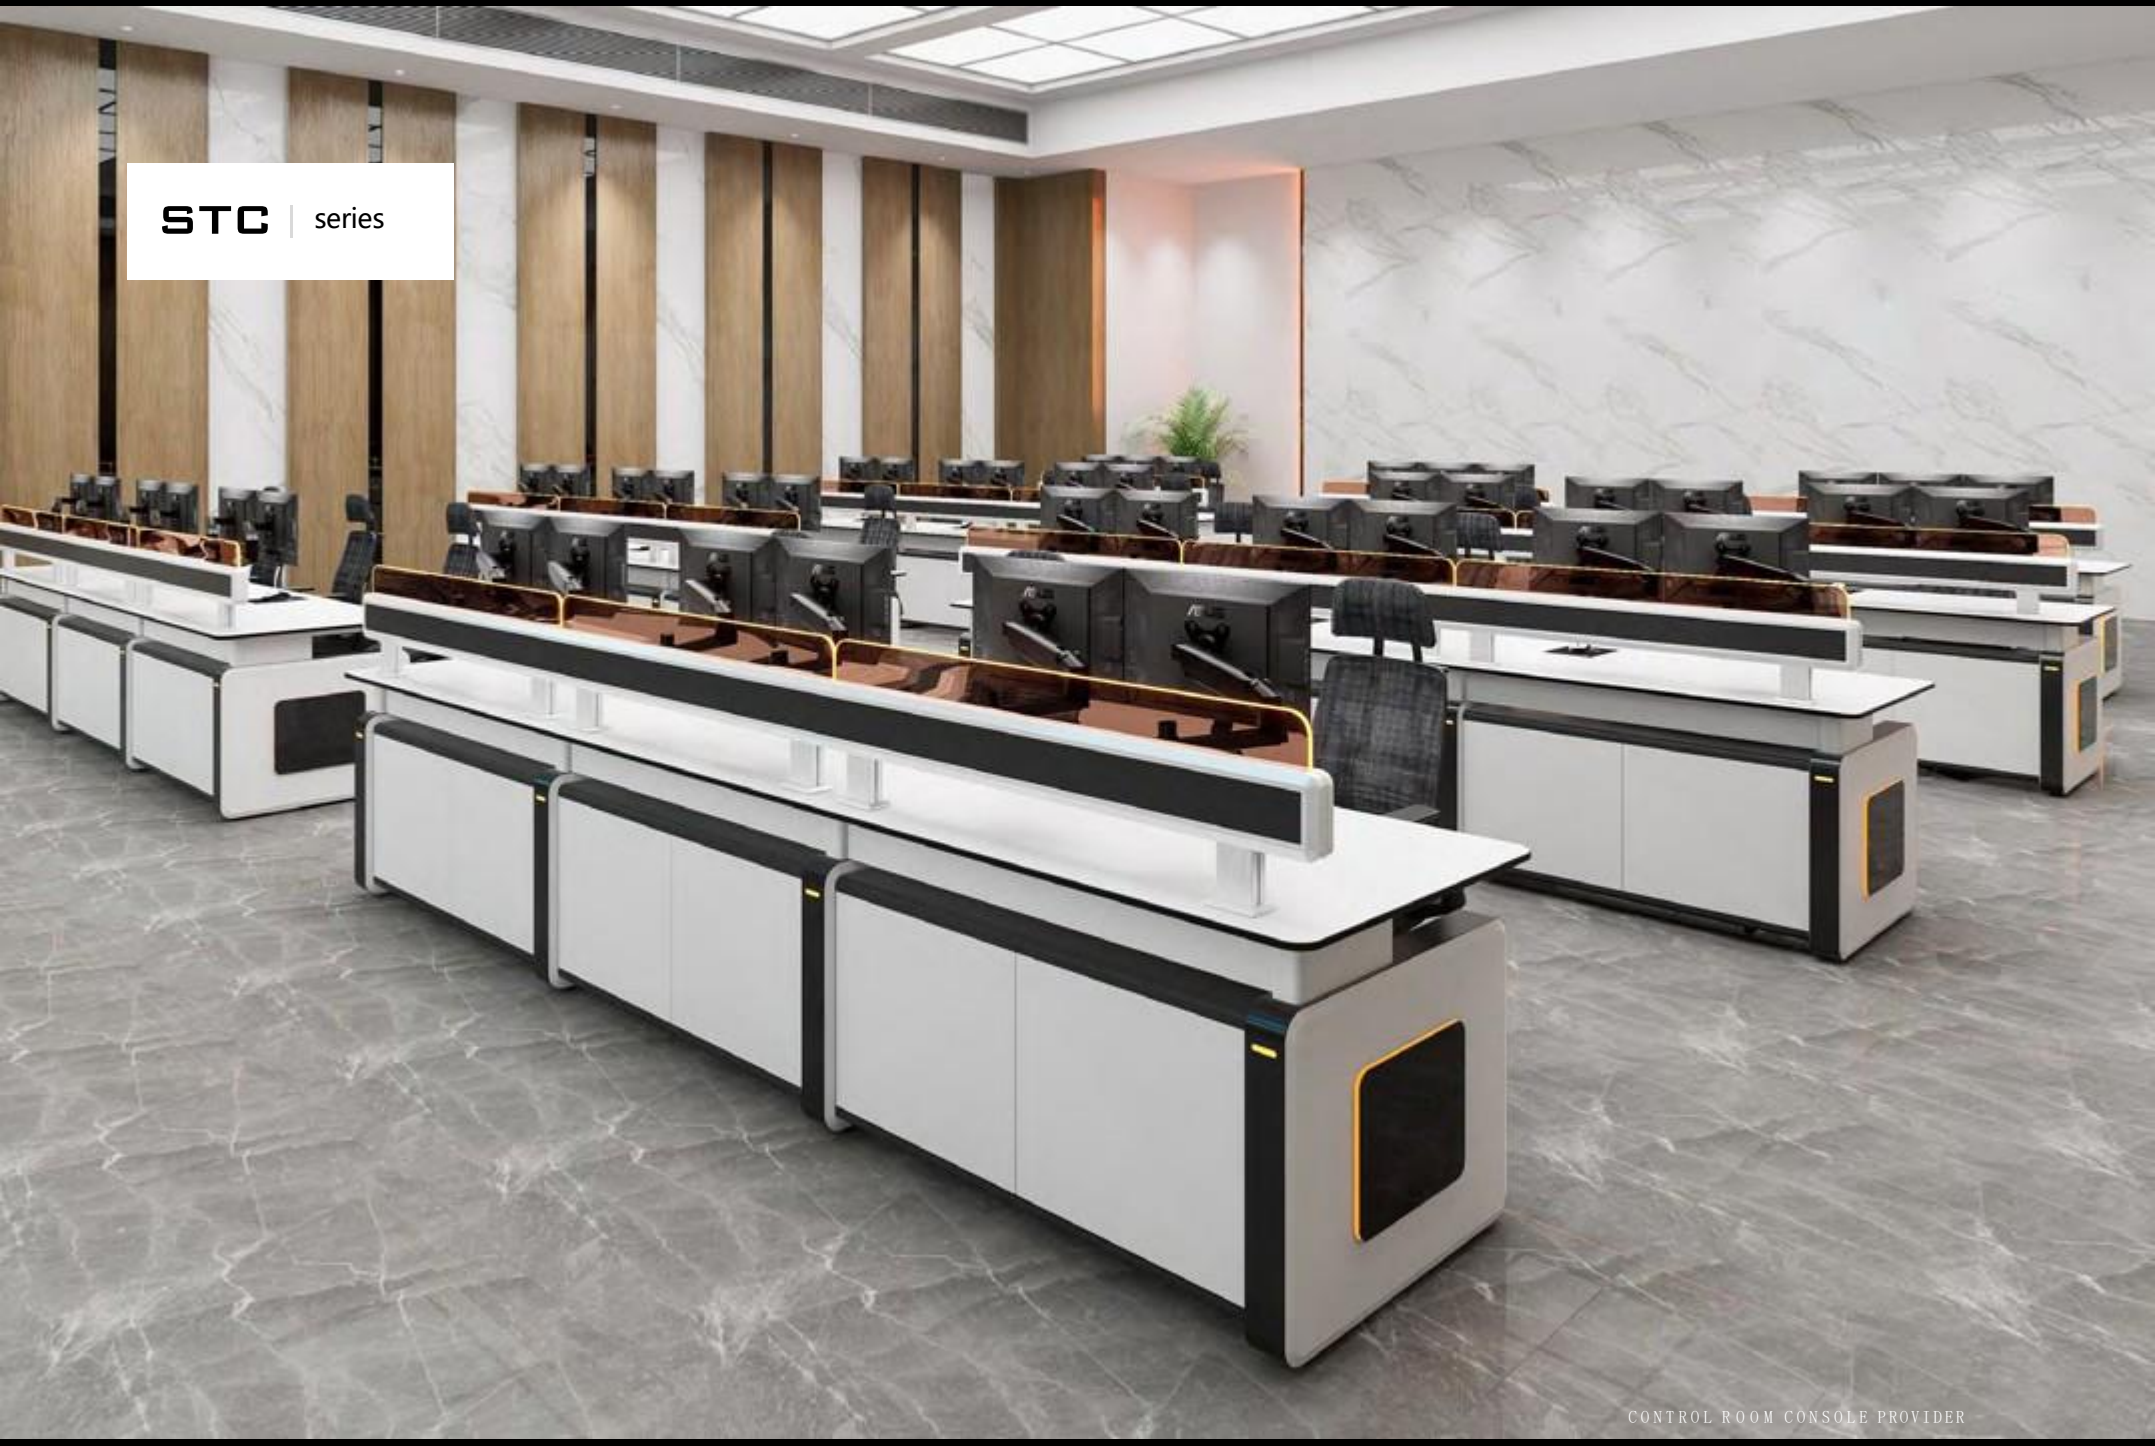
Screen Type:



