

Human Dignity For The African

WATER 4 MERCY

Permanently ending the vicious cycle of poverty in Africa with life-giving water and drip irrigation farming

In Africa over 1.8 billion people use a contaminated source of drinking water. Land has turned to desert and people are struggling to find water to drink or use for farming.

Each village community is involved at every step of the decision making process.

The only water found is contaminated with feces causing families to suffer from water-borne diseases and parasites.

Villagers work alongside our project managers digging trenches and laying the foundation for the water towers.

Some drink the blood of animals to avoid dying of thirst.

When water flows, human dignity and hope is restored.

Once proud, many Africans have lost all hope to provide for their families.

The implemented systems are remotely monitored and are **100%** successful.

Water 4 Mercy restores dignity with clean water and a means of livelihood

*“Give a man a fish and you feed him for a day.
Teach a man to fish and you feed him for a lifetime.”*

One and Done
