NEW PRODUCTS

NEW Tile-In Disco-rectangle

Disco-rectangle emphasizes a fluid, organic aesthetic with smooth, curved contours. This design moves away from sharp angles while maintaining the structural integrity and performance of the product. Available in 10 designer finishes crafted to match other fixtures in the bathroom, it offers flexible solutions to fit any design. This tile insert drain seamlessly integrates with the surrounding shower or wet room floor for a clean visual that is simultaneously vintage yet modern.

NEW PRODUCTS

NEW Tile-In Disco-rectangle

Disco-rectangle

[DIS-koh REK-tang-gul] (noun)

A two-dimensional geometric shape constructed of a rectangle with semicircles at a pair of opposite sides.

FEATURED PRODUCTS

Elevator Drains

Evacuates water at 100 GPM

- 316L stainless steel 3mm Wedge Wire grate
- 16 gauge, 304L stainless steel channel
- 4" centered outlet
- Channel height: 3"
- Channel width: 12"

See page 197

Keep The Path Clear For Fire Safety Professionals

Prevents water from entering elevator shafts in the event of a fire or when the sprinkler system is triggered. It is typically positioned in front of the elevator door or elevator bank.

- Complies with SFFC Code, Section 511.1 for a 100 GPM flow rate
- Meets ADA and heel-proof requirements. IAPMO tested and certified to a 100 GPM flow rate
- Complies with California Building Code 3007.3 and 3008.3 and NYS Building Code 3007.3 and 3008.3
- Available in 36", 42" and 48" kits in Satin Stainless and Polished Stainless finishes
- Custom sizes available
- Elevator drain grates are removable for accessible cleaning and maintenance
- Tamper resistant fasteners and mounting anchors options available

Product Design Consultant
Gensler

FEATURED PRODUCTS

Adhesion Linear Drain

The Adhesion linear drain is inspired by the science of adhesion, where water droplets stick to a variety of surfaces to form unique patterns. To develop this abstract aquatic visual, the Gensler design team started by pouring water on a selection of luxurious surfaces to observe how the droplets moved and gathered. The modern pattern that evolved from this exploration has an even distribution of irregularity to create a look that's at once random and precise. While the connected dots are present throughout the pattern, the repeat is masked to prevent a tiling effect.

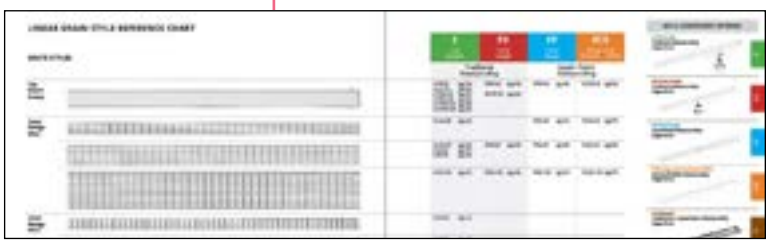
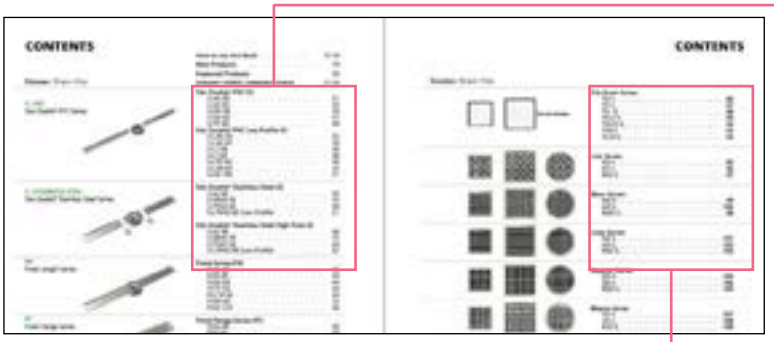
How to use this book

Sections:



The reference chart on the inside of the front cover sorts the linear drain series by grate style (shown on the left) and by waterproofing (shown on top).

The product series are listed with the page number of the product page. The product page contains the kits and list pricing associated with that series.

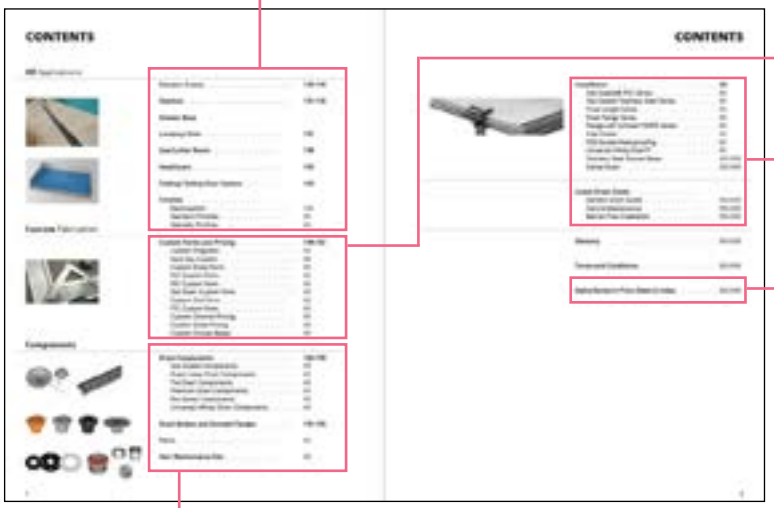


The 'Contents' pages show the series and the page number of the product pages. The linear drains are sold as kits or as components. Linear drain kits are on the product pages located near the beginning portion of the book.

Individual components of each kit are located near the back of the book in the 'Components' section.

The page references are on the left side of the product page.

The center drains are sold as strainers, kits, and components. The 'Contents' pages show the series and the page number of the product pages. The product pages show the strainers and kits. The components of each kit are located near the back of the book, in the 'Components' section, see the page references on the left side of the product page for the specific page number.



The 'All Applications' section dives into the various ways that linear drains can be used, including outdoor, sink, spas and elevator drains.

The custom section contains the details of the custom programs, sign-off sheets, and custom pricing.

Learn more about waterproofing, drain installation, and product specifications in the 'Installation' and 'Linear Drain Guide' sections.

In the last section, the SKUs are listed in alpha numberic order along with the list price, shipping dimensions, and the page number of where to find it in this book.

Individual components, drain bodies, and all other parts are listed in the 'Parts' section.

How to use this book

Product Pages:

Product pages contain product series information for linear and center drain kits with list pricing.

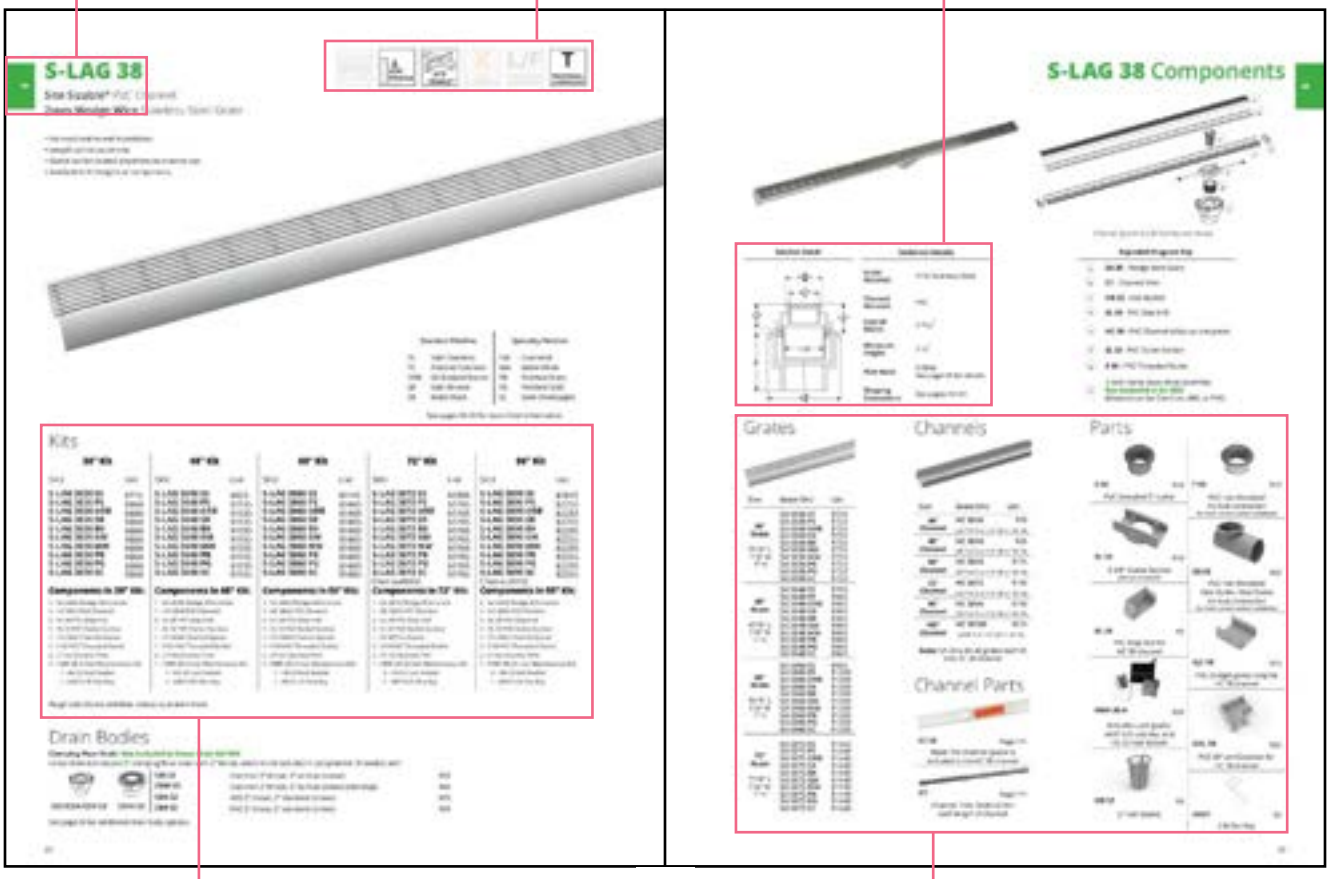
The colors of the product series written at the top of the page refer to the product type. The product types are sorted by the various installation methods. This can be seen on the reference chart on the inside front cover.

Examples:

S Site Sizable
FX Fixed Length
FF Fixed Flange
FCS Flange with Schluter®-KERDI

Look for the icons to differentiate features of a each product series.

The technical details chart show the drain materials and highlight important dimensions and flow rate.

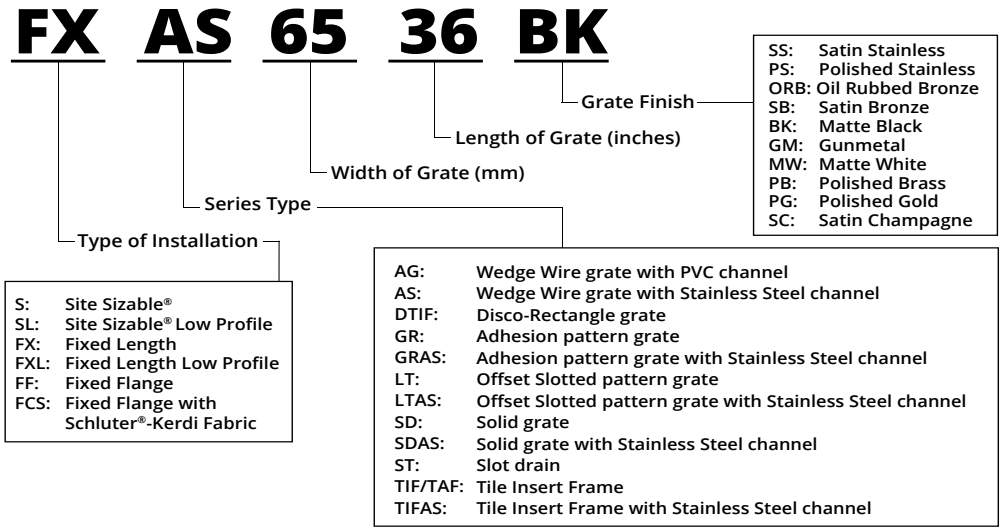


Drain kit SKUs are shown on the product pages along with the parts breakdown and list price.

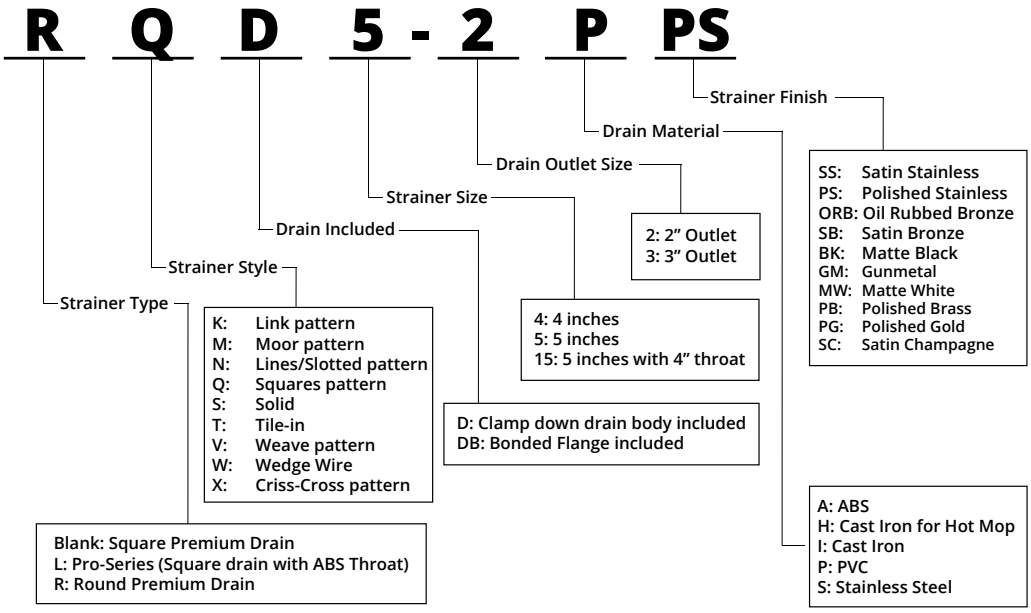
A more detailed list breaking down each part, SKU and list price.

How to use this book

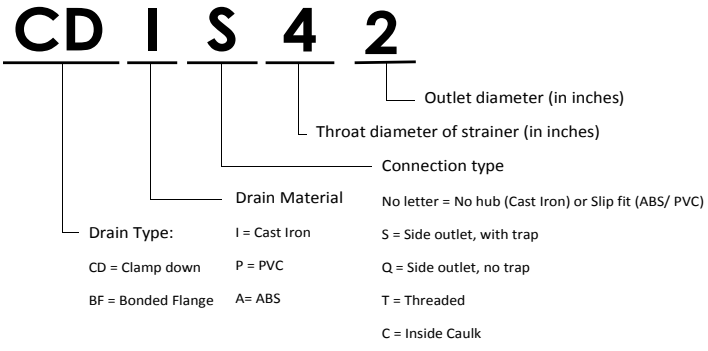
Linear Drain Kit SKU Explanation:



Center Drain Kit SKU Explanation:



Drain Body Kit SKU Explanation:



How to use this book

Icon Explanation:

Drains that are compatible with Traditional Waterproofing

When using a traditional type of waterproofing, the professional will typically build a shower pan (wet waterproofed area) with PVC, Vinyl, Lead, Hot Mop, Copper or Fiberglass material, and use with a clamp down drain. Infinity Drain's **S** and **FX** Series are compatible with traditional waterproofing.