Intelligent lift

SCH-GROUP X

- High strength aluminum profile frame system
- Large load-bearing 2000N front and rear independent double lifting system
- Environmental protection HPL decorative panel
- Flexible cable management
- Aluminum screen + luminous acrylic plate
- Equipped with cabinet space for 3 hosts
- Custom side panel logo
- Surface friendly powder coating.



STC | series
CONTROL ROOM CONSOLE PROVIDER

STC

Screen Type:

STC-RC (Rear Bottom Cabinet)

- High strength aluminum profile frame system
- Environmental protection HPL decorative panel
- Professional large capacity strong and weak electrical cable management
- Aluminum screen + luminous acrylic plate
- Equipped with ground atmosphere lighting system
- Large size of bottom cabinet space
- Modular quick-pack design
- Natural cooling channel design
- Custom side panel light up logo
- Surface friendly powder coating

STC

Screen Type:

STC-BL, STC-SC (Bottomless/Side Cabinet)

- High strength aluminum profile frame system
- Environmental protection HPL decorative panel
- Professional large capacity strong and weak electrical cable management
- Aluminum screen + luminous acrylic plate
- Equipped with ground atmosphere lighting system
- Large size of bottom cabinet space
- Modular quick-pack design
- Natural cooling channel design
- Custom side panel light up logo
- Surface friendly powder coating

STC-BL

STC-SC

STC

Screen Type:

STC-HA (Height Adjustable)

- High strength aluminum profile fra system
- Environmental protection HPL decorative panel
- Professional large capacity strong and wea electrical cable management
- Aluminum screen + luminous acrylic plate
- Equipped with ground atmosphere lighting system
- Large size of bottom cabinet space
- Modular quick-pack design
- Natural cooling channel design
- Custom side panel light up logo
- Surface friendly powder coating.

STH | series

STH

Screen Type:

STH-A

- Front and rear desktop independent dual lift control system
- Environmental protection HPL decorative panel
- Flexible cable management
- Extended leg room
- Flexible external host design
- Overall movable castor design
- Custom side panel light up logo
- Surface friendly powder coating

STL | series

SMA | SMB | SMH | SMV | SMX

SMX | series

SMX

Intelligent lift

SMX

- Large load-bearing 2000N electric lifting system
- Support 75-100 "TV Angle electric flip system
- Wired and wireless synchronous control scheme
- Flexible cable management
- Equipped with ground atmosphere lighting system
- Cabinet space for 2 hosts, extended leg room
- Natural cooling channel design
- Surface friendly powder coating.

