SILEX
Innovation, beyond imagination
SMART CONTROL ROOMS
NOCS & SOCS

Features:

1. Slat wall

Slat wall for monitor arms

2. Storage for CPUs with front and rear doors

Closed bottom cabinet space, to meet the placement of 2 CPUs

3. LED glow side panel

Logo and color optional

4. Acrylic slat wall

Luminous acrylic panels, led strip light in it,colour can be optional

5. Siding keyboard

High quality cold rolled steel and front PVC hand pillow can effectively reduce work fatigue.Pull - out design, convenient and smooth

6. Cable entry on the worksurface

Hidden type outlet, many models can be selected, also can be selected with a desktop socket

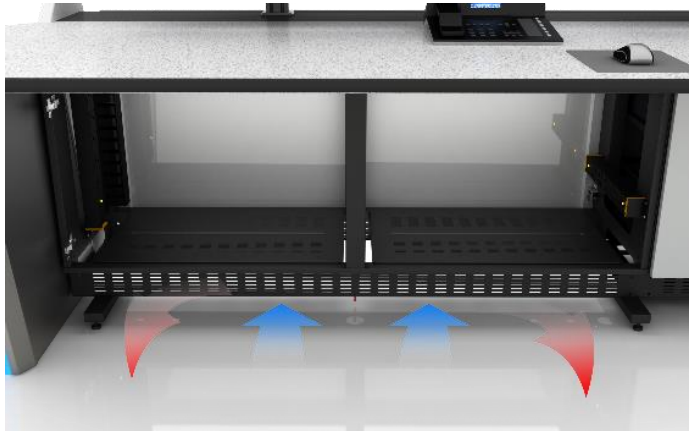
7. Rear doors

The anti-pinch function of the cushioning hinge makes the door more convenient to use and maintain.

SILEX

With slat wall+acrylic

Without acrylic



The ventilation air flow is arranged to enter through the bottom of the console. After the internal natural circulation, it is located on the desk according to the principle of exchange of air flow. The design of air holes can get a good heat dissipation effect.

Sh-abc hinge buffer is installed with high quality cold-rolled steel plate. It has mute and bufferingf function, providing an effective warranty for your subsequent maintenance.

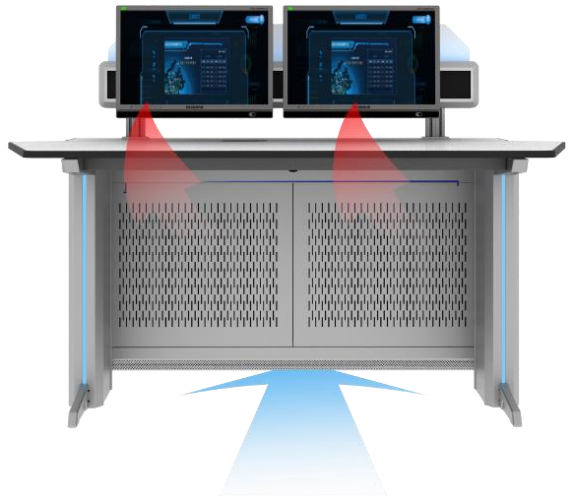
Hidden type outlet, many models can be selected, also can be selected with a desktop socket

7. Rear doors

The anti-pinch function of the cushioning hinge makes the door more convenient to use and maintain.

