

2024 Yolo County Homeless Count

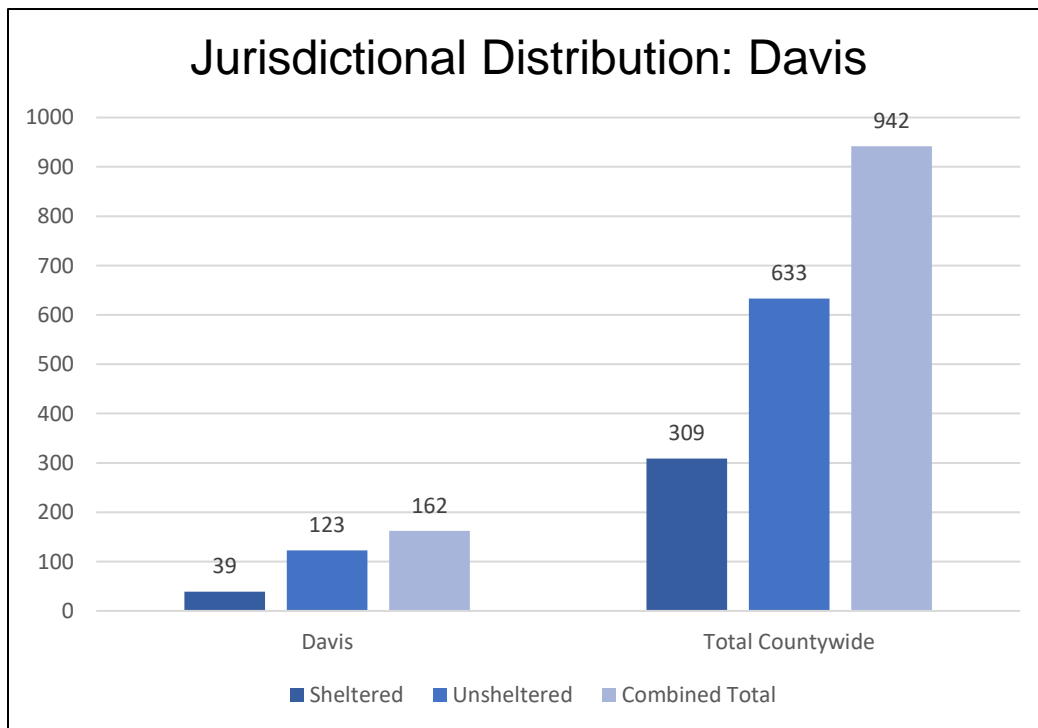

Davis, CA

- ❖ The Yolo County Homeless and Poverty Action Coalition conducted its 2024 Homeless Count on January 24, 2024. The Homeless Count (also known as the Point-in-Time (PIT) Count) is a survey of individuals and families identified as experiencing sheltered or unsheltered homelessness within the boundaries of Yolo County on a single night in January. The 2024 count identified a total of 162 people in Davis experiencing homelessness on January 24, 2024.

