

WAMSA Core Model

WAMSA Systems Change Proposal

Large-Scale Outcomes

- Health**
 - Improved health of local communities from nutritionally diverse diets:
 - Reduced rates of child stunting and wasting
 - Reduced rates of anemia and maternal mortality
- Education**
 - WAMSA implementation throughout the established network of Don Bosco Technical Schools
 - Certification upon graduation
 - On-going capacity building with advanced technology at WATDR¹
- Economic Opportunity**
 - Government support via land investment and policy changes adopting WAMSA's core model
 - Job placement and income-generating opportunities for certified graduates

WAMSA Expansion with Funding Sources:

- = Water 4 Mercy funding (present day)
- = Impact Investment funding (yrs 1-5)
- = Self-sustainability/large-scale expansion (yrs 5+)
- = Don Bosco Technical Schools²

¹see Knowledge Development; ² Expansion sites subject to change

- 5 W's of WaMSA
- Water 4 Mercy Schools of Agriculture
- Maseya Village
- 3,758 people
- Student Ambassador Program

Where: [Don Bosco Technical Institute in Dodoma, Tanzania](#) now; immediate expansion of WaMSA outreach programs and extension services. Continued growth and scale-up to other locations throughout Africa.

When: October 2020 in Dodoma, TZ with systematic growth of multiple [WaMSA](#) sites and additional program components.

[Contact us](#) for Impact Investment opportunities or to participate in our 'Professional Leadership Exchange Program'.

****Maseya Village** - 3,758 people**

Maseya Village

We are happy to share that Maseya Village was surveyed this week and it was decided to adopt this village located in Dodoma Region, Tanzania. The 3,758 Maseya Villagers were

so excited to see our partner [Innovation: Africa's](#) local team arrive to quickly begin work and bring them access to clean water! Maseya will replace Mayeto Village, as the government decided to bring water to Mayeto Village independently.

Drilling will begin soon as we continue our [\\$25,000 Matching Challenge](#) for Human Dignity. Stay tuned for updates.

This is Janeth, a five year old girl who accompanies her mother to fetch water daily.

Collected drinking water for Maseya Villagers

Maseya Village community members currently hand-digging small holes in dry riverbeds in search of water.

skills
useful
for
life
after
graduation

Our ambassadors 'hit the ground running' and spent over one week sorting brand new Nilla Shields designer clothing donated by [ReLoved Resale](#). We plan to sell the 35,000 sorted items, with the proceeds to benefit WaMSA's projects in Dodoma. Now our leadership team is diligently working on setting up our new WaMSA social media accounts linked to our 'soon to be launched' [WaMSA.org](#) website. Student Exchange Program opportunities are being explored for the summer of 2021.

[Contact us](#) for more information.

For details on how your group can support Water 4 Mercy, or to schedule a Speaking Engagement for your organization, [email](#), call 727.439.4222 or visit our [newly updated website](#).

Water 4 Mercy is a 501(c)(3) and relies on your generous gifts to continue reaching people who are dying of thirst and hunger in Africa.

Checks to 'Water 4 Mercy' can be mailed to:
3026 Oakmont Drive, Clearwater, FL 33761

Upholding Human Dignity
WATER 4 MERCY

Permanently ending the vicious cycle of poverty in Africa with life-giving water and drip irrigation farming

In Africa over 1.8 billion people use a contaminated source of drinking water. Land has turned to desert and people are struggling to find water to drink or use for farming.

With our sustainable solution, each community is involved at every step of the decision making process.

The only water found is contaminated with feces causing families to suffer from water-borne diseases and parasites.

Villagers work alongside our project managers digging trenches and laying the foundation for the water towers.

Some drink the blood of animals to avoid dying of thirst.

When water flows, hope is restored and self-worth realized.

Our implemented systems are remotely monitored and are 100% successful.

Without water, many have lost all hope to provide for their families.

Water 4 Mercy uplifts dignity with clean water and a means of livelihood

Transforming our world with clean life-giving water and innovative agricultural solutions