Drains that are compatible with Liquid/Fabric Waterproofing

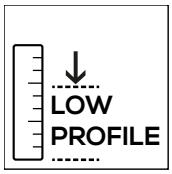
When using a modern type of waterproofing such as liquid membrane or fabric sheet, the professional can more easily waterproof over a greater floor area to build a barrier free or zero threshold installation. Infinity Drain's **FF** Series is compatible for this type of waterproofing.

Drains that are compatible with Schluter®-KERDI

Infinity Drain® products that have factory applied Schluter®-KERDI waterproofing fabric. These drains are compliant with Schluter®-KERDI shower system warranty. Warranty backed by Infinity Drain.

Site Sizable® Series

Infinity Drain's Site Sizable® linear drain channel and grate length can be cut onsite for an exact wall-to-wall installation, and the drain outlet can be located anywhere along the channel run. Infinity Drain's Site Sizable® linear drains can be joined together to create infinite lengths for outdoor and indoor applications. We offer threaded and non-threaded outlets, 90° angle joiners, straight joiners, and custom fabrication.



Site Sizable® Low Profile Series

Infinity Drain's Site Sizable® linear drain channel and grate length can be cut onsite for an exact wall-to-wall installation, and the drain outlet can be located anywhere along the channel run. The lower profile series reduces the PVC channel height from 1-5/8" to 1" and allows for easier installation of barrier free showers.

High Flow Drains

High flow drains are designed to connect to a 3" waste line. These drains are rated at 21 GPM and are ideal for showers that have multiple shower heads or body sprays.

Next Day Custom

Next Day Custom Linear Drains are available in three grate styles with lengths up to 96" in five finishes and for all installation waterproofing methods. Purchase orders and sign-offs received by 10am ET will ship the following day

Standard Custom

Any of Infinity Drain's linear drain standard models are available for custom fabrication in lengths up to 96". Installation types include Fixed (FX), Fixed Flange (FF), Flanged with Schluter®-KERDI (FCS), and Double Waterproofing (FCB), Tapered Threaded (FCH), Side Outlet (FT), Side Outlet with Schluter®-KERDI (FTS), Side Outlet Tapered Threaded (OCH), and Sink Drains.

Custom-Custom

If you can imagine it, we can manufacture it. Infinity Drain® offers a variety of customized drainage solutions to your exact specification. Customization options include outlet locations, configuration, styles, finishes, shape, installation type, and length up to 300".

Drain Bodies

Clamping Floor Drain **Not included in linear drain kit SKU**

Linear drain kits require 2" clamping floor drain with 2" throat, which is not included in complete kit. If needed, add:

CDI/CDA/CDP 22 | CDIH 22

CDI 22	Cast Iron 2" throat, 2" no hub connect	$85
CDIH 22	Cast Iron 2" throat, 2" no hub connect (Hot Mop)	$85
CDA 22	ABS 2" throat, 2" standard connect	$65
CDP 22	PVC 2" throat, 2" standard connect	$65

See pages 243-244 for additional drain body options.

Section Detail

Technical Details

Grate Material:	16 Gauge 304L Stainless Steel
Channel Material:	16 Gauge 304L Stainless Steel
Overall Width:	2 13/16"
Minimum Height:	1 5/16"
Flow Rate:	9 GPM See page 265 for details
Shipping Dimensions:	See index 281-304

Parts

See pages 245-246 for additional parts, extensions, and adapters

TNAS $45

Stainless Steel threaded nipple
Used with XC 65 channel

HMK-65-A $20

Includes user guide, AKEY Lift-out key, and HB 65 Hair Basket

HB 65 $5

2" Hair Basket

AKEY $5

Lift-Out Key

FXGR 65

Fixed Length Stainless Steel Channel
Adhesion Stainless Steel Grate

Custom Stainless Steel Shower Base

All Applications

Finished Installation

Custom Wedge Wire Linear Drain Grate - Stainless Steel Shower Base

Custom Stainless Steel Shower Base

Covers labor, removal, replacement and restoration.

Our custom shower bases are a cost-effective and time saving waterproof alternative to traditional mortar beds. Backed by our lifetime guarantee against waterproofing failure, our shower bases can be installed, and flood tested on the same day.

Features

- Lifetime guarantee against waterproofing failure
- 304L 16 Gauge Stainless Steel
- Ability to install and flood test same day
- Available with curb or barrier free (curbless)
- Drains are available in multiple styles and finishes
- Ensures exact wall-to-wall and flush against the wall installation

Installation

1. Stainless Steel Shower Base – Arrives factory flood tested with a Lifetime Guarantee. The base is ready to install and features an integral drain, pre-sloped floor, and is coated with surface primer for tile installation.

2. Stainless Steel Shower Base With Framing – The base is adhered to the subfloor, leveled and attached to the plumbing. Framing is completed around the shower base or the shower base is placed into a preexisting framed space then secured directly to the framing.

3. Walls and Waterproofing – Appropriate backerboard is mounted to the framing and seated on the flange of the shower base. Liquid or fabric waterproofing is applied over the backer board down to the shower base.

4. Finishing – Natural stone, glass, porcelain, or ceramic tile are applied to the walls and shower base.

Stainless Steel Shower Base

Custom Form

STANDARD CUSTOM

BL One piece stainless steel shower base with integral drain designed for use with liquid applied (cold fluid applied) waterproofing. The overall outside width (A) and depth (B) is the frame-to-frame dimensions. The finished length (the inside length) of the drain channel is dependent on the backerboard and tile thickness. The oulet location (C) is measured from the framing to the center of the drain pipe. The shower base can be set in place before or after the framing and connected to the wasteline. The backerboard is then installed and the waterproofing is applied. Tile or stone is applied directly to the shower base using thinset.

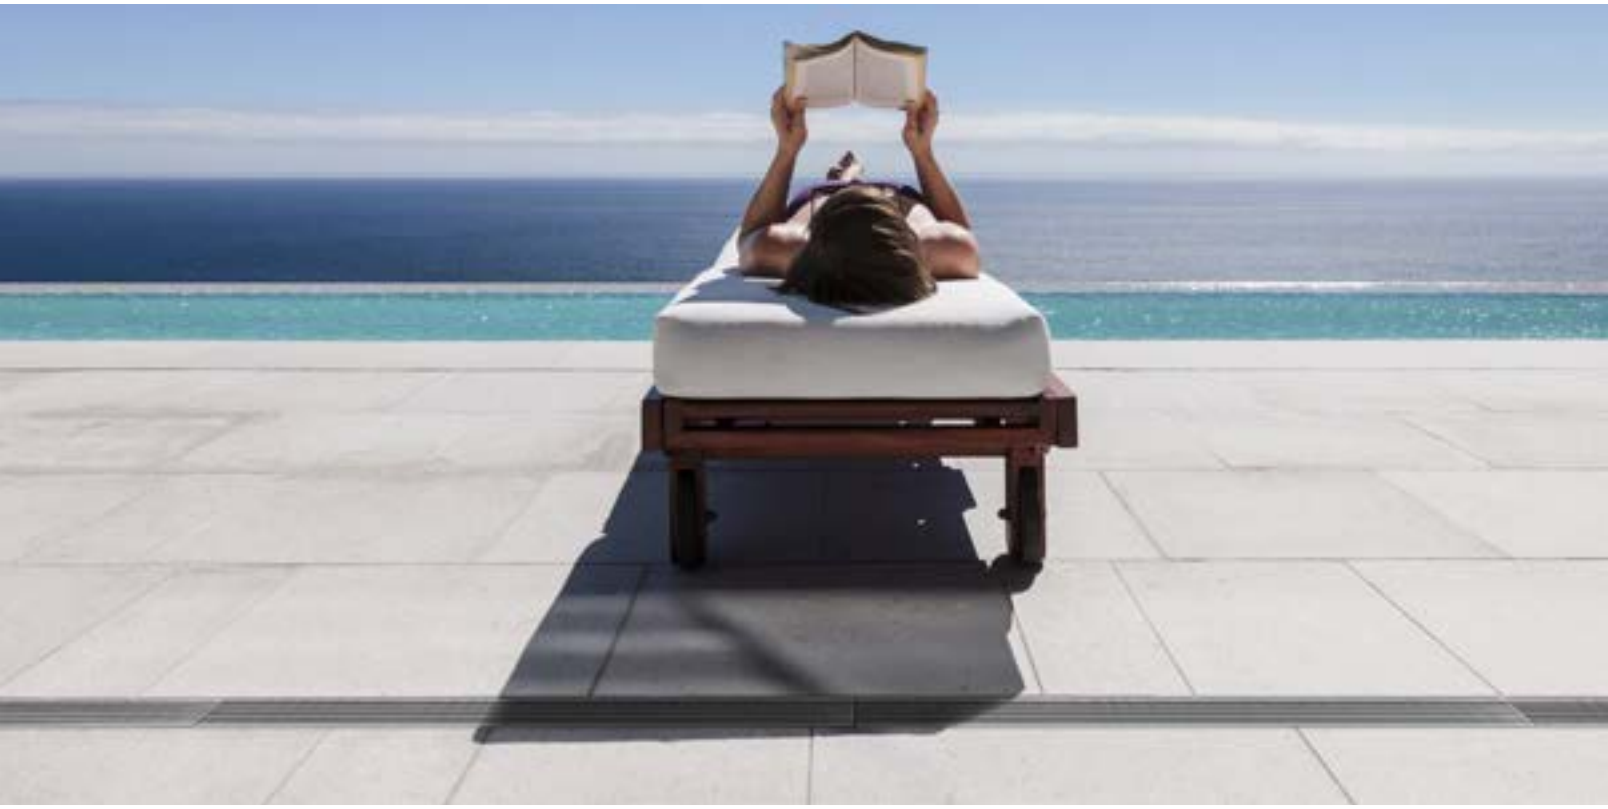
All Applications

ALL APPLICATIONS

Infinite Solutions

Infinity Drain linear drain systems are not just for showers. They are ideal for large scale installations like pools, balconies, driveways, decks, and even smaller applications like sinks and bar tops.



OUTDOOR

Site Sizable® Linear Drains

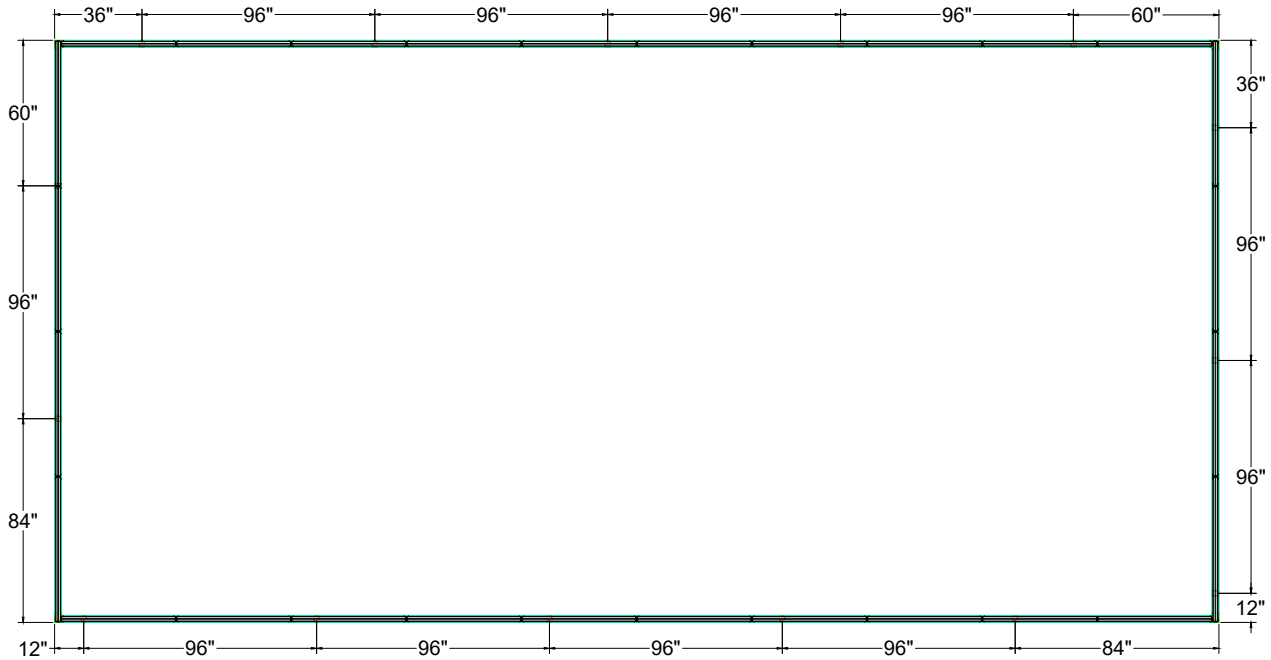
Site Sizable® drains offer a flexible, durable and sleek solution that is available right away. Stock linear drain components of any series can be joined together to build any desired length. The channel components can be cut to any sizes needed and outlet locations can be placed anywhere along the channel run. Angle joiners also allow for the ability to create 90° turns along the linear run. For outdoor and/or pool applications (1) outlet for every 96″ of drain is recommended. Channel trim (CT) is not recommended for lengths more than 96" or with drains that have configurations that include turns.