SMA | series

SMA

SMA

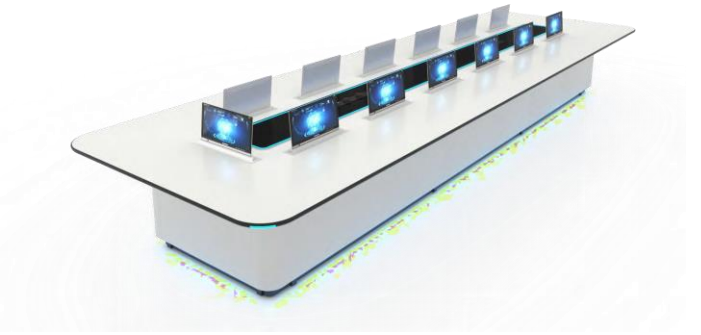
- High strength aluminum profile frame system
- Environmental protection HPL decorative panel
- Modular quick-pack design
- Custom side panel light up logo
- Surface friendly powder coating.

SMB | series

SMB

SMB

- High strength aluminum profile frame system
- Environmental protection HPL decorative panel
- Professional large capacity strong and weak electrical cable management
- Equipped with ground atmosphere lighting system
- Large size of bottom cabinet space
- Modular quick-pack design
- Natural cooling channel design
- Custom side panel light up logo
- Surface friendly powder coating.



SMH series

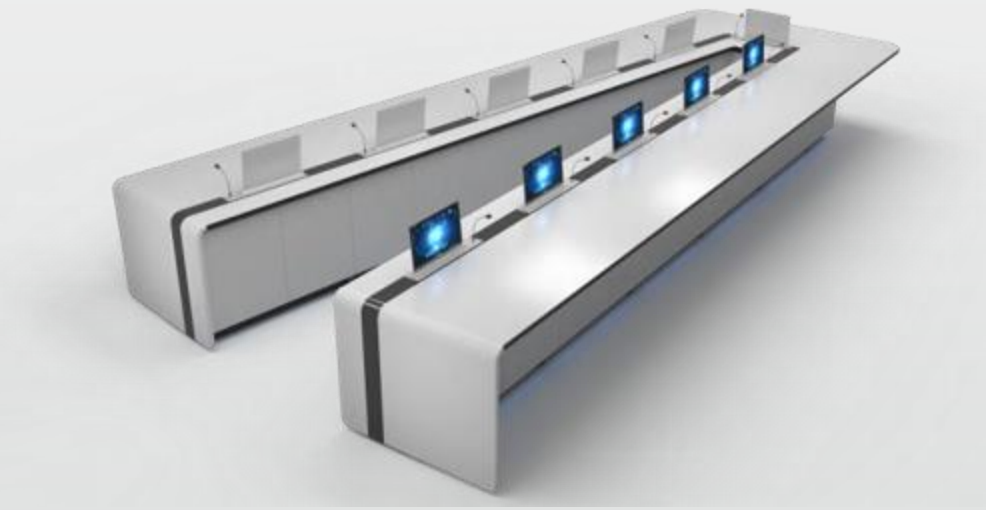
SMH

SMH

- High strength aluminum profile frame system
- Environmental protection HPL decorative panel
- Professional large capacity strong and weak electrical cable management
- Can support 55-75 "TV lift adjustment design
- Custom side panel light up logo
- Surface friendly powder coating.

SMV series

SMV



SMV

- High strength aluminum profile frame system
- Environmental protection HPL decorative panel
- Professional large capacity strong and weak electrical cable management
- Aluminum screen + luminous acrylic plate
- Equipped with ground atmosphere lighting system
- Large size of bottom cabinet space
- Modular quick-pack design
- Natural cooling channel design
- Custom side panel light up logo
- Surface friendly powder coating.

