

 **GREATNESS WINS**
GOLF

It all started with a conversation about the current state of athletic apparel. Navigating this saturated market, one major question kept coming up: what happened to the 'sport' in sportswear? Quality and durability are questionable with many athletic brands, while the focus of athleisure is more on fashion than fitness.

The industry has forgotten its most important players: athletes. Athletes of all kinds, shapes and sizes. The professional athlete, the intense athlete and the casual athlete. It's not important how celebrated of an athlete you are. What is important is when you're making an athletic move, big or small, you're wearing the apparel that will benefit you the most. Greatness Wins saw there's a need for something better. All athletes deserve something better, and we're stepping up to the plate.

Born from a desire for high quality, great fitting athletic wear we just weren't seeing on the market, Greatness Wins is a curated collection of premium performance apparel.

Greatness Wins is more than a name. It's our founding principle and philosophy. It means doing everything possible to achieve a dream—and then going way above and beyond that. It's about innate drive to propel past those first successes and remain motivated to succeed over and over again. What separates good from greatness is the ability to stand the test of time ... to shape the game and how it's played, forever.

We won't deliver anything less than great.

To Order:
support@greatnesswins.com

- 

Brand new addition
- 

Prior season addition
- 

bluesign®: the highest standard in the textile industry for chemical management to ensure environmental health and safety of workers and wearers.
- 

Global Recycled Standard (GRS): The aim of the Global Recycled Standard (GRS) is to increase the use of recycled materials.
- 

Durable Water Repellent (DWR): Resistant to penetration by water foils but not entirely waterproof. We no longer use C8 tech and only use C6/C4 when the garment needs it.
- 

Quick Dry: Water resistant, these products keep moisture on the fabric's surface making it easy for the sun and/or air to lift moisture out and promote evaporation.
- 

Stretch: Stretch fabrication extends, expands and contracts to move with you allowing for ultimate flexibility during any sport, activity or movement.
- 

Moisture Wicking: Moisture management fabrics wick perspiration moisture from the inside out.
- 

Recycled Poly: Often called rPet, is made from recycled plastic bottles. It is a great way to divert plastic from our landfills. The production of recycled polyester requires fewer resources than that of new fibers and generates fewer CO2 emissions.
- 

UPF (Ultraviolet Protection Factor): The protection given to the skin by a fabric is indicated by its UPF. Specifically designed to block the sun's harmful UV radiation from damaging the skin (widely known as UVA/UVB/UVC rays).
- 

Waterproof: Waterproof fabrics resist liquid water passing through, blocks out rain and snow, while allowing sweat to evaporate out.
