Back in the 1980 my family and I visited Tenerife.

We had arrived late afternoon and myself and my husband and two of my children were looking around the pool area. I was sitting in an area where other holidaymakers were sunbathing and, my youngest daughter was checking out the pool, she was wearing a sling on her arm having just had a plaster cast removed.

A lady in the area sat up and asked if that was my daughter and when I said yes, she asked if she could see my daughters' arm, I thought it strange because at the time I was not aware who I was talking to. I was assured by her companion not to worry as she was a medium. I believe too, so called my daughter over. Rosemary did not know where the break had been yet immediately put her hand on the spot.

What happened next, I will never ever forget and will always be grateful for her messages to me.

Remember I did not know this person at all, I was in a foreign country and had just landed. All I can say from the first words Rosemary spoke to me it was as if she had been sitting on my shoulder all of my life. Things only I would know, she knew, names of at least three generations. She also told me things I also knew nothing about and, could not believe at the time when she told me. Everything was true and I was astounded when on my return I relayed the event to my parents but did not get any confirmation of one particular family secret that Rosemary told me of until five months later.

When a sibling which Rosemary told me of turned up at my brothers' home, and eventually came to see me.

How could Rosemary have known this secret, no one even knew of him but, he provided documentation to my brother.

There was no doubt as the family resemblance was clear to see.

I will always remember that holiday fondly and I will never forget my chance meeting with Rosemary and what she told me, absolutely incredible is not strong enough words.

I would love to have another visit via Rosemary.

Sylvia