PRODUCT ADVANTAGE

Twenty years of industry experience, 130,000 square meters of manufacturing base, strong manufacturing capacity, ensuring high quality timely production

High Tech and quality assurance

Use of innovative technologies and quality product design coupled with the latest product quality control system, adhering to the highest quality standards

The whole process of environmental protection

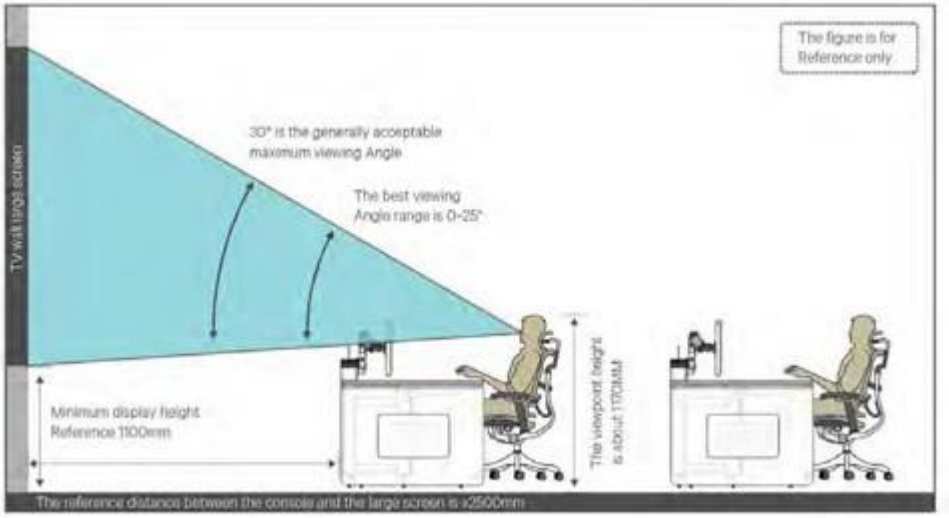
From raw materials to each processing link, environmentally friendly materials and processes are used, veritable aldehyde-free, non-toxic products, protect health and ensure safe use.

High strength frame system

Use of advanced high-strength aviation aluminum to build a durable frame system with very high load-bearing strength and deformation resistance to ensure product lifetime and reliability for more than 10 years

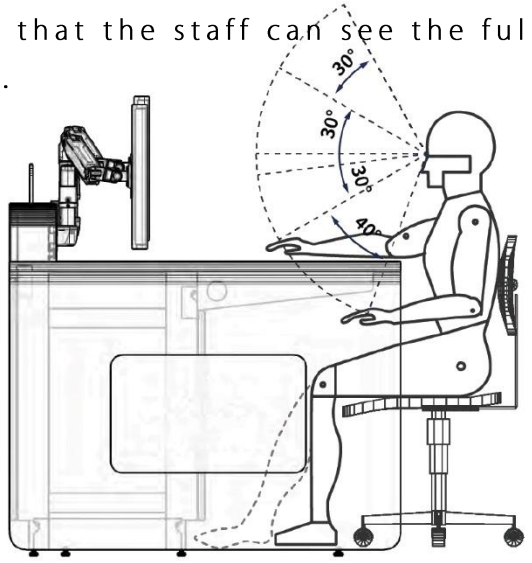
Certifications: ISO9001, ISO14001, ISO27001 and other management systems, products through CMA, SGS, CE, ROHS, BIFMA, and other international certification.

Silex follows the world recognized standards, fully considers the visual distance, perspective, equipment and other factors, to achieve the perfect mix of engineering, design, wellness and better comfort



Visual relationship between console and large screen (for reference only)

- Respect the operator's up and down, left and right and line of sight distance.
- The operating distance is designed according to reasonable comfortable distance.
- Help customers analyze the best viewing distance for the large screen and the reasonable arrangement of the console to ensure that the staff can see the full screen.



The console provides the ideal workspace for the user (for reference only)

Visual ergonomic design
Efficient and comfortable office

Silex applies ergonomics to optimize the equipment and functions based on the basic functions and performance of the original design of the console according to the scope of the staff's movements and activities, the physiological structure of the human body, psychological conditions, ways of thinking, etc., so that the workers are very convenient and comfortable in both visit and use.