With slat wall + acrylic

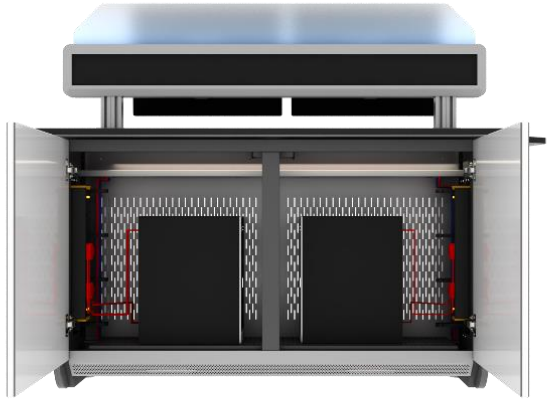
Without slat wall



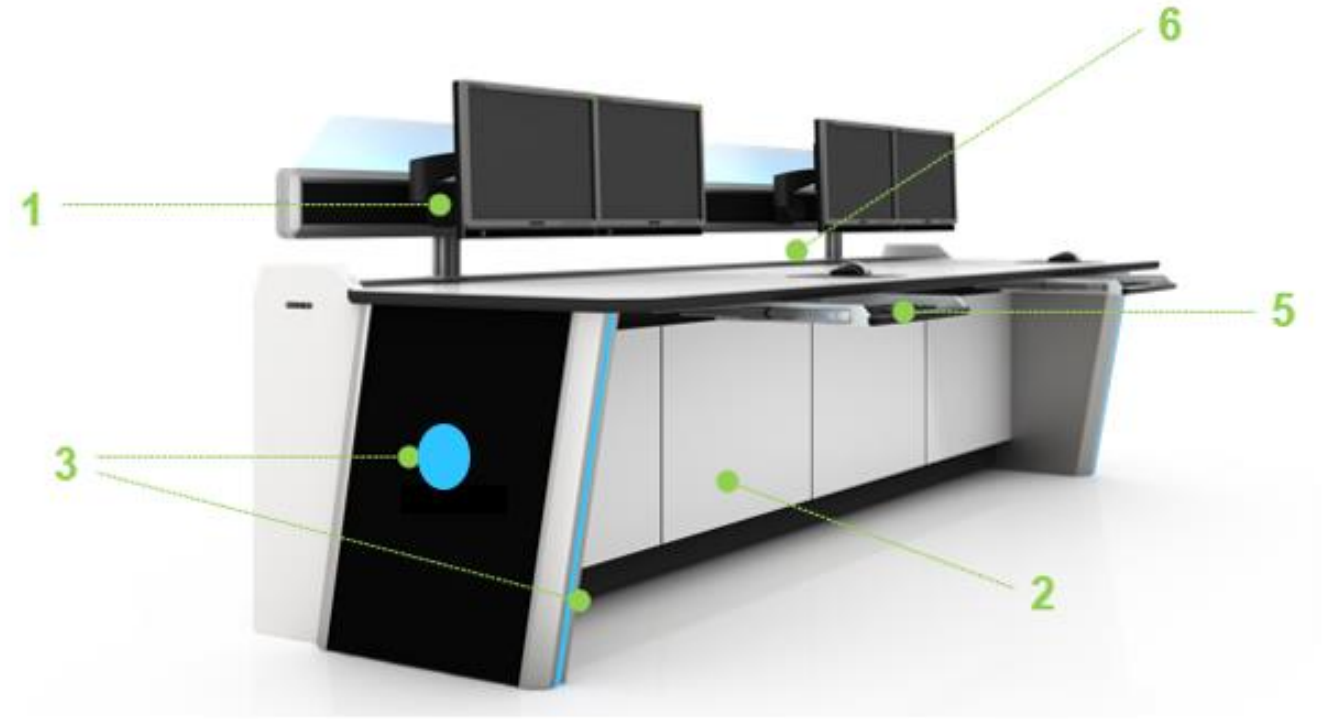
The ventilation air flow is arranged to enter through the bottom of the console. After the internal natural circulation, it is located on the desk according to the principle of exchange of air flow. The design of air holes can get a good heat dissipation effect.

SILEX

Large space for legs
the wider movement design for legs, the operator can operate roomily and be convenient The anti-kick design of the bottom cabinet makes your legs more comfortable。



sh-abc hinge buffer is installed with high quality cold-rolled steel plate. It has mute and bufferingf function, providing an effective warranty for your subsequent maintenance.