Recommended Models for general outdoor/pool applications include:
S-AG 38, S-AG 65, S-DG 38, S-DG 65 and S-TIF 65

Component List Example for 20'x 40' Pool Surround with S-TIF 65 SS:

8 - T 6560 SS 60" Tile Insert Frame Only
10 - T 6548 SS 48" Tile Insert Frame Only
36 - ET 65 SS End Cap for Tile Insert Frame
6 - ZSIKA M1 Sealant
12 - G 65108 108" PVC Channels
2 - G 6560 60" PVC Channels
2 - G 6536 36" PVC Channels
15 - S 65 PVC Outlet Sections
4 - GAM 65 PVC 90° Angle Joiners
12 - GJC 65 PVC Joiner Strips
15 - S 50 PVC Threaded Outlets

TA 65 Tile Insert Frame
G 65 PVC Channel
GAM 65 90° Angle Joiner
S 65 PVC Outlet Section



OUTDOOR

Site Sizable® Linear Drains

Recommended Models for driveways with light cars:
S-AG 38 and S-AG 65

Component List Example 15' driveway drain with S-AG 65 SS

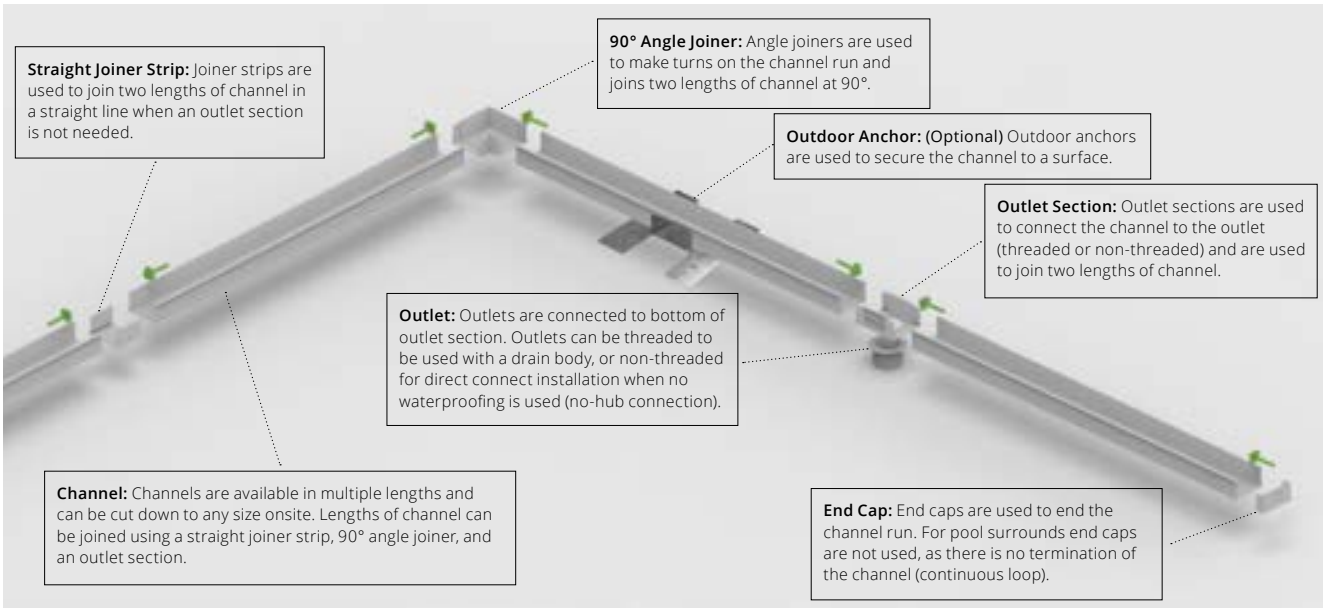
4 - A 6548 SS 3mm Wedge Wire Grates
1 - G 65108 108" PVC Channel
1 - G 6580 80" PVC Channel
2 - S 65 PVC Outlet Section
2 - F 65 PVC Non Threaded Outlet
1 - GJC 65 PVC Joiner Strip
2 - E 65 PVC Stop Ends

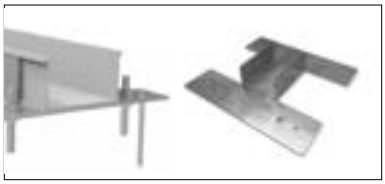
Wedge Wire: S-AG 38

OUTDOOR

Site Sizable® Linear Drains

Site Sizable® linear drain components fit together by sliding the components together and are secured using clear PVC primer and cement. Channel trim (CT) is not recommended for lengths more than 96" or with drains that have configurations that include turns.





Outdoor anchors are optional and are used to secure Site Sizable PVC channels to a surface. The anchors allow for height adjustment. Set screws on the anchor hold the channel in place. Be sure not to over tighten set screws to avoid channel flexing. Concrete and wood screws are included. See pages 191 and 192 for components and pricing.

NEW SO 65 $25

The SO 65 outlet can be used in place of the F 65 to evacuate water out to the side. Outlet can be rotated to be used as a side outlet or end outlet.

Contact us at quotes@infinitydrain.com for part configuration and project pricing.

S-AG 38

Site Sizable® PVC Channel
3mm Wedge Wire Stainless Steel Grate

List Price for longer lengths		
Grate and Channel price per foot	Satin Stainless Other Finishes	$215 $265
Each Outlet (outlet parts and hair basket)		$25
Each End Cap		$5
Each 90° joiner for channel/End Outlet		$25
Each Side Outlet / End Outlet		$25
Each outdoor anchor		$75

See page 192 for individual component pricing.

S-AG 65

Site Sizable® PVC Channel
3mm Wedge Wire Stainless Steel Grate

List Price for longer lengths		
Grate and Channel price per foot	Satin Stainless Other Finishes	$270 $320
Each Outlet (outlet parts and hair basket)		$25
Each End Cap		$5
Each 90° joiner for channel/End Outlet		$25
Each Side Outlet / End Outlet		$25
Each outdoor anchor		$75

See page 191 for individual component pricing.

S-DG 38

Site Sizable® PVC Channel
Circle Stainless Steel Grate

List Price for longer lengths		
Grate and Channel price per foot	Satin Stainless Other Finishes	$90 $135
Each Outlet (outlet parts and hair basket)		$25
Each End Cap		$5
Each 90° joiner for channel/End Outlet		$25
Each Side Outlet / End Outlet		$25
Each outdoor anchor		$75

See page 192 for individual component pricing.

S-DG 65

Site Sizable® PVC Channel
Circle Stainless Steel Grate

List Price for longer lengths		
Grate and Channel price per foot	Satin Stainless Other Finishes	$90 $135
Each Outlet (outlet parts and hair basket)		$25
Each End Cap		$5
Each 90° joiner for channel/End Outlet		$25
Each Side Outlet / End Outlet		$25
Each outdoor anchor		$75

See page 191 for individual component pricing.

S-TIF 65

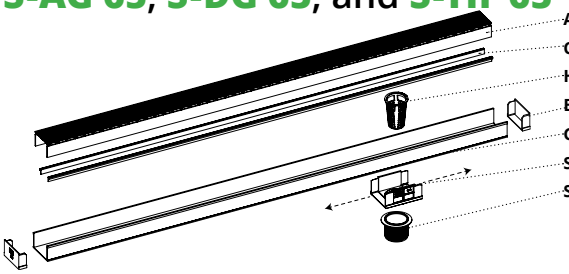
Site Sizable® PVC Channel
Tile Insert Frame Stainless Steel Grate

List Price for longer lengths		
Grate and Channel price per foot	Satin Stainless Other Finishes	$220 $245
Each Outlet (outlet parts and hair basket)		$25
Each End Cap		$5
Each 90° joiner for channel/End Outlet		$25
Each Side Outlet / End Outlet		$25
Each outdoor anchor		$75

See page 191 for individual component pricing.

Components

S-AG 65, S-DG 65, and S-TIF 65



When ordering the grate for the Rough Only Kits, also add the Hair Maintenance Kit. Use HMK-65-A with A 65 and TA 65 grates, and use HMK-65-D with D 65 grates.

Component	List
HMK-65-A	$20
Includes user guide, AKEY Lift-out key, and HB 65.	

For +72" kits use HMK-65-2A

Component	List
HMK-65-D	$20
Includes user guide, DKEY Lift-out key, and HB 65.	

For +72" kits use HMK-65-2D

GRATES

A 65, D 65, and TA 65 grates fit into G 65 channel.

OUTDOOR

Custom Linear Drain

Custom Fixed Flange drains are provided with a 1″ flange on all sides and can be custom fabricated to the exact length needed and the outlet location placed wherever is specified. For applications with extensive lengths where liquid applied (cold fluid applied) waterproofing is used including balconies, patios, roofs and more.

See pages 202 for custom pricing and page 213 for a custom order form.

Custom Wedge Wire

Custom Slot Drain

OUTDOOR

Custom Linear Drains

Custom Wedge Wire

Custom Curved Tile Insert

Custom Tile Insert Frame

All Applications

LAVATORY/SINK

Fixed Flange drains may be made to short lengths for use as sink drains with outlets smaller than the traditional 2" diameter, including 1 ½" or 1 ¼" with no-hub or slip fit connections. The channel would be under-mounted to the counter/sink top using an epoxy or water resistant adhesive. See pages 215-216 for a custom forms.

SPA & LOCKER ROOM SHOWERS

Spa drains offer an elegant look to compliment the most relaxing environments. These drains can be made for use with modern or traditional waterproofing. Extended lengths are available as stock items using our Site Sizable® series (see pages 187-194) or as custom fabrication (see page 202).

Locker Room/Fitness linear drains provide a sleek and functional option for showers that are designed in close proximity. One drain across multiple showers or a trench drain along a corridor of showers will remove water effectively and efficiently.

HEALTHCARE

This innovative drainage product allows the use of a linear drain in a vinyl or safety floor environment. It is particularly well adapted for applications in hospitals, commercial kitchens and schools. The vinyl clamp features a stainless steel channel in which a decoratively finished flange mechanically clamps the vinyl in place. All 65 and 100 Series grate styles are available to be made with this option.

ELECTROPOLISH

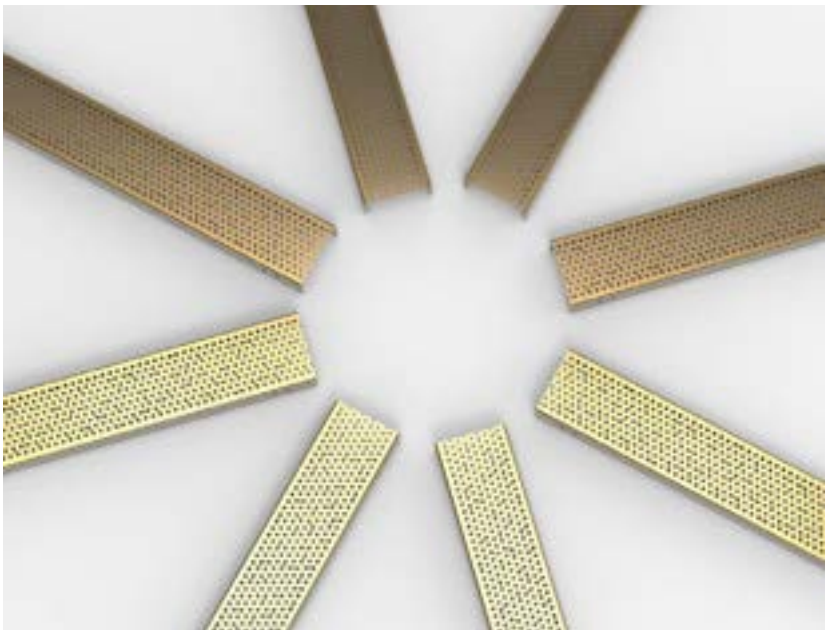
Electro-polishing is a custom treatment option for grates. This advanced electrolytic process leaves a shiny, smooth, ultra-clean surface that is unmatched in its ability to restore the natural corrosion resistance of stainless steel and enhance its aesthetic appeal.

Electro-polished grates improve their resistance to tea staining caused by the salt or chlorine, and is the standard recommendation for pool installations.

Lead time is approximately 2-4 weeks, based on quantity and availability. Contact quotes@infinitydrain.com for project quantities.

(The process is used to passivate the iron content on the surface area of stainless steel to create Chromium-Oxidized surface)

UNLACQUERED BRASS
Living Finish



What are Living Finishes?

Living finishes are metal surfaces that are left untreated, allowing them to react naturally with the environment over time. Unlike traditional finishes that remain static, living finishes evolve and develop a patina, gaining character as they age.

Developing a Patina

Color Changes: The brass surface transitions from golden to darker shades of brown, bronze, or amber. In humid or salty environments, it may develop hints of green or blue, called verdigris (copper carbonate compounds).

Texture: The patina often has an uneven, organic texture, adding depth and character to the surface.

MATERIAL
LIVING FINISH

Drains are crafted from authentic unlacquered brass sheets. This approach ensures a true living finish that will naturally age and develop a patina over time.

The following series can be fabricated from unlacquered brass sheets:

- Linear Drains with Perforated Grates and Solid grates (Adhesion,Circle, Offset Slotted, Slotted, and Solid grate styles)
- Center Drain Pro-Series (All styles)

PLATED
LIVING FINISH

Drains with a stainless steel core with a high-quality unlacquered brass plating, delivering both durability and the luxurious patina effect of a living finish.

The following series can be plated with unlacquered brass:

- Linear Drains with Wedge Wire grates and Tile Insert Frames
- Premium Center Drains (All styles)

Contact quotes@infinitydrain.com for pricing and lead time.

It is important to note that while both the solid sheets and plated finishes of Unlacquered Brass will develop a patina over time, there are some key differences:

Rate of Patina Development: Plated finishes may develop a patina more gradually compared to solid brass, as the layer of metal is thinner. The depth and character of the patina may vary based on the thickness of the plating and the specific environmental conditions.

Durability: Plated finishes offer the aesthetic appeal of brass combined with the strength of stainless steel. However, because plating is a surface treatment, heavy abrasion or scratches could potentially reveal the underlying stainless steel. Despite this, with regular exposure to the elements and proper care, the plating will still achieve the desired aged look.

THRESHOLD
FOLDING/SLIDING DOOR SYSTEMS

For use with sliding or folding glass walls or doors, a custom threshold drain can be used to provide a level entrance. The narrow profile minimizes impact on design, allowing seamless integration between internal and external areas; perfect for creating seamlessly combined indoor/outdoor spaces. Water runoff from the door system is efficiently captured and evacuated through the drain that encapsulates the door track.

CUSTOM
Fabrication

If you can imagine it, we can manufacture it. Infinity Drain® offers a variety of customized drainage solutions to your exact specification. Customize length, outlets, configuration, styles, and finishes. Please call or email quotes@infinitydrain.com for pricing and availability.

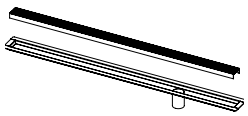
Customization Options

- Installation types: Fixed (FX), Fixed Flange (FF), Flanged with Schluter®-KERDI (FCS), Double Waterproofing (FCB), and Side Outlet (FT)
- Length of linear drain systems up to 300"
- Outlet placement
- Multiple outlets
- Shapes and configurations

Custom Fabrication Information

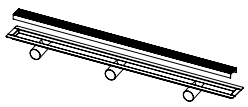
- Linear grates will be made 1/8" shorter than specified custom length to allow for removal
- FX Series custom length is based on the entire grate and channel assembly
- FF, FCB, FCS and FT Series custom length is based on inside channel dimension
- 1/8" tolerance on custom fabricated products
- Completed custom form must accompany purchase order from an authorized dealer
- Next Day Custom options available

Custom Programs



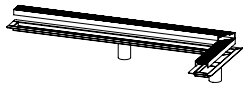
Next Day Custom

- Purchase orders and sign offs received by 10am ET will ship the following business day
- List Pricing **pages 207-210**
- Completed custom form must accompany purchase order **(see pages 206 for custom forms)**
- Straight configuration and custom lengths up to 96"
- Grate Styles: Wedge Wire, Offset Slotted, Tile Insert Frame
- Installation types: Fixed (FX), Fixed Flange (FF), Flanged with Schluter®-KERDI (FCS), and Double Waterproofing (FCB)
- Custom outlet placement for multiple outlets
- Finishes: Satin Stainless, Polished Stainless, Oil Rubbed Bronze, Satin Bronze, Matte Black, Gunmetal, Matte White, Polished Brass, Polished Gold, and Satin Champagne



Standard Custom

- Purchase orders and sign offs received by 10am ET will ship within 15 business days
- List Pricing **pages 219-225**
- Completed custom form must accompany purchase order **(see pages 212-217 for custom forms)**
- Straight configuration and custom lengths up to 96"
- Any standard grate style options
- Installation types: Fixed (FX), Fixed Flange (FF), Flanged with Schluter®-KERDI (FCS), and Double Waterproofing (FCB), Tapered Threaded (FCH), Side Outlet (FT), Side Outlet with Schluter®-KERDI (FTS), and Side Outlet Tapered Threaded (OCH)
- Custom outlet placement for multiple outlets
- Finishes: Satin Stainless, Polished Stainless, Oil Rubbed Bronze, Satin Bronze and Matte Black



Custom-Custom

- Specialty installation options (Sink drain, Elevator drain, Threshold drain, Vinyl Clamp drain, etc.)
- Any shape and configuration
- Any installation type
- Any outlet type
- Any finish. Standard finishes and color match finish options available.
- Length up to 300"
- **For quotation, lead time, and drawings contact us at quotes@infinitydrain.com**

Next Day Custom

Next Day Custom Linear Drains are available in five grate styles—Wedge Wire, Tile Insert, Offset Slotted, Solid, and Adhesion—ten finishes, and lengths up to 96 inches.

