

Our Mission

Permanently ending the vicious cycle of poverty in Africa with life-giving water and drip irrigation farming

The Need

1.8

1.8 billion people use a source of drinking water contaminated with feces

350

350 million people living in sub-Saharan Africa in need of water

15

15 laps around a football field is the average time spent walking for water

REPAIR THE WORLD

Why?

Water4Mercy brings innovative water and agricultural solutions essential for life and livelihood, thereby promoting dignity and mercy as persons of God.

Access to clean water and farming is **the answer** to providing a healthy food source and **permanently breaking the cycle of poverty** in African villages.

ONE AND DONE!

"Give a man a fish and you feed him for a day; teach a man to fish and you feed him for a lifetime."

How?

In partnering with innovation:Africa (iA), we bring advanced Israeli solar and water technologies to remote African villages.

iA accesses water that is trapped in the aquifers below the ground through solar-powered water wells.

iA's remotely monitored pumping systems provide over **20,000 liters of clean water per day per village.**

Israeli developed drip irrigation systems allow families to grow more food with less water, providing a means for **financial independence.**