Features

1. Multifunctional slat wall

The hidden hanging slot can fix the display bracket and PDU and other multi-functional components

2. Storage for CPUs

Closed bottom cabinet space, to meet the placement of 2 CPUs

3. LED glow side panel

Logo and color optional

4. Acrylic slat wall

Luminous acrylic panels, led strip light can be optional

5. Siding keyboard

High quality cold rolled steel and front PVC hand pillow can effectively reduce work fatigue.Pull - out design, convenient and smooth

6. Cable entry on the worksurface

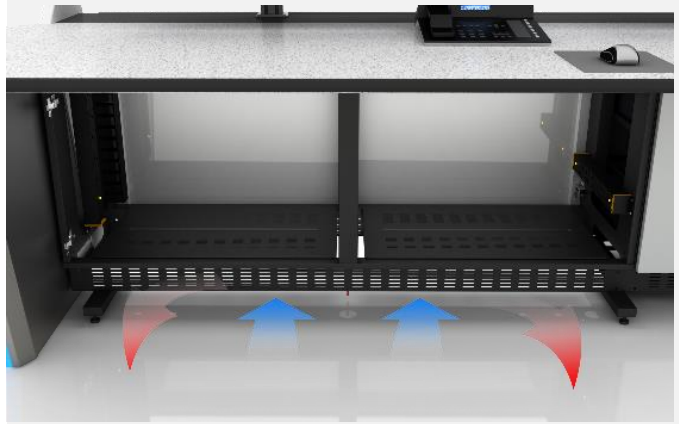
Hidden type outlet, many models can be selected, also can be selected with a desktop socket

7. Front Rear doors

The anti-pinch function of the cushioning hinge makes the door more convenient to use and maintain.

With slat wall +acrylic

Sh-abc hinge buffer is installed with high quality cold-rolled steel plate. It has mute and bufferingf function, providing an effective warranty for your subsequent maintenance.



The ventilation air flow is arranged to enter through the bottom of the console. After the internal natural circulation, it is located on the desk according to the principle of exchange of air flow. The design of air holes can get a good heat dissipation effect.

Large space for CPU
Perfect cable management design, large cpus storage space, suitable for a variety of equipment.

Features

1. Multifunctional monitor stand

High - strength multi -monitor stand ,, multi - Angle adjustable.

2. Siding keyboard

High quality cold rolled steel and front PVC hand pillow can effectively reduce work fatigue.Pull - out design, convenient and smooth

3. End panels

End plate can be customized 。 wooden,metal or acrylic

4. Sliding CPU tray

Thes sliding CPU tray， Convenient installation and maintenance of CPU and other equipment

5. Cable chain

Cable chain, rise and fall with the desktop, effectively protect the cable

6. Cable entry on the worksurface

Hidden type outlet, many models can be selected, also can be selected with a desktop socket

7. Electric lifting column

With super stability, noiseless operation

8. Front&Rear doors

The anti-pinch function of the cushioning hinge makes the door more convenient to use and maintain.