NEW Solid Grate

The Solid Grate, crafted from 16 gauge 304L stainless steel, is now available as part of the Next Day Custom Program.

NEW Specialty Finishes

In addition to our standard finishes, specialty finishes— including Gunmetal, Matte White, Polished Brass, Polished Gold, and Satin Champagne— are now available in the Next Day Custom Program.

NEW Site Sizable PVC

- **Prepped and Ready:** Channel components, including channel trim, channel, and outlet sections, are cut to exact size, glued together, and ready for installation.
- **Custom Fabricated Grate:** Each order includes a grate customized to match the precise channel dimensions.

Details for Next Day Custom Program:

- **Purchase Orders and Sign-Offs:** Received by 10 AM ET will ship the following day with no additional up-charge
- **Grate Styles:** Wedge Wire, Tile Insert, Offset Slotted, Solid and Adhesion
- **Finishes:** Satin Stainless, Polished Stainless, Oil Rubbed Bronze, Satin Bronze, Matte Black, Gunmetal, Matte White, Polished Brass, Polished Gold, and Satin Champagne
- **Linear Drains:** Available for lengths up to 96 inches
- **Installation Types:** FX Series, FF Series, FCB Series, FCS Series, and S Series
- **Custom Options:** Custom outlet placement or multiple outlets along the channel run
- **Order Limit:** 1 item (complete kit – channel and grate) per purchase order number

S PVC

Site Sizable PVC

Channel components, including channel trim, channel, and outlet sections, are cut to exact size, glued together, and ready for installation.

Waterproofing via clamping floor drain:

° Copper Pan
° Hot Mop
° PVC Liner
° Fiberglass
° Lead Pan
° Rubber Liner

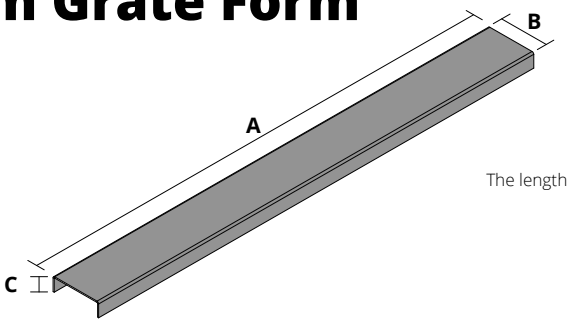
STANDARD CUSTOM



The length (A) should be ⅛" shorter than the inside length of the channel

A: Overall Length *(This dimension should be ⅛" shorter than the inside length of the channel)*	**B:** Overall Width *(If not standard)*	**C:** Overall Height *(If not standard)*

Grate Styles - Choose (1) Below

Wedge Wire Grates

- ☐ **SA 25** — 2MM WEDGE WIRE, WIDTH: 1", HEIGHT: 1"
- ☐ **SA 38** — 2MM WEDGE WIRE, WIDTH: 1 1/2", HEIGHT: 1"
- ☐ **WA 65** — 2MM WEDGE WIRE, WIDTH: 2 1/2", HEIGHT: 3/4"
- ☐ **SA 100** — 2MM WEDGE WIRE, WIDTH: 3 7/8", HEIGHT: 3/4"
- ☐ **A 38** — 3MM WEDGE WIRE, WIDTH: 1 1/2", HEIGHT: 1 1/2"
- ☐ **A 65** — 3MM WEDGE WIRE, WIDTH: 2 1/2", HEIGHT: 1 1/2"
- ☐ **SA 65** — 2MM WEDGE WIRE, WIDTH: 2 1/2", HEIGHT: 1"
- ☐ **SA 125** — 2MM WEDGE WIRE, WIDTH: 4 15/16", HEIGHT: 1"

Perforated Grates

- ☐ **KA 38** — SLOTTED PATTERN, WIDTH: 1 1/2", HEIGHT: 1", 16 Gauge
- ☐ **KA 65** — SLOTTED PATTERN, WIDTH: 2 1/2", HEIGHT: 1", 16 Gauge
- ☐ **UA 65** — SLOTTED PATTERN, WIDTH: 2 1/2", HEIGHT: 3/4"
- ☐ **EA 65** — OFFSET OVAL PATTERN, WIDTH: 2 1/2", HEIGHT: 3/4", 16 Gauge
- ☐ **GE 65** — ADHESION PATTERN, WIDTH: 2 1/2", HEIGHT: 3/4", 16 Gauge
- ☐ **QA 65** — SQUARES PATTERN, WIDTH: 2 1/2", HEIGHT: 3/4", 18 Gauge
- ☐ **D 38** — CIRCLE PATTERN, WIDTH: 1 1/2", HEIGHT: 1 1/2", 16 Gauge
- ☐ **D 65** — CIRCLE PATTERN, WIDTH: 2 1/2", HEIGHT: 1 1/2", 16 Gauge
- ☐ **PA 65** — CIRCLE PATTERN, WIDTH: 2 1/2", HEIGHT: 3/4", 16 Gauge
- ☐ **MA 65** — MARC NEWSON PATTERN, WIDTH: 2 1/2", HEIGHT: 3/4", 16 Gauge
- ☐ **GA 65** — ADHESION PATTERN, WIDTH: 2 1/2", HEIGHT: 1", 16 Gauge

For Tile Insert Frames and Solid Grates, bumpers/spacers are included in the overall length.

Tile Insert Frames

- ☐ **LA 65** — LOW TILE INSERT, WIDTH: 2 1/2", HEIGHT: 3/4", 16 Gauge — STANDARD INSERT DEPTH ACCEPTS UP TO 3/8" MATERIAL
- ☐ **RA 65** — LOW TILE INSERT, WIDTH: 2 1/2", HEIGHT: 1", 12 Gauge — STANDARD INSERT DEPTH ACCEPTS UP TO 3/8" MATERIAL
- ☐ **TA 65** — TILE INSERT, WIDTH: 2 1/2", HEIGHT: 1 1/2", 12 Gauge — STANDARD INSERT DEPTH ACCEPTS UP TO 3/4 " MATERIAL

Solid Grate

- ☐ **SG 65** — SOLID GRATE, WIDTH: 2 1/2", HEIGHT: 3/4", 16 Gauge

Note: Grates exceeding the specified lengths will be fabricated into separate equal sections.

Maximum **single** Length for each Grate style is as follows:

- **Tile Insert Frames:** Maximum single length 60" (LA 65, TA 65, RA 65)
- **Wedge Wire Grates:** SA 100/125: 60" Maximum single length.
- **All other Wedge Wire Models:** 72" Maximum single length.(A 38, A 65, SA 25, SA 38, SA 65, WA 65)
- **Perforated Grates & Solid Grate:** Maximum single length 96" (D 38, D 65, EA 65, GA 65, GE 65 KA 38, KA 65, MA 65, PA 65, UA 65, SG 65)

Grate Finish - *Choose (1)*

- ☐ Satin Stainless
- ☐ Polished Stainless
- ☐ Oil Rubbed Bronze
- ☐ Satin Bronze
- ☐ Matte Black
- ☐ Gunmetal
- ☐ Matte White
- ☐ Satin Champagne
- ☐ Polished Brass
- ☐ Polished Gold
- ☐ Custom Finish (Specify Color to Match)

Custom finishes can be made to match a sample provided by the customer. Contact Infinity Drain for availability of desired finish.

Terms and Conditions:
By signing this form, you are agreeing to the terms and conditions herein. All details and finishes stated are correct. All dimensions are correct and are to be held within a tolerance of +/- 1/16". All other details and dimensions that are specified as "standard" are subject to manufacturer's tolerance and change without notice. We can assume no responsibility for use of superseded or void data. All custom orders are non-cancellable, non-returnable and non-refundable.

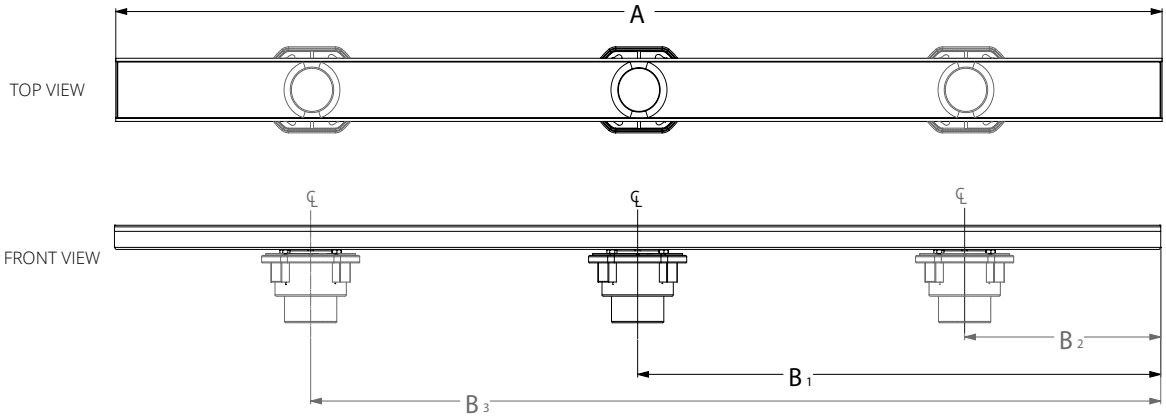
FXC (Fixed Length)
Standard Custom Form

FX (Fixed Length) linear drains are designed for use with traditional waterproofing methods including PVC Liners, Rubber Liners, Hot Mop, Lead Pan, Copper Pan and Fiberglass. The overall length of the channel **(A)** is the finished length of the drain, which is the outside dimension. All outlet locations **(B)** are measured from the right outside edge. For this installation a mechanically fastening drain body (clamp down drain) must be installed. A mortar bed or equal is spread across the shower area and sloped in all directions towards the clamp down drain body. A waterproofing membrane is installed with the drain body and over the mortar bed. The linear drain is threaded into the drain body and set to the correct height. A final layer of mortar is spread to encase the linear drain and is spread across the shower floor with a slope to the drain. Tile or stone is applied to the final mortar bed.



A: Overall Length	**B1:** Outlet Location 1	**B2:** Outlet Location 2	**B3:** Outlet Location 3
		FOR ADDITIONAL OUTLETS IF NEEDED	

Requires 2" clamping floor drain with 2" throat (Sold separately)

Note: Lengths exceeding the grate's maximum single length will be split into equal sections.

Grate Styles - Choose (1) Below	OR	Channel Only ☐
☐ **FXAS 65** 2 1/2" WIDE WEDGE WIRE **SA 65** GRATE **XC 65** CHANNEL Maximum Single Grate Length: 72"	☐ **FXED 65** OFFSET OVAL PATTERN **EA 65** GRATE **XC 65** CHANNEL Maximum Single Grate Length: 96"	☐ **FXDG 65** CIRCLE PATTERN **PA 65** GRATE **XC 65** CHANNEL Maximum Single Grate Length: 96"

FFC (Fixed Flange)
Standard Custom Form

SCAN FOR PDF DOWNLOAD

STANDARD CUSTOM

FF (Flanged) linear drains are designed for use with liquid applied (cold fluid applied) or fabric sheet membranes. The overall inside length of channel **(A)** is the finished length of the drain, with a 1-1/16" flange on all four sides to accept the waterproofing membrane. All outlet locations **(B)** are measured from the right inside channel edge. For this type of installation a mortar bed or equal is created up to and around the drain with the appropriate slope towards the drain. The waterproofing is applied over the mortar bed and the flange of the channel. Tile or stone is applied directly to the waterproofing for a low profile installation. The standard FC channel is provided with a 2" No-Hub Outlet.

Specialty channel options are available.

- **FCB** for Double Waterproofing - Comes with a 2" threaded outlet for use with a clamping drain body and a traditional membrane as a primary waterproofing and has the standard 1-1/16" for a liquid/fabric secondary waterproofing.
- **FCS** for Schluter®-KERDI Waterproofing - Comes with KERDI membrane factory applied to the channel for use with the Schluter®-KERDI system only. Uses a 2" No-Hub Outlet.
- **FCBS** for Double Waterproofing - Comes with a 2" threaded outlet for use with a clamping drain body and a traditional membrane as a primary waterproofing with KERDI membrane factory applied to the channel for use with the Schluter®-KERDI system as secondary waterproofing.
- **FCH** for Liquid or Fabric Waterproofing only - Comes with a 2" tapered male threaded outlet (MPT) for direct threaded connection to a 2" female (FPT) fitting.

FFC Sink Drain

Standard Custom Form

SCAN FOR PDF DOWNLOAD

CUSTOM CUSTOM

FF linear drains are typically designed for use with liquid applied (cold fluid applied) or fabric sheet membranes. For a sink application the channel of the drain should be undermounted to the counter top or sink top using an epoxy, waterproof adhesive, or equal. The overall inside length of channel **(A)** is the finished length of the drain, with a 1-1/16" flange on all four sides to accept the waterproofing membrane. All outlet locations **(B)** are measured from the right inside channel edge. The angle of the flange under the basin of the sink **(D)** should be the same as the slope of the basin of the sink. These sink drains are provided with a finished edge that is flush with the height of the decorative grate. This height **(E)** is typically the same as the thickness of the sink top material. The outlet diameter **(F)** is available in various sizes and connection types.

Outlet conenction types include:

- **No Hub -** Two pipes of the same outside diameter are abutted to each other and joined using a rubber coupling.
- **Slip Fit -** A male tail piece slips into another threaded pipe and is joined together with a slip nut and washer.
- **MPT Threaded** - Outlet of the drain has a male threading that is tapered (MPT) to thread into a tapered female fitting (FPT).

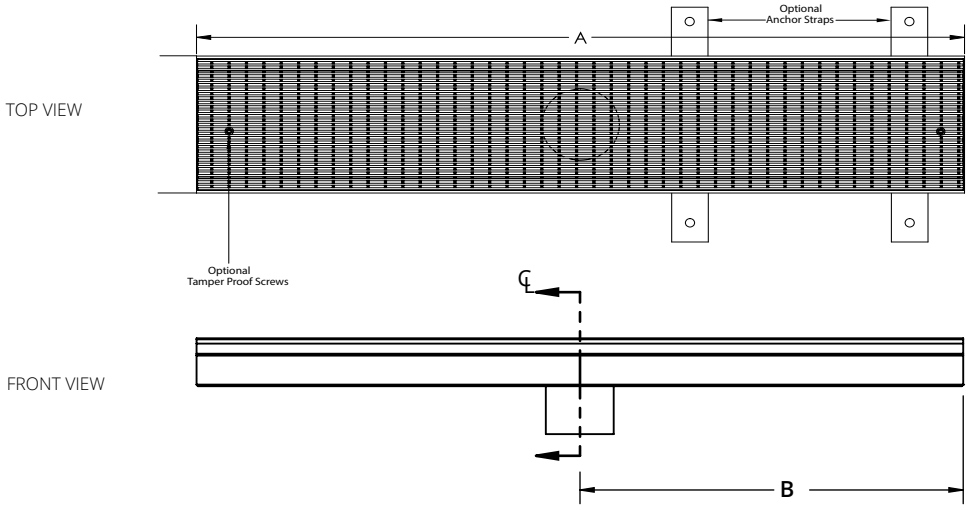
ELEVATOR DRAIN

Custom Form

Infinity Drain elevator drains are constructed of 16 gauge 304L ASTM A240 stainless steel with a 4" No-hub center outlet. The elevator drain is designed to mitigate waterflow into a hoist-way by way of a drain channel into an outlet section. Standard grate is the wedge wire (SA) grate constructed of 316L stainless steel which is ADA compliant, can be specified to include tamper resistant locking screws to secure the grate. Installer must verify all rough-in dimensions prior to installation and consult local and national codes. Conformity and compliance to local and national codes are the responsibility of the installer.

