

Cybereason - Setting up Exclusions

If you use Cybereason, you should configure the required exclusions to ensure that the Cymulate agent can run properly.

The following folder paths and their sub-folders should be excluded/whitelisted:

Windows OS

- C:\Program Files\Cymulate\Agent**
- C:\ProgramData\Cymulate\Agent**

Mac OS

Cymulate Agent must be installed and run with root privileges.

- /Applications/Cymulate/Agent
- /Users/Shared/Cymulate/Agent

Linux OS

Cymulate Agent must be installed and run with root privileges.

- /usr/lib/Cymulate/Agent/
- /usr/share/Cymulate/Agent/

Adding exclusions in Cybereason:

1. Log in to the Cybereason console.
2. In the left navigation pane, select **System**.

3. Select the **Policies management** tab.

4. Select the relevant policy (or create a new policy if necessary).

Policy name	Description	Created by	Creation time	Last edited by	Last edited time	Assigned sensors	Non compliant sensors	Policy ID
Default	This policy holds the system default policy	Admin	March 3, 2022 at ...			23	5	81ae6eb3-2491-4249-88...

5. In the left navigation pane, select **Anti-Malware** and scroll down to **Exclusions**.
6. . Click **+ Add New** and enter the relevant paths (see the paths for exclusion in the beginning of this article).

File/folder name	Description	Modified by	Last modified
C:\Program Files\Cymulate\Agent**		om	Aug 28, 2023
C:\ProgramData\Cymulate\Agent**		om	Aug 28, 2023

7. Click **Save & Publish**.
8. Click the menu icon to open the left navigation pane and select **System**.
9. Select the **Sensors** tab.
10. Select the sensors (machines) to apply the policy with the exclusions.