Fixed height

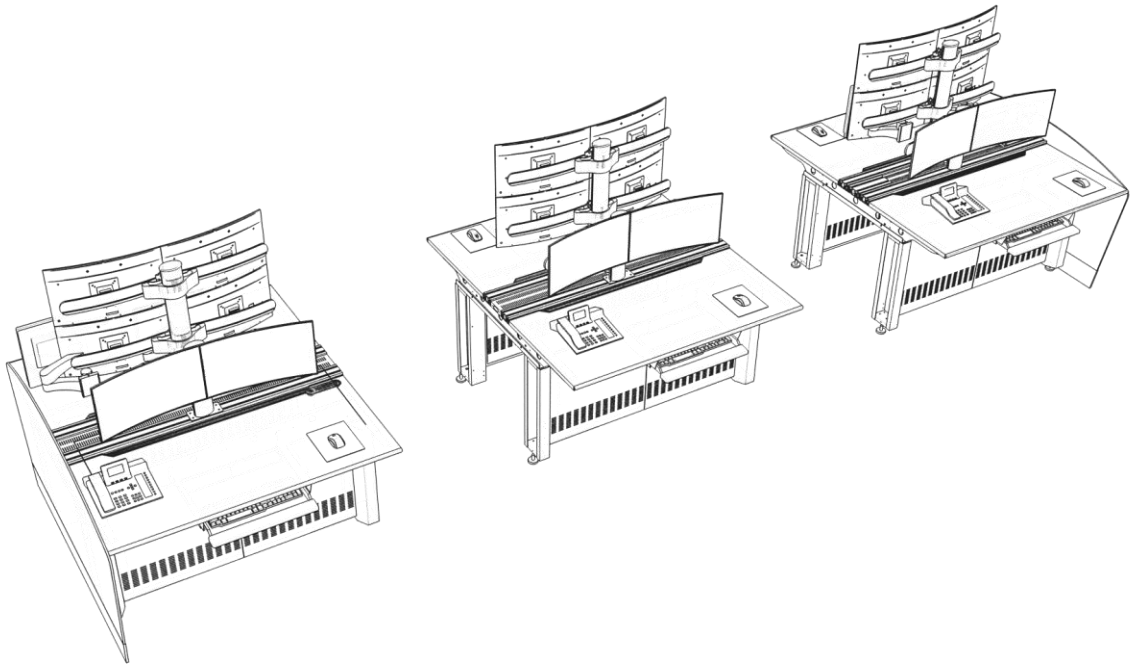
The ventilation air flow is arranged to enter through the bottom of the console. After the internal natural circulation, it is located on the desk according to the principle of exchange of air flow. The design of air holes can get a good heat dissipation effect.

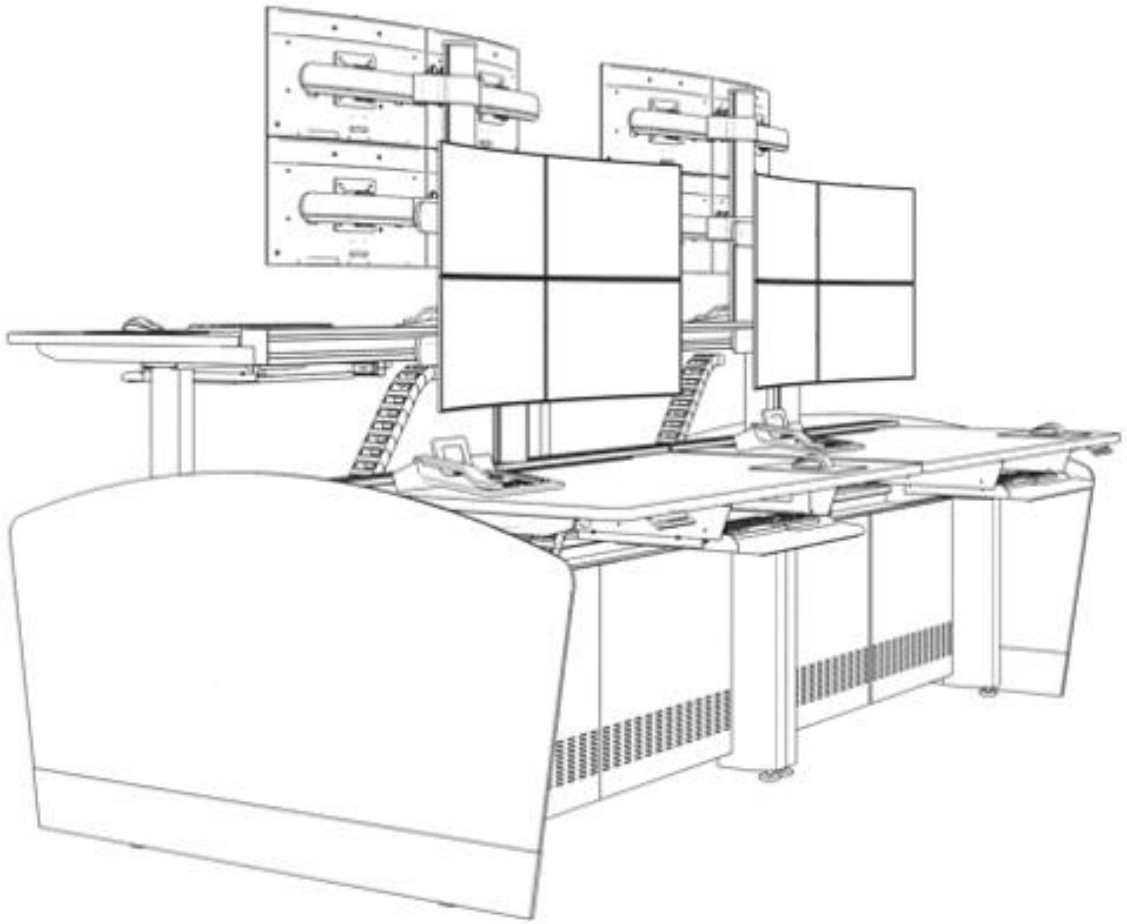
Large space for CPU
Perfect cable management design, large CPUs storage space, suitable for a variety of equipments.