Customize the length of the drain to match your onsite conditions

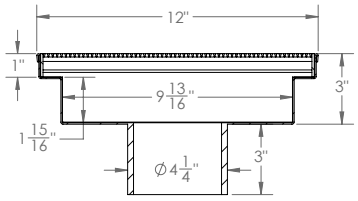
It is important to note that any alterations to the standard design might affect the drain's guaranteed performance of 100 gallons per minute

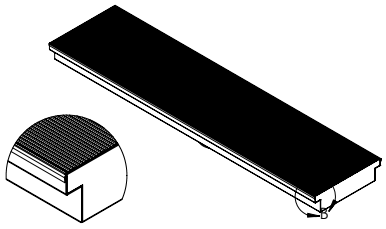


A: Overall Length	**B:** Outlet Location 1	**C:** Outlet Length	

FOR ADDTIONAL OUTLETS IF NEEDED

12" Wide x 3" Depth Channel





DETAIL B
SCALE 1 : 4

Optional Channel Features:

☐ **Tamper Resistant Protection** ☐ **Anchor Straps**

- Tamper Resistant Screws are designed to prevent any unauthorized removal or altering of the drain after installation
- Anchor Straps provide a mechanical connection for the drain when installing within a concrete slab.

STANDARD

CUSTOM

Custom Grates

Custom grates are fabricated to length up to 72". The lead time for custom grates is 15 business days, for Next Day custom options see pages 219-221. For drains that are longer than 72" grates are fabricated in two sections.

Infinity Drain Wedge Wire blends contemporary styling with durability. Made of 316L marine grade stainless steel, the signature 'Infinity' look is created by V-shaped wires that run parallel to each other and are welded together with spacing of absolute precision. Grate openings widen inwardly to serve as a primary strainer for debris, while allowing water to flow freely.

SA 25 Grate: 2mm Wedge Wire. (1" width, 1" height) - 316L Stainless Steel
Fits into FC 65, FCS 65, FCB 65, FCH 65, OC 65, OCS 65, and OCH 65 channels.
Requires use of channel insert (CI 25).

Product Design Consultant
Gensler

The Adhesion linear drain is inspired by the science of adhesion, where water droplets stick to a variety of surfaces to form unique patterns. To develop this abstract aquatic visual, the Gensler design team started by pouring water on a selection of luxurious surfaces to observe how the droplets moved and gathered.

GA 65 Grate: Adhesion (¾" depth for tile) - 16 Gauge 304L Stainless Steel
Fits into XC 65, FC 65, FCS 65, FCB 65, FCH 65, OC 65, OCS 65, and OCH 65 channels.

The Solid grate showcases a 3/16 inch thick, fully stainless steel cover. A minimally sized gap surrounds the grate on all sides to provide the necessary drainage to evacuate water efficiently.

SG 65 Grate: Solid Stainless Steel (2 ½" width, ¾" height) - 16 Gauge 304L Stainless Steel
Fits into XC 65, FC 65, FCS 65, FCB 65, FCH 65, OC 65, OCS 65, and OCH 65 channels.

Custom Grates

The Tile Insert Frame allows the drain to truly disappear into the shower floor. Flooring material is set into the tray and a minimally sized, yet sufficient, gap provides the necessary drainage to evacuate water efficiently.

LA 65 Grate: Tile Insert Frame (⅜" depth for tile) - 16 Gauge 304L Stainless Steel
Fits into XC 65, FC 65, FCS 65, FCB 65, FCH 65, OC 65, OCS 65, and OCH 65 channels.

Marc Newson, one of the most acclaimed and influential product designers of his generation, has collaborated with Infinity Drain on an exclusive line of linear drain covers. The hexagonal pattern is seen throughout Marc Newson's body of work and produces an intricate detail that will highlight any shower.

MA 65 Grate: Marc Newson (¾" depth for tile) - 16 Gauge 304L Stainless Steel
Fits into XC 65, FC 65, FCS 65, FCB 65, FCH 65, OC 65, OCS 65, and OCH 65 channels.

Marc Newson.

Custom Grates

STANDARD CUSTOM

Infinity Drain perforated grates are made from 16 gauge, 304L stainless steel. Available in multiple design options and finishes, decorative perforated patterns appeal to a broad range of design sensibilities.

UA 65 Grate: Slotted Pattern (2 ½" width, ¾" height).
Fits into XC 65, FC 65, FCS 65, FCB 65, FCH 65, OC 65, OCS 65, and OCH 65 channels.

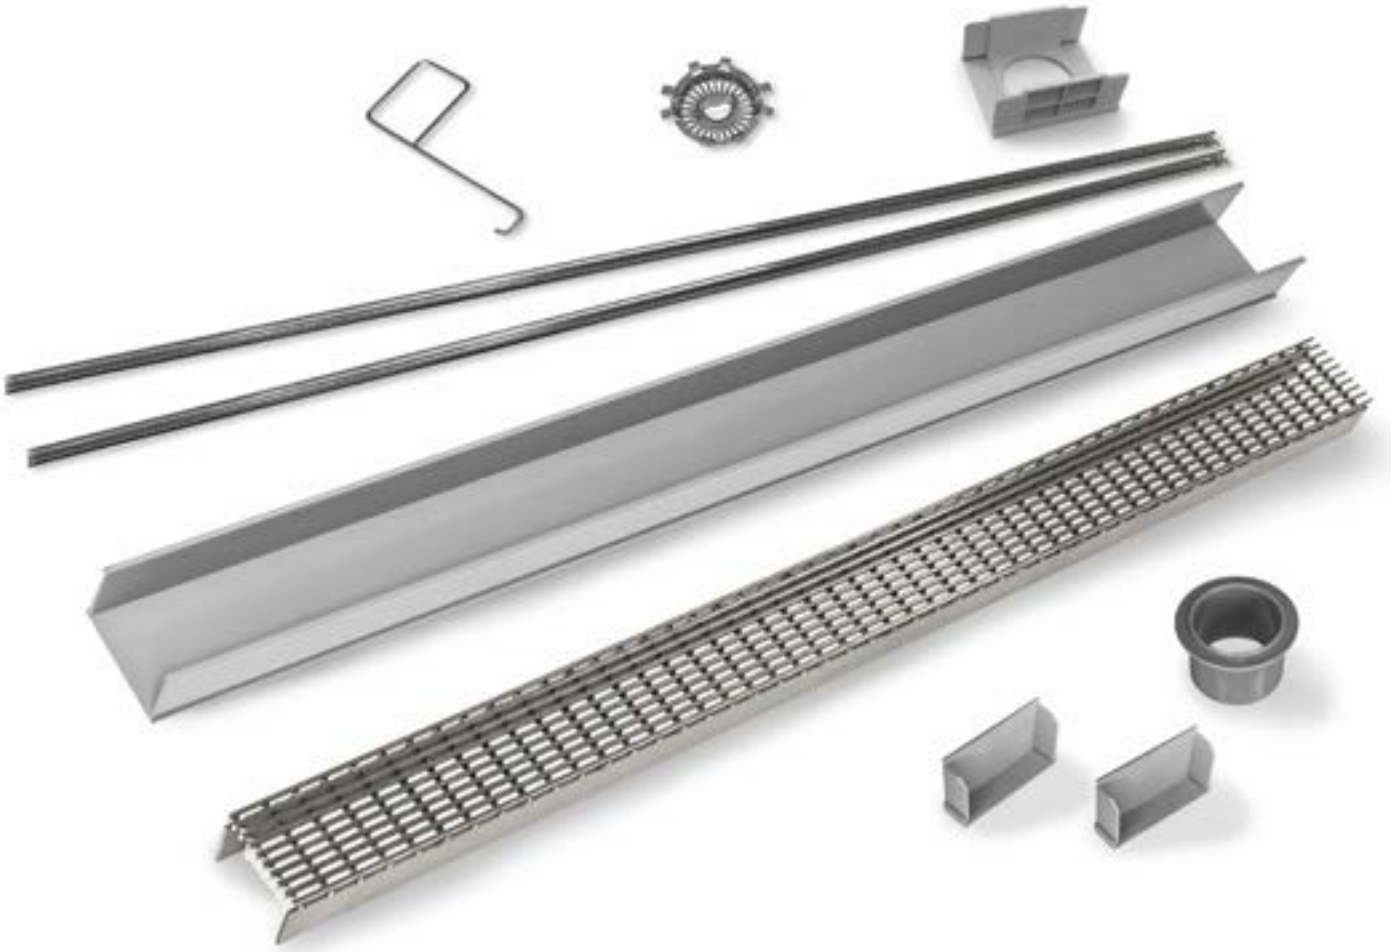
Components



Components
Channel Spacer

Available for PVC Site Sizable® Series.

The Channel Spacer is placed in the channel during installation to prevent channel flexing. It also acts as a mudguard to prevent debris from entering the Site Sizable® channel assembly. See specific series installation instructions for more details.

The Channel Spacer can be purchased separately and is included with the G 38, G 65, GL 38, and GL 65 channel. It is included in the following kits:

- S-LSD 65
- S-LAG 38
- S-LAG 65
- S-LT 38
- S-LT 65
- S-TIF 65
- S-LTIF 65
- S-LGR 65

Roughs Only Kits

Site Sizable Series Roughs Only Kits.

The Rough Only Kits include the PVC components and channel trim for the Site Sizable series. Add a clamp down drain to complete components needed for installation.

The grate and hair maintenance kit can be purchased separately and are not needed for installation.

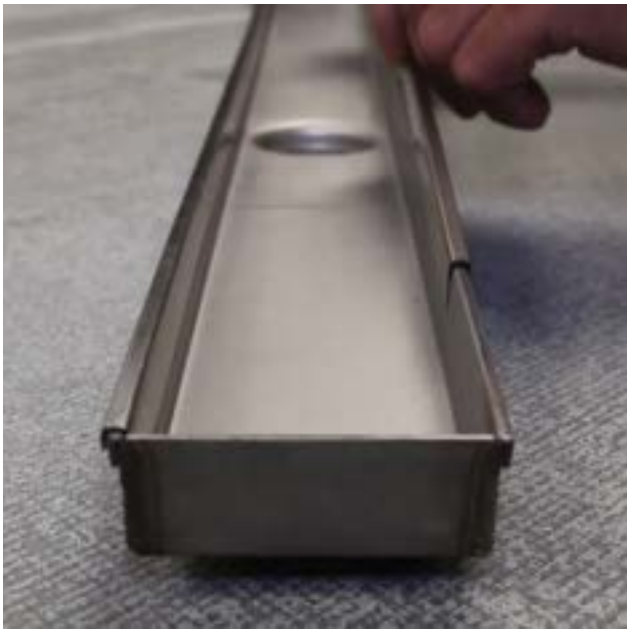
Components
Channel Trim



See installation instructions for full details.

Components
Channel Trim

Available for both PVC and stainless steel Site Sizable® Series.

The Channel Trim covers the joints along the Site Sizable® channel assembly. On the PVC Site Sizable® Series the trim conceals the exposed PVC edge and conceals the seams on the stainless steel Site Sizable® Series. Channel trim (CT) is not recommended for lengths more than 96" or with drains that have configurations that include turns. Channel Trim is sold by the piece. Linear drains require a quantity of 2 pieces. Channel Trim can be purchased separately and is included in the following kits:

- S-TIF 65
- S-LTIF 65
- S-TIFAS 65
- S-TIFAS 99
- S-LTIFAS 65
- S-LTIFAS 99
- S-LAG 38
- S-AS 38
- S-LAG 65
- S-AS 65
- S-AS 99
- S-LGR 65
- S-GRAS 65
- S-GRAS 99
- S-LT 38
- S-LTAS 38
- S-LT 65
- S-LTAS 65
- S-LSD 65
- S-SDAS 65

CT
Channel Trim

Sold individually.

(2) required for each linear drain kit.

PARTS

Component	List
HB 65	$5
Used with fixed channels, except OC 65, OCH 65, and when using the SA 25 grate.	

Component	List
TNAS	$45
Stainless Steel threaded nipple. Used with XC 65 channel.	

Component	List
CF 65	$35
Adjustable channel feet. Included in OC 65, OCH 65, OCS 65 channel.	

Components
Tile Edge

Available for Flanged Channels

Clamping collars can be utilized as a tile edge for standard flange channels. The tile edge is placed on the flanged channel after waterproofing is complete and is adhered to the flange using thinset. The tile edge can be used with the flanged channels shown on pages 231-232 when paired with 65 series grates, and with the following kits:

- FFAS 65
- FFLT 65
- FFGR 65
- FFSD 65
- FFTIF 65
- FFTAF 65
- FCSAS 65
- FCSLT 65
- FCSGR 65
- FCSSD 65
- FCSTIF 65
- FCSTAF 65

	HS 4	4” Hair Strainer fits high flow drains, except S-AS 99, S-LTIFAS 99, and S-TIFAS 99	$5
	HS 2	2” Hair Strainer	$5
	CRS 2	Stainless Steel Clamping Plate to fit CDI 22, CDP 22, and CDA 22	$100

Hair Maintenance Kits

Infinity Drain complete kits come with a Hair Maintenance Kit. These Hair Maintenance kits are packed in canvas pouches that include a lift-out key, patented hair basket, and a Care & Maintenance User Guide on how to easily maintain your drain.

Note: All drain complete kits include a user guide and lift-out key. Some drain designs do not allow access for the hair basket and a hair strainer is provided or no hair strainer is provided.

See pages 267-268 for details on drain maintenance.

Installation

Site Sizable PVC

Installation

For an exact wall-to-wall installation. The channel and grate length can be cut onsite, and the drain outlet can be located anywhere along the channel run. Available in kit lengths or sold as individual components.

Waterproofing via clamping floor drain:

- Copper Pan
- Hot Mop
- PVC Liner
- Fiberglass
- Lead Pan
- Rubber Liner (Chloraloy®)

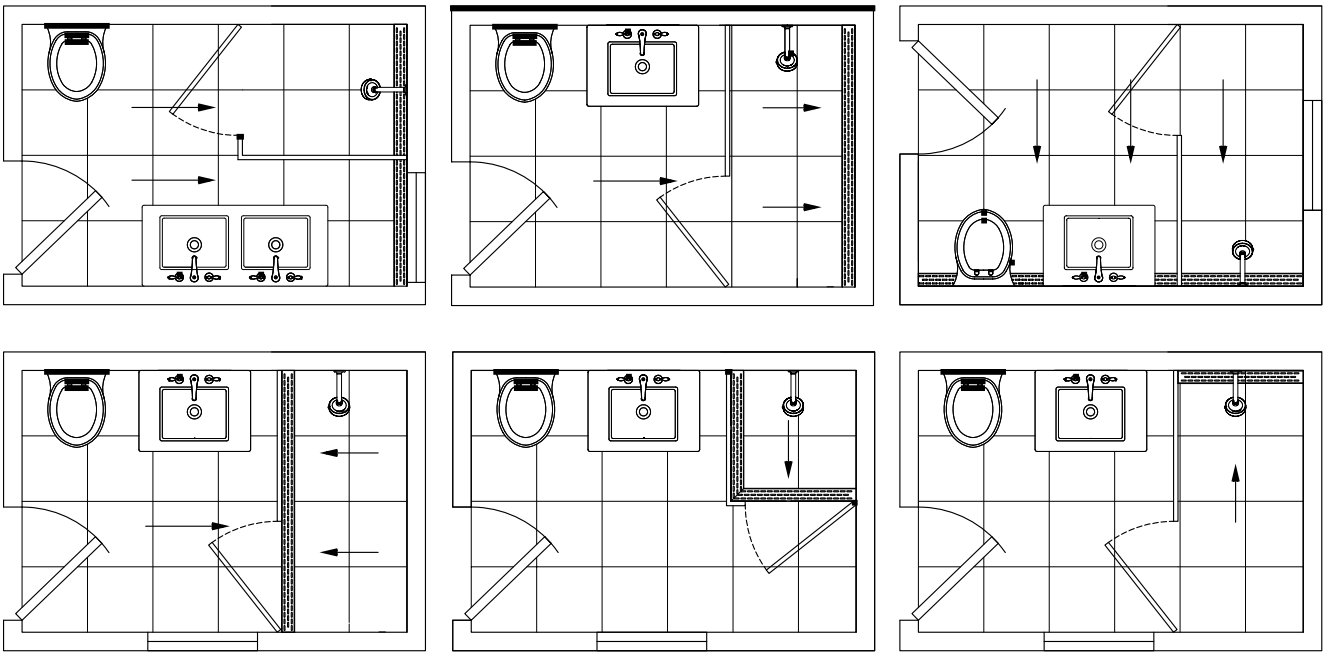
Linear Drain Guide

General Installation Guidelines

Whether it is a barrier threshold (curb), or barrier free (curbless/zero threshold) installation, Infinity Drain® has provided general guidelines below to assist in determining the correct product choice for your project.