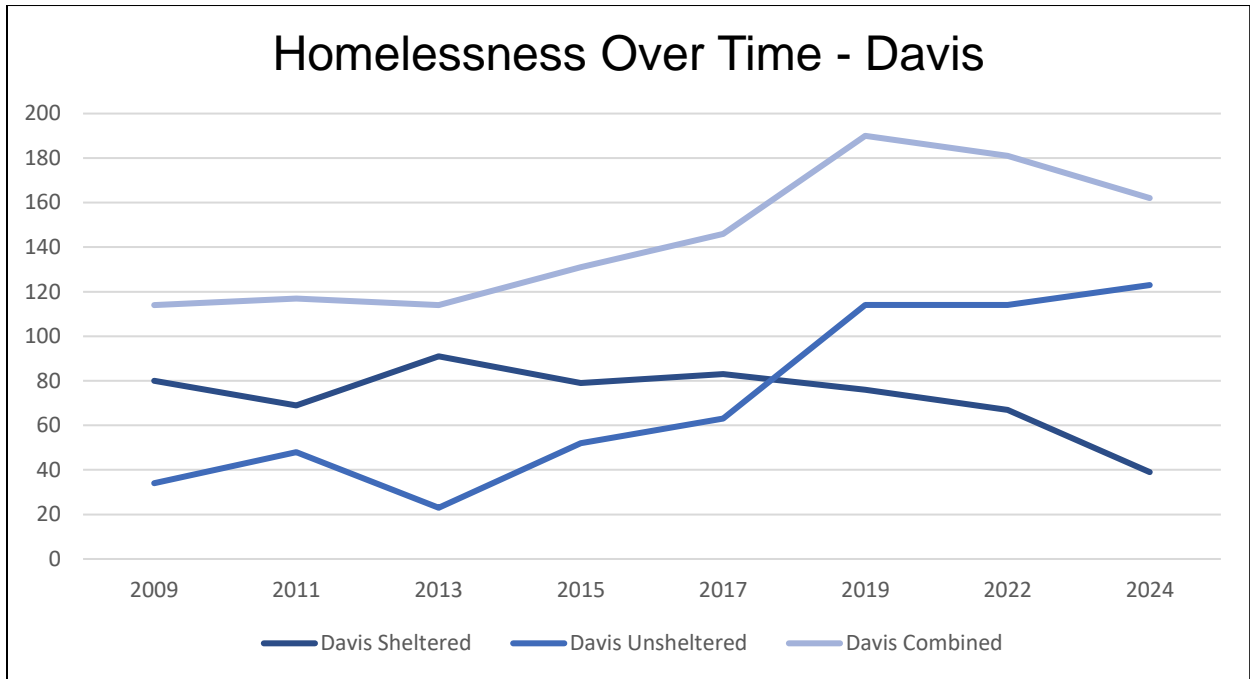

HOMELESSNESS ON A SINGLE NIGHT (JANUARY 24, 2024)

<i>Number of individuals experiencing homelessness per 10,000 residents</i>

HISTORY OF HOMELESSNESS IN YOLO COUNTY – UNSHELTERED ONLY

Questions related to History of Homelessness in Yolo County were only asked of individuals experiencing **unsheltered**

Where Lived Prior to Yolo County			
Lived in Yolo County All Life	2%	Other State	2%
Sacramento	5%	Other Country	2%
Other CA	10%	Unknown	79%

CHRONIC HOMELESSNESS

*Year range was not requested in this year's count, but is included as an area of improvement to ensure it is included in

Questions related to Chronic Homelessness were only asked of adults experiencing both sheltered and unsheltered homelessness.

Long-Term Homelessness is defined as continuously homeless for 12 months or longer.

Frequently Homeless is defined as homeless on at least 4 separate occasions within the last 3 years.

The Department of Housing and Urban Development (HUD) considers an individual to be “Chronically Homeless” when:

1) the individual has been homeless for at least 12 consecutive months, or homeless on at least 4 separate occasions, totaling 12 months or more, within the last 3 years;

AND

2) can be diagnosed with PTSD, a serious mental illness, substance use disorder, a developmental disability, or a cognitive or physical illness or disability.

Chronically Homeless Per HUD Definition (% of all homeless persons)

