

Who We Are

WaMSA is a game changing, agricultural school that seeks to train and develop a new generation of agronomists and growers, provide extension services and build the agricultural capacity of the region.

Don Bosco Technical Institute, Africa: A network of 102 Technical Institutes (TVETs) located in 36 African countries that provides a practical skills and education for at risk youth.

Water 4 Mercy is a USA based NGO supporting and developing sustainable, innovative water and agricultural solutions

CultivAid is an Israeli NGO specializing in capacity building and knowledge development in agricultural and water sectors.

Innovation Africa is a non-profit with the mission to bring Israeli solar, water and agricultural technologies to rural African villages

The Optimal Solution!

WaMSA combines Israeli technology with the development of professionals emphasizing long term sustainability.

WaMSA aims to catalyze private sector development through the training of technical experts to make sure investments work.

WAMSA is designed to be replicable and scalable throughout Africa and aims to transform and optimize the water/agricultural sectors through capacity building, logistics and investments.

The Water 4 Mercy School of Agriculture

Food and nutrition security are under growing stress, a consequence of population growth, urbanization, higher living standards, increasing demand for agricultural production and climate change.

WAMSA seeks to train and develop a new generation of agronomists and growers in order to catalyze agricultural transformation. The schools will provide and establish:

WAMSA was established by Water4Mercy through a unique partnership with Israeli NGOs, CultivAid and Innovation Africa and with the Don Bosco Technical Institute

“If you think in terms of a year, plant a seed; if in terms of ten years, plant trees; if in terms of 100 years, educate.” Confucius

Training, Demonstration and Research Site

A 6-acre (~2.5 hectare) site is the base for the school’s horticulture trainings program. The site will be equipped with:

-  **Drip and Sprinkler irrigation**
-  **Vegetable Production**
-  **Fruit Orchards and vineyard**
-  **Protected Agriculture**
-  **Seedling nursery**

WAMSA’s Capacity Building

unique curriculum emphasizing hands-on experience and service learning that offers:

8-month Certificate Program

3-year Degree Program

Specialized Trainings

WAMSA’s Extension Service

Agronomical and logistical support to ensure successful implementation and commercialization of the projects, such as

-  **Huzi Mango** is a 200 acre (50 ha) mango orchard operated by a local cooperative.
-  **Vineyard** production with the Hombolo farmer cooperative.
-  **Community pressurized Irrigation** – Kidoka Project