Floor Pitch Direction



Site Conditions

Whether it is a renovation or new construction, choosing where to locate a linear drain is contingent on the waste line location, which may be predetermined or already installed. Moving a waste line may be possible, depending onsite conditions. Infinity Drain's® Site Sizable® **S** Series provides flexibility during the installation process by allowing the outlet to be placed anywhere along the channel run. Always consult with a licensed professional.

Locating Linear Drains

A linear drain allows for the use of larger format floor tile and the ability to pitch the floor in one direction. This offers an advantage from the traditional center drain installation, where the floor must slope in four directions in order to properly drain the water.

Fig 1: Wall-to-Wall

Fig 2: NOT Wall-to-Wall

Fig 3: Against a Wall

Fig 4: Threshold Install

Fig 5: Threshold Install

Type of Install

Wall-to-Wall (Fig 1, Fig 2)

One way to ensure proper drainage is to install the linear drain from wall-to-wall. The challenge of this installation is that it requires an exact dimension. Infinity Drain offers a solution to this issue with the Site Sizable® **S** Series, which allows for "site sizing" the length of the drain by cutting the grate and channel to the exact finished wall-to-wall dimension. Infinity Drain's **FX** **FF** & **FCS** Series can be custom fabricated for the exact desired length and outlet location.

Against a Wall (Fig 3)

Infinity Drain's Fixed Flange (**FF** **&** **FCS**, bottom outlet and Side Outlet, horizontal or side outlet) Series are designed for flush against the wall installations. These series are intended for use with liquid or fabric sheet waterproofing to tie into the wall board. They are available with a center outlet location and in set lengths of 24", 32", 36", 42", 48", and 60." Custom sizes and outlet locations are available.

The **S** Site Sizable® and Fixed **FX** Series require a traditional clamping floor drain body for PVC/Vinyl Liner, Rubber Liner, Lead Pan, Copper Pan, Fiberglass, and Hot Mop type waterproofing. The diameter of the traditional clamping floor drain body creates a challenge for flush against the wall installations. If using these series Infinity Drain recommends using our CDI 22, CDIH 22, CDA 22, or CDP 22. This drain body is specifically designed for against the wall installations.

Curb or Curbless (Fig 3, 4, and 5)

Deciding between a barrier threshold (curb) or barrier free (curbless) installation is critical when a linear drain is being considered. Please consult a licensed professional when determining which installation is possible. Please see Barrier Free Installation Guide on pages 269-273 for more information.

Threshold Installation (Fig 4 and 5)

For threshold installs, we recommend the drain run exactly wall-to-wall to block any water from leaving the shower or wet area. We do not recommend linear drains less than 2" wide or Tile Insert Frame linear drains for threshold installations without a curb due to the lack of channel width needed to sufficiently catch the water.

Barrier Free Installation (Fig 4 and 5)

Installing a shower drain without a curb, barrier, or threshold creates a seamless look with easy accessibility to the wet area. To achieve an ideal installation, floor heights should be equal between the shower area (wet area), outside the shower (dry area), and next room. Details on pages 269-273.

Linear Drain Guide

General Installation Guidelines

Flow Rates

There are many variables that influence flow rates and how drains perform. Our listed GPM (gallons per minute) on Infinity Drain® products are based on having a "head of water" that is traveling at ½" high. Different head heights will change flow rate. Without calculating a specific install, use our flow rate as a general guideline. The following variables should be considered when choosing and locating a linear drain.

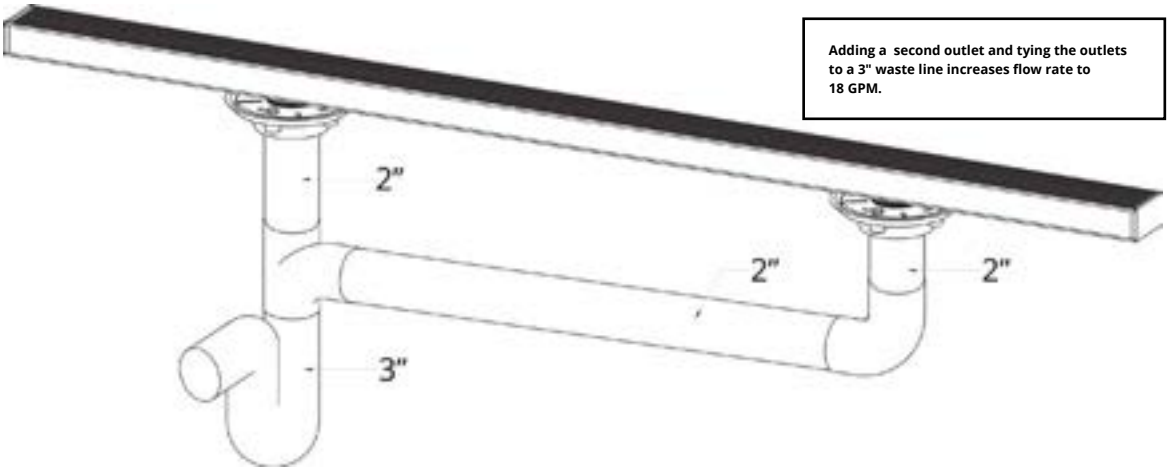
VARIABLES TO CONSIDER:

- What is flow rate of the shower valve? (i.e. how much water is being drained?)
- Are there multiple shower valves?
- What is the water pressure or PSI of the site location?
- How many water features? (i.e. shower heads, hand shower, body sprays, etc.?)
- Will the fixtures operate at the local plumbing code's legal gallons per minute?
- Will the flow restrictors be removed from the fixtures?

The answers to the above questions fall into the equation of determining the proper type of drain, outlets necessary, and location of the drain. These variables can vary drastically from installation to installation, and because of this, it is difficult to have an absolute flow rate. Most US residential installations use a 2" waste line, which has an average capacity of 9 GPM at ½" head of water, assuming proper venting. Adding additional 2" outlets and tying them to a 3" waste line will significantly increase the flow rate to 21 GPM. Infinity Drain's 3" outlet products have an average capacity of 21 GPM.

Outlets

Infinity Drain products are intended for both indoor and outdoor use. For indoor installations, we recommend an outlet every 60". For example, on a 72" length drain, if the outlet is offset 5" to one side, we would recommend a secondary outlet, especially for a zero-threshold installation. Our 72", 80", and 96" complete kits come standard with two outlet assemblies. The Site Sizable® **S** Series can add additional outlet components to the kit. Custom fabrication with multiple outlets is available on the **FX**, **FF** and **FCS** linear drain Series. Outdoor installations: Outlet frequency is dependent on drain application and geographic location. Please contact us with questions regarding your specific installation.



Adding a second outlet and tying the outlets to a 3" waste line increases flow rate to 18 GPM.

Waterproofing

Waterproofing technique can help determine which linear drain series to specify. If using a traditional type of waterproofing, the professional will typically build a shower pan (wet waterproofed area) with PVC, Vinyl, Lead, Hot Mop, Copper or Fiberglass material. Infinity Drain's **S** and **FX** Series are recommended. If using a modern type of waterproofing such as liquid membrane or fabric sheet, the professional can more easily waterproof over a greater floor area to build a barrier free or zero threshold installation. Infinity Drain's **FF** and **FCS** Series are recommended for this type of waterproofing.

USING A CLAMPING FLOOR DRAIN/TILE FLOOR DRAIN:

PVC Membrane/Vinyl Liner (Polyvinyl Chloride)

A plastic sheet available at most plumbing suppliers and sold in rolls of 4', 5' and 6'. The membrane is layered between mortar beds and the corners are folded to create the shower pan liner. If the shower pan area is larger than the roll dimension, it must be seamed or joined together.

Lead Pan/Copper Pan

A metal sheet that is formed to create the shower pan area. The membrane is layered between mortar beds and the corners are folded to create the shower pan liner. If the shower pan area is larger than the sheet dimension, the lead material must be welded together. This install is more common in metropolitan areas where code may require a metal pan.

CPE Membrane (Chlorinated Polyethylene)

A rubber sheet available at most plumbing suppliers and sold in rolls of 4', 5' and 6'. The membrane is layered between mortar beds and corners are folded to create the shower pan liner. If the shower pan area is larger than the roll dimension, it must be seamed or joined together. CPE Membrane is also branded as Chloraloy® by Noble.

Hot Mop (Tar)

Heated liquid tar is applied or "mopped" on the shower area to create the shower pan and is similar to waterproofing a roof with tar. This installation is most common in Southern California. Similar to fiberglass waterproofing.

USING A BONDED FLANGE:

Liquid

Roll or paint-on liquid membrane that can be applied on floors, walls, and ceilings and bonds directly to the drain flange. The total install time is shorter than traditional waterproofing methods and typically saves 2 to 3 days. Tile can bond directly to waterproofing.

Fabric Sheet

Sheet membrane that bonds directly to the drain flange with an adhesive is sold by most tile suppliers. Corners (in and out) are available to avoid folding. If the shower pan area is larger than the roll dimensions, it must be seamed or joined together. Tile can bond directly to waterproofing.

Linear Drain Guide

Care and Maintenance

Hair Happens.

A little maintenance goes a long way.

When shower drains clog with hair and debris, they become hard to clean and repairs can become costly. Infinity Drain complete kits come with a Hair Maintenance Kit including: our patented hair basket and lift out key. Follow the cleaning instructions to easily remove the grate and avoid clogs. See pages 247-248 for individual hair maintenance kits.

Infinity Drain's premium finishes are durable, however, harsh chemicals may impact the finish and should be avoided. Always clean first with mild soap and water.

Linear Drain Guide

Care and Maintenance

Approved Cleaning Products:

Stainless Steel Finishes

Stainless steel cleaners such as Bar Keeper's Friend®, Soft Scrub®, or equivalent can be used.

For hard set stains, Steel Brite® can be used.

Color or Decorative Finishes

For all other finishes (Satin Bronze, Matte Black, and Oil Rubbed Bronze) use mild soap and water.

WARNING: Do NOT Use These Products!

Many cleaning agents used for general cleaning contain acids and other harsh chemicals. Using these cleaning agents on or near the drain can cause considerable damage even with just one application.

Do not use cleaning agents containing:

Hydrochloric acid (ex. tile cleaners, toilet bowl cleaners)
Formic acid (ex. clog remover)
Acetic acid (ex. mold & mildew cleaners)
Phosphoric acid (ex. tile cleaners)
Muriatic acid (ex. rust cleaners)
Chlorine bleach solutions

A Note About Surface Rusting

Stainless steel is non-porous, hygienic, rust-free and extremely durable.

3 general ways the outer layer can break down:

1. Mechanical Abrasion by using steel wool, wire brushes, scrapers, etc.
2. Hard Water
3. Chlorides such as chlorine bleach, sea water, salt water, table salt, etc.

If traces of ferrous steel are on the outside surface of stainless steel, these traces can rust and form discoloration. This is not actually the stainless steel rusting. Use approved cleaners to remove surface traces of rust and restore your finish.

Linear Drain Guide

Barrier Free Installation

Installing a shower drain without a curb, barrier, or threshold creates a seamless look with easy accessibility to the wet area. To achieve an ideal installation, floor heights should be equal between the shower area (wet area), outside the shower (dry area), and next room. Specific conditions will determine what is involved.

Linear Drain Placement

For a barrier free installation the most important factor to consider is the drain placement. The placement will affect installation and design options, build up amount and depression amount.

BACK WALL - Parallel to shower entrance on opposite wall. (Page 270)

THRESHOLD - Parallel to shower entrance and along the entrance wall. (Page 271)

SIDE WALL - Perpendicular to shower entrance. (Page 273)

Installation and Design Options

Installing a shower drain without a curb, barrier, or threshold creates a seamless look with easy accessibility to the wet area. To achieve an ideal installation, floor heights should be equal between the shower area (wet area), outside the shower (dry area), and next room.

Minimum Build Up at the Entrance of the Shower

Minimum build up at the entrance of the shower is calculated to determine if and how much the shower area must be depressed for a barrier free installation.

Waterproofing Method

The type of waterproofing will affect the amount of buildup because of the height of the compatible drain and waste line connection type.

TRADITIONAL WATERPROOFING:
(PVC/Vinyl Liner, Lead/Copper Pan, Hot Mop, Rubber Liner, Fiberglass)

Traditional waterproofing has a larger overall build up due to taller channels and a clamp down drain installation. The channel height ranges from 1-7/16" to 2-3/8".

LIQUID/FABRIC WATERPROOFING:
(Liquid Applied or Fabric Sheet Membrane)

Liquid/ Fabric waterproofing installations have less overall build up due to shallow channels and a No-hub installation. The channel height ranges from 13/16" to 7/8".

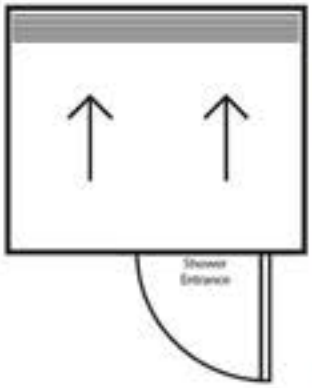
Linear Drain Guide

Barrier Free Installation

LINEAR DRAIN PLACEMENT:

PARALLEL TO SHOWER ENTRANCE

BACK WALL



INSTALLATION AND DESIGN OPTIONS:

- Most flexible installation option
- Can be installed wall to wall, flush against the wall, or off of the walls
- Stock sizes can be used
- Any grate style can be used

The minimum buildup for a back wall installation is dependent on the depth of the shower and degree of slope.*

Example: 4' x 4' shower with a slope of ¼" per foot would have a slope of 1".