Motorized adjustment

Sh-abc hinge buffer is installed with high quality cold-rolled steel plate. It has mute and bufferingf function, providing an effective warranty for your subsequent maintenance.

End panels
End plate can be customized, wooden, metal or acrylic





DIMENSION LIST

MODEL	HEIGHT	WIDTH	DEPTH
SCE (fixed height)	750mm	1600	900
SCE (motorized adjustment)	750-1250mmm	1600	900

SILEX

SILEX

Features

1. Decorate slat wall

Acrylic plate - transparent, matte or tan optional

2. Movable CPU cabinet

With mute casters, front and rear doors can be opened, excellent internal heat dissipation, with threading holes at the bottom, to meet the placement of 1 or 2 CPUs

3. Side panel

Logo and color optional

4. Worktop/worksurface

25mm thick aminate melamine chipboard with Polyurethane edging

5. Siding keyboard

High quality cold rolled steel and front PVC hand pillow can effectively reduce work fatigue.Pull - out design, convenient and smooth

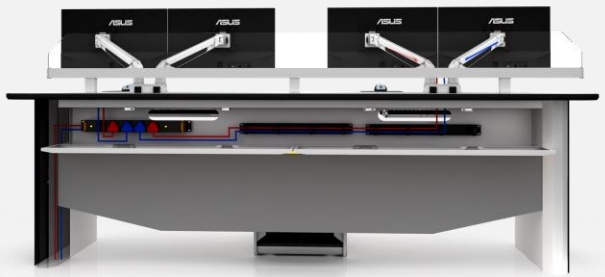
6. Cable management

Convenient access for cables, can be opened, convenient maintenance and wiring

7. Rear protect panel

With CPU cabinet

With CPU holder



Cable management
Convenient access for cables, can be opened, convenient maintenance and wiring

CPU cabinet & CPU hoder
The former is beautiful and convenient, the latter is light and economical, the customer can choose one according to the actual demand

End panels
Both end panels can be customized for luminous signs.The latter is more suitable for small machine room and control room
。

Meeting Tables

Specifications:

- Metal base/Frame and legs .
- Worktop/worksurface:25mm thick aminate melamine chipboard with Polyurethane edging
- Bottom cabinet: Universal lockable Front & rear doors
- Metal base(under the doors) with ventilation hole
- With intergrated wire management system (cable tray)for power and data
- Shared CPU(equipments) storage cabinet

Meeting Tables

Specifications:

- Metal base/Frame and legs
- Worktop/worksurface: 25mm thick aminate melamine chipboard with Polyurethane edging
- Support legs with integrated wire management system (cable tray)for power and data
- Without CPU (equipment) storage cabinet
