

Flag Anchor Pro

Quick Tips and Guide:

Installing the Flag Anchor Pro is quick and easy. Simply remove the existing rear access cover and put the Flag Anchor Pro in its place. We upgraded the O-Ring to be a bit snugger and more watertight than the original so don't be alarmed if the Flag Anchor Pro needs a bit more force to get it in place.

Another bit of advice is to tighten both set screws till they are just starting to be tight. They do not need to be overtightened. Overtightening them could cause damage to the Flag Anchor Pro.

Once you have the Flag Anchor Pro in place next you need to secure the straps in place. This can be done by either putting them on the rear grips of the seat, or by putting the straps into the LinQ support holes just aft of the rear seat. Simply pull on the lose end to tighten down the strap. Again, no need for crazy strong tension, simply pull the straps taught and you are good to go.

Attaching a camera is very easy. Simply screw any action or 360 cameras onto the camera mount and make sure it's nice and secure against the rubber padding.

Insert the flag/camera pole into the Flag Anchor Pro, tighten the set screw just enough to keep the pole from rotating.

Now you are ready to hit the water! Have fun and thanks for choosing Flag Anchor Pro!

Legal Fun:

We are not responsible for any lost cameras, should you be concerned about your camera we recommend putting a tether on your camera pole and attaching it to the ski. We have not lost our camera at all during vigorous testing however there is always a possibility of something unexpected happening.

We tested our Flag Pole with a single ply flag at speeds of up to 85 MPH. Using a heavier flag or going faster may result in a failure in the strength of the flag pole causing it to bend.

Warranty Information:

We proudly offer a 5 year warranty on our Flag Anchor Pro. To make a warranty claim please send customerservice@flaganchorpro.com an email with a copy of your purchase receipt, photos of the damaged mount, and any other information you would like to share.

The Flag/Camera Pole is the only item we do not offer a warranty on as that is made by a third party.