WATERPROOFING METHOD:

TRADITIONAL WATERPROOFING	LIQUID/ FABRIC WATERPROOFING
Drain Channel Height Above Subfloor	**Drain Channel Height Above Subfloor**
+ (Shower Depth (A) x 0.25)	**+ Tile Thickness**
	+ Thinset Thickness
	+ (Shower Depth (A) x 0.25)
= Height at entrance of shower	**= Height at entrance of shower**
MINIMUM BUILDUP :	
2-7/16" to 3-3/8" (Varies by model)	**2-5/16" to 2-3/8"** (Varies by model)

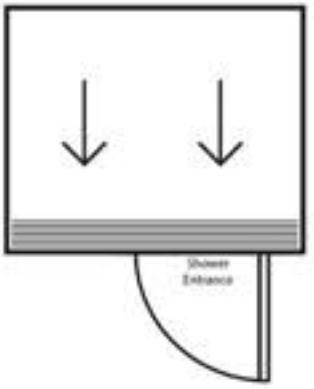
*NOTE: Installer must verify all rough-in dimensions prior to installation and consult local and national codes. Conformity and compliance to local and national codes are the responsibility of the installer.

Linear Drain Guide

Barrier Free Installation

LINEAR DRAIN PLACEMENT:

PARALLEL TO SHOWER ENTRANCE
THRESHOLD



INSTALLATION AND DESIGN OPTIONS:

- Least amount of overall build up at the entrance of the shower - ideal for dealing with height restrictions
- Must be installed wall to wall
- Must work within stock dimensions, Site Sizable, or custom drain
- Narrow grate styles and Tile insert frames can not be used

The minimum buildup for a back wall installation is dependent on the height of the drain above the slab/subfloor.*

WATERPROOFING METHOD:

TRADITIONAL WATERPROOFING	LIQUID/ FABRIC WATERPROOFING
Drain Channel Height Above Subfloor	**Drain Channel Height Above Subfloor**
= Height at entrance of shower	**+ Tile Thickness**
	+ Thinset Thickness
	= Height at entrance of shower

MINIMUM BUILD UP :

1-7/16 to 2-3/8" (Varies by model)	**1-5/16 to 1-3/8"** (Varies by model)

*NOTE: Installer must verify all rough-in dimensions prior to installation and consult local and national codes. Conformity and compliance to local and national codes are the responsibility of the installer.

Linear Drain Guide

Barrier Free Installation

For threshold installs, we recommend the drain run exactly wall-to-wall to block any water from leaving the shower or wet area. We do not recommend thinner or tile-in type drains for threshold installations due to the lack of channel width needed to sufficiently catch the water. The FF and FCS series offer the lowest overall heights. In addition, we offer a product (ST 65 - pg 246) to allow channel to recess into subfloor an additional ¾". The dry side of the shower should have a slight pitch towards the linear system to ensure proper drainage. The entire wet and dry floor area should be waterproofed. Infinity Drain recommends working with a licensed professional who is familiar with local codes and installation requirements.

LINEAR DRAIN STYLE REFERENCE CHART

THE RECOMMENDED MODELS FOR A BARRIER FREE THRESHOLD INSTALLATION ARE HIGHLIGHTED IN PINK BELOW.

GRATE STYLES		S Site Sizable	FX Fixed Length	FF Fixed Flange	FCS Flange with Schluter®-KERDI
Tile Insert Frame		S-TIF 65 S-LTIF 65 S-TIFAS 65 S-TIFAS 99 S-LTIFAS 65 S-LTIFAS 99	FXTIF 65 FXLTIF 65	FFTIF 65 FFTAF 65	FCSTIF 65 FCSTAF 65
Disco-Rectangle			FXDTIF 65	FFDTIF 65	FCSDTIF 65

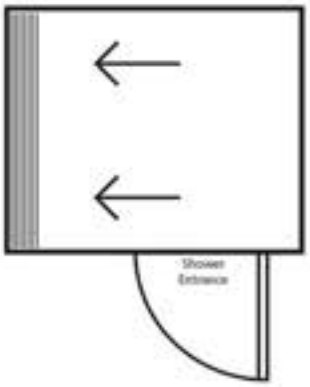
Linear Drain Guide

Barrier Free Installation

LINEAR DRAIN PLACEMENT:

PERPENDICULAR TO SHOWER ENTRANCE

SIDE WALL



INSTALLATION AND DESIGN OPTIONS:

- Usually the most amount of build up
- Can create pitch challenges between wet and dry area
- Can be installed wall to wall, flush against the wall, or off of the walls
- Stock sizes can be used

Slab/subfloor must be depressed to allow the finished surface of the shower floor to be ½" - ⅝" below the finished surface of the dry area.*

Example: 4' x 4' foot shower with a slope of ¼" per foot would have a slope of 1".

WATERPROOFING METHOD:

TRADITIONAL WATERPROOFING	LIQUID/ FABRIC WATERPROOFING
Drain Channel Height Above Subfloor	**Drain Channel Height Above Subfloor**
+ (Shower Depth (A) x 0.25)	**+ Tile Thickness**
+ ½"	**+ Thinset Thickness**
	+ (Shower Width (B) x 0.25)
	+ ½"
= Height at entrance of shower	**= Height at entrance of shower**

MINIMUM BUILD UP :

TRADITIONAL WATERPROOFING	LIQUID/ FABRIC WATERPROOFING
2-15/16" to 4-7/8" (Varies by model)	**2-13/16" to 2-7/8"** (Varies by model)

*NOTE: Installer must verify all rough-in dimensions prior to installation and consult local and national codes. Conformity and compliance to local and national codes are the responsibility of the installer.

Glossary

ABS	Type of plastic used for waste and drain fittings. Acrylonitrile butadiene styrene, commonly abbreviated ABS. Usually black in color.
ABS Primer / Glue	Primer - Substance used to prep or clean pipe prior to gluing (see solvent weld). ABS glue is specifically used for ABS to ABS connections.
ADA Shower	A shower that meets requirements set by the Americans with Disabilities Act. Specific standard to floor drains requires the threshold or barrier transition for a roll-in shower to be no greater than 1/2" high.
Barrier Free Shower	A shower area without a curb or threshold to step over. Also called curbless.
Bolt Pattern	Top ring of a clamping floor drain. Bolt patterns can vary by drain manufacturer. ID makes universal clamping plates to accommodate existing clamping floor drains. (See UCP 2 and UCP 4, and UCP 42 pg 245)
Bonded Flange	A drain body used for liquid membrane or fabric sheet waterproofing.
Cast Iron	A ferrous type of iron used in plumbing for waste pipes and drain bodies.
Center Pitch (4-Way Pitch)	Traditional tiled shower floors are pitched towards the center in four directions to allow proper drainage. If not pitched properly, water pools in areas of the shower.
Channel	The bottom portion of a linear drain. Also called trench, trough, channel body.
Clamping Floor Drain	Type of mechanically fastening floor drain that allows you to "clamp down" a PVC liner, Chloraloy® liner, Lead Pan, Copper Pan, Fiberglass, or Hot Mop waterproofing methods.
Curb	Dam built to contain a shower area. Code specifies a minimum of 2" and a maximum 9" above the elevation of the finished drain.
Drain Connection Types	Method in which the drain body connects to waste line. (See No Hub, FIP, Inside Caulk and Slip Fit Connection)
End Caps	Component used to close the end of a channel assembly. PVC for S-AG, S-DG, and S-TIF Series. Stainless Steel for S-AS, S-TIFAS, and S-LTIFAS Series.
FCB - Double Waterproofing	ID product series that is "Fixed" with a "Flanged" channel and threaded bottom outlet. Fixed models cannot be modified onsite. This product uses "Traditional" waterproofing as the primary waterproofing and can be used with an additional "Modern" waterproofing method for a "Double" waterproofing installation.
FCS - Fixed Flange with Schluter®-KERDI	ID product series that is "Fixed" with a "Flanged" channel and bottom outlet and has factory applied Schluter®-KERDI waterproofing membrane. Fixed models cannot be modified onsite.
FIP	Female Iron Pipe - A female iron connection with a tapered thread that thins out to the end of the pipe. When tightened, the ever-decreasing thread depth makes the connection watertight.
Fixed (FX)	ID product series that is "Fixed" with a straight edge channel. Fixed models cannot be modified onsite. This product uses "Traditional" waterproofing methods.
Fixed Flange (FF)	ID product series that is "Fixed" with a "Flanged" channel and bottom outlet. Fixed models cannot be modified onsite. This product uses "Modern" waterproofing methods.
Floor Pitch / Slope	Floor height change to allow proper drainage. Standard pitch is 1/4" (2% slope) per foot and not more than 1/2" (4% slope) per foot towards the drain. International pitch 1/8" (1%) per foot.
Flow Rate	Amount of water that passes the through the drain at the outlet. Calculated in gallons per minute (GPM).
GPM	Gallons Per Minute
Grate	The decorative top portion of a linear drain. Also called top grate, strainer, top grid, drain cover.
Grate Free Area (GFA)	Total area not covered by the grate. Calculated by determining area of opening on the top grate/strainer multiplied by the number of openings.
Head of water	The total energy at a given point in a fluid. Expressed in units of height.
Hot Mop	Waterproofing technique using liquid hot tar that cools to become a waterproof shower pan.
Inside Caulk	Type of floor drain connection that fits over the waste pipe. It is packed with an oakum and is further sealed using molten lead.
Joiners	Straight or 90 degree joiners used to connect channel lengths together. PVC for S-AG, S-DG, S-LTIF and S-TIF Series. Stainless Steel for S-AS, S-LTIFAS, and S-TIFAS Series.
Modern Waterproofing	Liquid membrane or fabric sheet waterproofing methods. Waterproofing is attached or painted onto the flange. FF, FCS, FCB, FT, or Bonded Flange center drain.

Glossary

No Hub	Type of floor drain connection where two pipes are connected with a rubber coupling (Fernco™).
NPS	Nominal Pipe Size (NPS) - North American set of standard sizes for pipes. Pipe size is specified with two non-dimensional numbers: diameter based on inches and a schedule for pipe wall thickness.
NPT	National Pipe Thread Taper (NPT) - A U.S. standard for tapered threads used on threaded pipes and fittings.
Outlet	Open area where water exits the drain or channel.
Outlet Section	Component section of channel with a punch for the outlet. Specific to the S-AG, S-DG, S-LAG, S-LT, S-TIF 65, S-LTIF 65, S-AS 65, S-LTIFAS 65, and S-TIFAS 65 Series.
Outlet Assembly	Component section of channel that includes the outlet section welded to the threaded nipple for connection to the clamp down floor drain. Specific to the S-AS 99, S-LTIFAS 99 and S-TIFAS 99.
PVC	A type of plastic used for waste and drain fittings. Polyvinyl chloride, commonly abbreviated PVC. Usually white or gray in color.
PVC Primer/ Glue	Primer - Substance used to prep or clean pipe prior to gluing (see solvent weld). PVC glue is specifically used for PVC to PVC connections.
Rescue Nipple	A longer version of the Threaded Nipple up to 4" used when the clamp down floor drain body is too deep in the subfloor.
Rubber Coupling	A tubular flexible rubber device that joins two pipes together by tightening fastening clamps to create a watertight connection. Used to make a"No Hub" connection. Also known as a Fernco™.
Shower Pan	Waterproofed area in a shower enclosure.
Side Outlet	An outlet that is horizontal going parallel to the floor. Used to move waste lines with limited flexibility onsite.
Single Plane Pitch	Shower floors pitched in one plane towards the linear drain channel. Used instead of a four-way pitch, which is common for a center drain.
Site Sizable® (S)	ID product series that can be cut to length onsite as well as locate the outlet anywhere on the channel run.
Slip Fit Connection	Type of floor drain connection for PVC and ABS fittings. One piece"slips" into the other snugly and is sealed (solvent weld) using appropriate glue type (ABS glue or PVC glue).
Solvent Weld	A molecular bond that fuses plastic to create a watertight seal. The fitting is primed (cleaned) then glued (welded) together using a material specific glue (ABS glue or PVC glue).
Stainless Steel	A steel alloy used to make Infinity Drain grates and channels. Defined as a steel alloy with a minimum of 10.5% to 11% chromium content by mass.
Strainer	The decorative top portion of a drain. The overall dimension and shape may vary. The critical dimension to connect to the drain body is the strainer throat size.
Strainer Throat	A threaded male connection from the strainer. Threads into a drain body.
Sub-Floor	The material below a finished floor. Generally plywood or concrete.
Threaded Nipple	A threaded cylinder used to connect the linear drain channel to the clamp down floor drain.
TIF	Tile Insert Frame - A decorative grate that has an open area to add finished flooring material. Water drains into the channel via a 1/4" gap on all sides.
Tile Insert	ID center pitch drain that allows tile to be placed inside the center frame. TD, TDB, LTD, Series.
Top Ring/ Drain Throat	A threaded female connection top ring that bolts to body of clamp down floor drain. Infinity Drain offers universal clamping plates to accommodate existing floor drains. (See UCP 2 and UCP 4 pg 245)
Traditional Waterproofing	PVC liner, Chloraloy® liner, Lead Pan, Copper Pan, Fiberglass or Hot Mop waterproofing methods with a clamp down floor drain.
Wall Build-Out	Adding additional backer board and/or packing out a wall with additional material to create a flush against the wall installation for the Site Sizable® (S) and Fixed (FX) Series.
Wedge Wire	A high grade 316L stainless steel, welded, longitudinal decorative grid grate.
Weep Holes	Holes on a clamp down floor drain intended to"weep" away water below a tiled floor. During installation it is important these do not get clogged by mortar or thinset.

Terms and Conditions

Applicability

These terms and conditions ("Terms") are the only terms which govern the sale of the merchandise by Infinity Drain Ltd. ("Infinity Drain") to the dealer and/or customer purchasing the merchandise (in either such case, the "Recipient"). Notwithstanding anything herein to the contrary, if a written contract signed by both parties is in existence covering the sale of the merchandise covered hereby, the terms and conditions of said contract shall prevail to the extent they are inconsistent with these Terms.

The accompanying invoice and these Terms comprise the entire agreement between the parties, and supersede all prior or contemporaneous understandings, agreements, negotiations, representations and warranties, and communications, both written and oral. These Terms prevail over any of the Recipient's general terms and conditions of purchase regardless whether or when such Recipient has submitted its purchase order or such terms. Fulfillment of a Recipient order does not constitute acceptance of any of the Recipient's terms and conditions and does not serve to modify or amend these Terms.

Price and Payment Terms

The Recipient shall purchase the merchandise from Infinity Drain at the price(s) (the "Price(s)") set forth in Infinity Drain's published price book in force as of the date that Infinity Drain accepts Recipient's purchase order.

All Prices are exclusive of all sales, use and excise taxes, and any other similar taxes, duties and charges of any kind imposed by any governmental authority.

Recipient shall pay all invoiced amounts due to Infinity Drain within thirty (30) days of issuance of Infinity Drain's invoice. Recipient shall make all payments hereunder by wire transfer/check/credit card/ACH payment and in U.S. dollars (and in Canadian dollars (CAD) for Recipients located in Canada). Credit card transactions are subject to a three percent (3%) processing fee. Recipient shall pay interest on all late payments at the lesser of: (i) the rate of one-and-a-half percent (1.5%) per month, or (ii) the highest rate permissible under applicable law, calculated daily and compounded monthly.

Recipient shall reimburse Infinity Drain for all costs incurred in collecting any late payments, including, without limitation, court costs, collection agency fees and/or attorneys' fees. Administrative fees of fifteen percent (15%) will be added to the interest charges on all overdue accounts when payment is obtained through a collection agency. In addition to all other remedies available under these Terms or at law (which Infinity Drain does not waive by the exercise of any rights hereunder), Infinity Drain shall be entitled to suspend the delivery of any merchandise if Recipient fails to pay any amounts when due hereunder and such failure continues for five (5) days following written notice thereof. Recipient shall not withhold payment of any amounts due and payable by reason of any set-off of any claim or dispute with Infinity Drain, whether relating to Infinity Drain's breach, bankruptcy or otherwise.

Delivery and Exclusions

Transport, handling or installation damages are excluded from the Limited Warranty. The merchandise will be delivered within a reasonable time after the receipt of Recipient's purchase order, subject to the availability of the merchandise. Infinity Drain shall not be liable for any delays, loss or damage in transit of any merchandise.

Infinity Drain shall not be liable for any non-delivery of merchandise (even if caused by Infinity Drain's negligence) unless Recipient gives written notice to Infinity Drain of the non-delivery within five (5) days of the date when the merchandise would in the ordinary course of events have been received. Any liability of Infinity Drain for non-delivery of merchandise shall be limited to, at infinity Drain's option, either: (i) replacing the merchandise within a reasonable time, or (ii) adjusting any applicable invoice respecting such merchandise to reflect the actual quantity delivered.

Any merchandise that must be changed or replaced pursuant to the Limited Warranty will be itself warranted up until a two (2) year period following any such change or replacement. Infinity Drain shall not be liable or responsible to any Recipient, nor be deemed to have defaulted or breached these Terms, for any failure or delay in fulfilling or performing any term of these Terms when and to the extent such failure or delay is caused by or results from acts or circumstances beyond the reasonable control of Infinity Drain including, without limitation, acts of God, flood, fire, earthquake, explosion, governmental actions, war, invasion or hostilities (whether war is declared or not), terrorist threats or acts, riot, other civil unrest, national emergency, revolution, insurrection, epidemic, lockouts, strikes or other labor disputes (whether or not relating to either party's workforce), restraints or delays affecting carriers or inability or delay in obtaining supplies of adequate or suitable materials, telecommunication breakdown, power outage or any other force majeure event.

Terms and Conditions

Limitation of Liability

Infinity drain makes no warranty whatsoever with respect to its merchandise, including without limitation any: (a) warranty of merchantability; (b) warranty of fitness for a particular purpose; (c) warranty of title; or (d) warranty against infringement of intellectual property rights of a third party; whether express or implied by law, course of dealing, course of performance, usage of trade or otherwise.

The remedies set forth in these terms shall be the recipient's sole and exclusive remedy and infinity drain's entire liability for any breach of the limited warranty set forth in these terms.

In no event shall infinity drain be liable to recipient or any third party for any loss of use, revenue or profit, or for any consequential, indirect, incidental, special, exemplary, or punitive damages whether arising out of breach of contract, tort (including negligence) or otherwise, regardless of whether such damages were foreseeable and whether or not recipient has been advised of the possibility of such damages, and notwithstanding the failure of any agreed or other remedy of its essential purpose.

In no event shall infinity drain's aggregate liability arising out of or related to these terms, whether arising out of or related to breach of contract, tort (including negligence) or otherwise, exceed the total of the amounts paid to infinity drain for the merchandise sold hereunder.

Claims, Returns and Restocking Charges

All claims for damages and shortages in connection with any delivery must be reported to Infinity Drain in writing within five (5) days of delivery. Please notify customer service within thirty (30) days of any missing parts or defects. Merchandise may not be returned for any reason without prior written consent from Infinity Drain. Infinity Drain reserves the right to refuse a return on a non-standard drain. Returns will not be accepted unless an RGA number from Infinity Drain is clearly marked on each box. The RGA must be obtained by emailing RGA@infinitydrain.com . A specialist will review the RGA request, and upon approval will issue the RGA number. Merchandise may be returned up to ninety (90) days from date of receipt. RGA numbers are valid for thirty (30) days from issue date. Merchandise must be received within thirty (30) days from the RGA date of issue. All items will be subject to inspection by Infinity Drain. All items must be returned unused and in original condition, including packaging, components part, and all other container contents. A twenty-five percent (25%) charge on the Recipient's base net price will be imposed as a restocking charge for each returned item accepted by Infinity Drain, in addition to all applicable charges for labor, materials and/or freight. All returned merchandise must be shipped freight prepaid.

Modifications

Infinity Drain reserves the right to change, without notice, the models, the specifications and the price of its merchandise. Infinity Drain also reserves the right to change these Terms & Conditions without notice.

Merchandise Ownership and Insurance

Infinity Drain will remain the owner of all merchandise sold until full and final payment of the invoice is received by Infinity Drain. Until such time that an invoice is paid in full, the Recipient must take reasonable care of the Infinity Drain merchandise and will be held responsible for all losses and damages when in possession of the merchandise. During the term of these Terms and for a period of two (2) years thereafter, the Recipient shall, at its own expense, maintain and carry insurance in full force and effect which includes, but is not limited to, commercial general liability (including product liability) in a sum no less than one million dollars ($1,000,000.00) with financially sound and reputable insurers. Upon Infinity Drain's request, Recipient shall provide Infinity Drain with a certificate of insurance from Recipient's insurer evidencing the insurance coverage specified in these Terms. Recipient shall provide Infinity Drain with ten (10) days' advance written notice in the event of a cancellation or material change in Recipient's insurance policy.

Advising Obligations

In the case of a dealer, such dealer agrees to advise Infinity Drain in writing of all seizures, losses or damages that involve any Infinity Drain merchandise in dealer's inventory for which Infinity Drain has not been paid in full, within three (3) business days of becoming aware of all such seizures, losses or damages.

Terms and Conditions

Intellectual Property Rights and Other Proprietary Rights

Each Recipient acknowledges that all intellectual property rights and other proprietary rights regarding Infinity Drain's business, activities, merchandise, and promotional material, and any technology pertaining thereto, are the sole property of Infinity Drain. Each Recipient agrees to limit its use of Infinity Drain's intellectual property rights and other proprietary rights to only those uses expressly authorized by Infinity Drain. Each Recipient agrees to promptly and fully inform Infinity Drain of any infringement or alleged infringement of any Infinity Drain intellectual property rights or other proprietary rights by any person, including any competitor of Infinity Drain, of which such Recipient may become aware.

Freight Charges

Freight charges apply to drains, as well as residential, commercial and construction site drop shipments. Other shipping charges such as re-consignment, redelivery and storage charges may apply when requested by a Recipient. Please contact Infinity Drain's order desk for applicable fees.

Cancellation Policy

All orders for non-custom product canceled after forty-eight (48) hours will incur a ten percent (10%) cancellation charge. Custom orders are non-cancellable, non-returnable and non-refundable.

General Terms

All matters arising out of or relating to these Terms shall be governed by and construed in accordance with the laws of the State of New York without giving effect to any choice or conflict of law provision. Any legal suit, action or proceeding arising out of or relating to these Terms shall be instituted in the state courts located in Suffolk County, New York or the federal courts of the United States of America located in Suffolk County, New York, and each party irrevocably submits to the exclusive jurisdiction of such courts in any such suit, action or proceeding.

If any term or provision of these Terms is held invalid, illegal or unenforceable by a Court of competent jurisdiction, such invalidity, illegality or unenforceability shall not affect any other term or provision of these Terms or invalidate or render unenforceable such term or provision in any other jurisdiction. No waiver by Infinity Drain of any of the provisions of these Terms is effective unless explicitly set forth in writing and signed by Infinity Drain. No failure to exercise, or delay in exercising, any right, remedy, power or privilege arising from these Terms operates, or may be construed, as a waiver thereof. No single or partial exercise of any right, remedy, power or privilege hereunder precludes any other or further exercise thereof or the exercise of any other right, remedy, power or privilege.

These Terms cannot be modified or extended in any way whatsoever by any agent, dealer, distributor, service company, customer or other party other than by a writing signed by an authorized representative of Infinity Drain.

Compliance with Law

The Recipient shall comply with all applicable laws, regulations and ordinances and shall maintain in effect all the licenses, permissions, authorizations, consents and permits that it needs to carry out its obligations under these Terms.

Termination

In addition to any remedies that may be provided under these Terms, Infinity Drain may terminate these Terms with immediate effect upon written notice to Recipient, if such Recipient: (i) fails to pay any amount when due under these Terms; (ii) has not otherwise performed or complied with any of these Terms, in whole or in part; or (iii) becomes insolvent, files a petition for bankruptcy or commences or has commenced against it proceedings relating to bankruptcy, receivership, reorganization or assignment for the benefit of creditors.

Warranty

Limited Lifetime Warranty

This Limited Lifetime Warranty is extended only to the original purchaser of the unit under warranty and is valid only when bought through and registered by an authorized Infinity Drain retailer.

Exclusions

The above-stated limited lifetime warranty applies as long as damage is not caused by an accident, abuse, misuse, fire, insects, use of abrasive products or an act of God. Transport, handling or installation damages are also excluded. Any part that must be changed during the warranty period will be covered by the original warranty or for a two (2) year period following replacement, according to the first contingency.

Procedure

Any defect involving the manufacturer's liability shall be reported to Infinity Drain within ten (10) days of its occurrence. Drains claimed to be defective shall be held until inspected by an authorized representative of Infinity Drain, and upon their specific instructions, drains found to be defective will be repaired and replaced at Infinity Drain's choice. The liability of Infinity Drain with respect to the sale of this drain shall be limited to repair or replacement by a similar product as provided above and does not include any cost of removal, reinstallation, transport of defective product, loss of time, salary or any other expenses as well as any consequential damages of any kind. Infinity Drain and its representatives shall not be held liable for any injury, loss, cost or other damage, whether consequential or incidental, that arise from any defect covered under this limited warranty, even if Infinity Drain has been advised of the possibility of such damage.

Limitations

This Limited Lifetime Warranty replaces all other warranties, expressed or implied, in face or at law, including implied warranties of merchantability and fitness for a particular purpose. The terms of this limited warranty cannot be modified or extended in any way whatsoever by any agency, dealer, distributor, service company or other party other than Infinity Drain.

Legal Rights

This Limited Warranty gives specific legal rights and is not applicable if it interferes with any law or regulation in any state, province or country.

Shower Base Guarantee

Lifetime Product Guarantee
(INFINITY DRAIN, LTD. STAINLESS STEEL SHOWER BASE)

Infinity drain products have been manufactured under the highest standards of quality and workmanship. Infinity drain provides a lifetime guarantee on its stainless steel shower base (infinity drain ssb series only).

This guarantee is extended to the original installer of the product, the owner/developer of the installation site and the original owner of the finished product site (homeowner or landlord). This guarantee does not extend to any subsequent owners or users of the property. This lifetime coverage terminates upon the sale of the property to a subsequent owner of the property.

Infinity drain guarantees that our stainless steel shower base (infinity drain ssb series) will be free from any and all leaks as well as free from defects in material and manufacturing workmanship, when subject to normal use during the lifetime of the original owner as stated above.

If the aforementioned infinity drain product should develop a leak during the guarantee period as defined above, infinity drain will provide a replacement shower base (infinity drain ssb series) at no cost to the claimant under the guarantee. Infinity drain will further bear the cost of labor to remove and replace the defective infinity drain product and will restore the installation with the same "like and kind" materials originally used at no cost to the claimant.

This guarantee is applicable only to stainless steel shower bases (infinity drain ssb series) purchased directly from infinity drain or an authorized infinity drain retailer after may 1, 2019. Notwithstanding anything to the contrary herein, the maximum liability of each incident shall not exceed $100 per square foot for restoring the installation to its originally installed condition.

This guarantee is subject to the following limitations:

1. The guaranteed product must have been installed in accordance with the manufacturer's explicit installation instructions. Products not installed in this manner will not be covered.

2. Installation must be completed using any and all infinity drain recommended products, materials and procedures, where applicable.

3. Infinity drain shall solely determine whether the product was installed according to its installation instructions. Improper or inferior installation of such product will also expressly void this guarantee.

4. Any alteration to, or modification of the original design and manufacture of the infinity drain stainless steel shower base (infinity drain ssb series) will result in the voiding of this lifetime guarantee.

5. The original owner shall have the burden of establishing to infinity drain's reasonable satisfaction: (a) the date of the purchase of the product (b) that the product was purchased directly from infinity drain or an authorized retailer of infinity drain (c) the original owner's current ownership of the premises in which infinity drain's product was installed.

6. This guarantee will not cover claims for the following:
(A) damage to or failure of the guaranteed product resulting from acts of the homeowner, the installer or another third party
(B) damage to or failure of the product resulting from unreasonable use or the failure to reasonably maintain the product after the date of purchase
(C) damage due to installation error, product abuse, product misuse, or use of cleaners containing abrasives, or other organic or chemical solvents, whether performed by a contractor, service company, or the purchaser are excluded from this guarantee
(D) damage due to criminal acts, acts of terrorism or acts of god

7. Infinity drain will not be responsible for labor charges and/or damage incurred in installation, repair or replacement (other than those completed by an authorized infinity drain representative) in addressing a guarantee claim.

8. The provisions of this guarantee are in lieu of any other guarantee, either express or implied, including specifically, but not limited to, any guarantee of merchantability or fitness for a particular purpose.

9. The obligations and liabilities of infinity drain under this guarantee or under any implied guarantee which is applicable despite the preceeding disclaimer are in lieu of all other obligations or liabilities including, without limitation, liability for incidental, consequential and/or any other damages based upon any theory of recovery at law or in equity. These include specifically any theory or negligence, breach of contract, breach of guarantee or strict liability.

This guarantee is subject to the following customer responsibilities:
The guarantee claimant must notify infinity drain within thirty (30) days of discovering the basis for a claim under this guarantee. This notice must be made in writing and must provide proof of the date of purchase of the stainless steel shower base (infinity drain ssb series) from either infinity drain directly, or through an authorized infinity drain retailer, as well as proof of current ownership of the property where the product is located.

All notifications must be sent via email to: claims@infinitydrain.Com

Furthermore, the claimant may be required to submit photographic evidence, or other requested documentation, to infinity drain, along with or subsequent to their submission of a claim. Infinity drain will then investigate the claim in a timely manner. If a defect covered by this guarantee is confirmed by infinity drain, infinity drain will satisfy its obligation set forth under this guarantee within a reasonable amount of time.

Infinity drain must be allowed a reasonable opportunity to determine and fulfill its obligations under this guarantee before the original owner or others take any step to make repairs. Furthermore, infinity drain or its contractors or representatives must be given access, during regular business hours, to the site of the claim as needed. The claimant's failure to abide by the terms of this provision shall void any and all responsibility of infinity drain.

STANDARD FINISHES

From moody mattes to shiny polishes, Infinity Drain offers ten finishes to match warm and cool toned hardware alike. Our five standard finishes of Satin Stainless, Polished Stainless, Oil Rubbed Bronze, Satin Bronze and Matte Black are a similar match for contemporary (long-standing) luxury fixture finishes.

SPECIALTY FINISHES

If you're looking for something a bit more on trend, our five specialty finishes, Gunmetal, Matte White, Polished Brass, Polished Gold and Satin Champagne are comparable to finishes launched more recently in the fixtures space. All ten finishes are available to order by the SKU, however, the specialty finishes have a ten-day lead time.

Gunmetal

Color tone is a similar match to:
- Fantini Matt Gun Metal
- Kallista Gunmetal

Matte White

Color tone is a similar match to:
- Delta Matte White
- Dornbracht Matt White

Polished Brass

Color tone is a similar match to:
- Samuel Heath Polished Brass
- Delta Polished Brass

Polished Gold

Color tone is a similar match to:
- Gessi 246 Gold
- Fantini Gold

Satin Champagne

Color tone is a similar match to:
- Dornbracht Champagne Matt