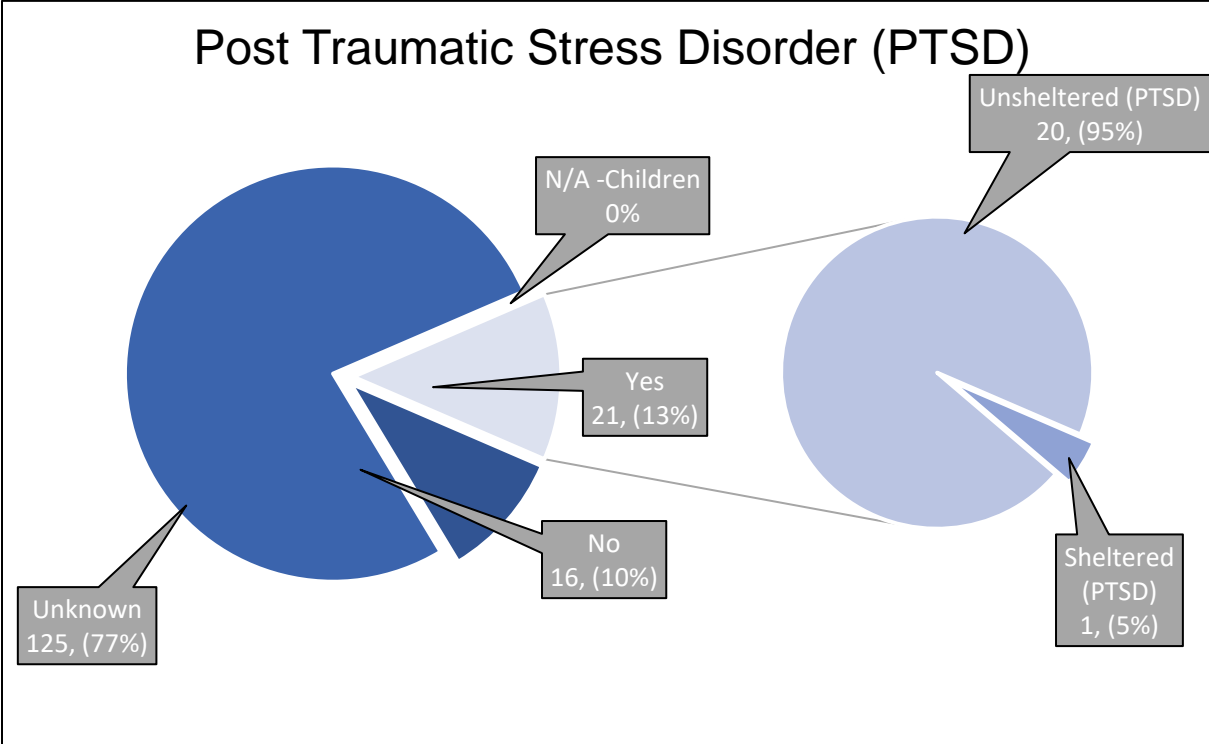

Health Status

PREVALENCE OF HEALTH ISSUES

Questions related to Health Status were only asked of **adults** experiencing both sheltered and unsheltered

It is important to note that since the data is self-reported, percentages likely underestimate true prevalence for all health status categories and number of health issues.

Serious Mental Illness (SMI)

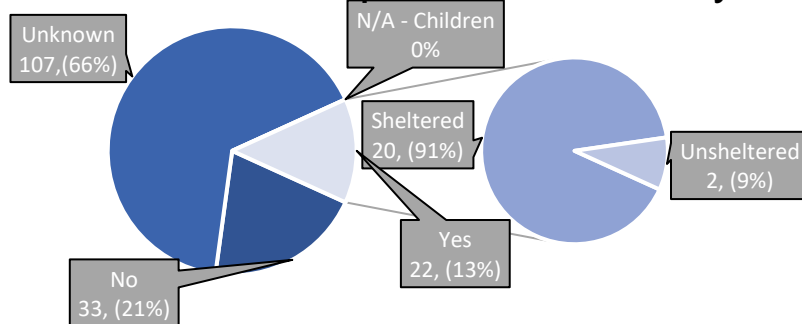

Substance Use Disorder (SUD)

Physical Illness or Disability

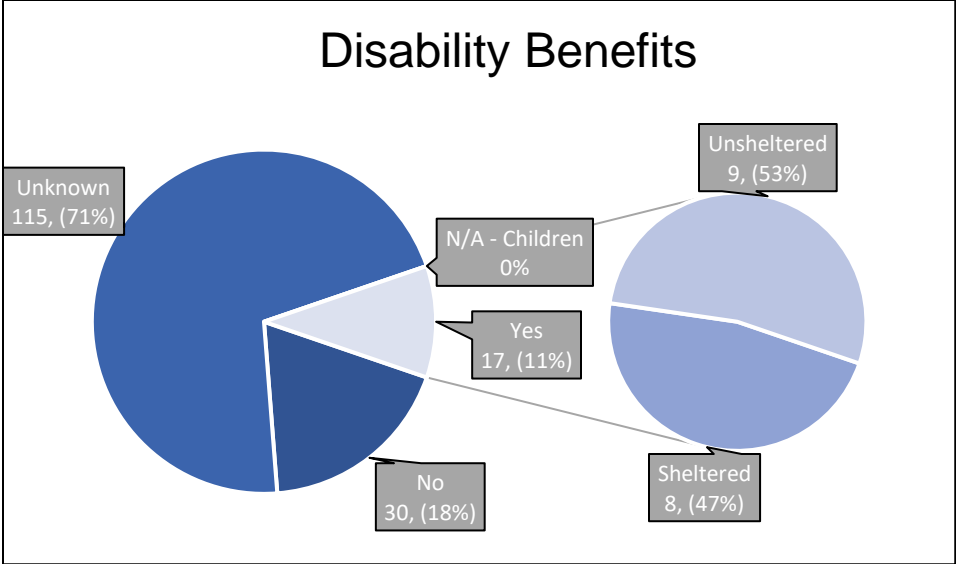

Developmental Disability

Co-occurring Mental Health & Substance Use Disorders (COD)

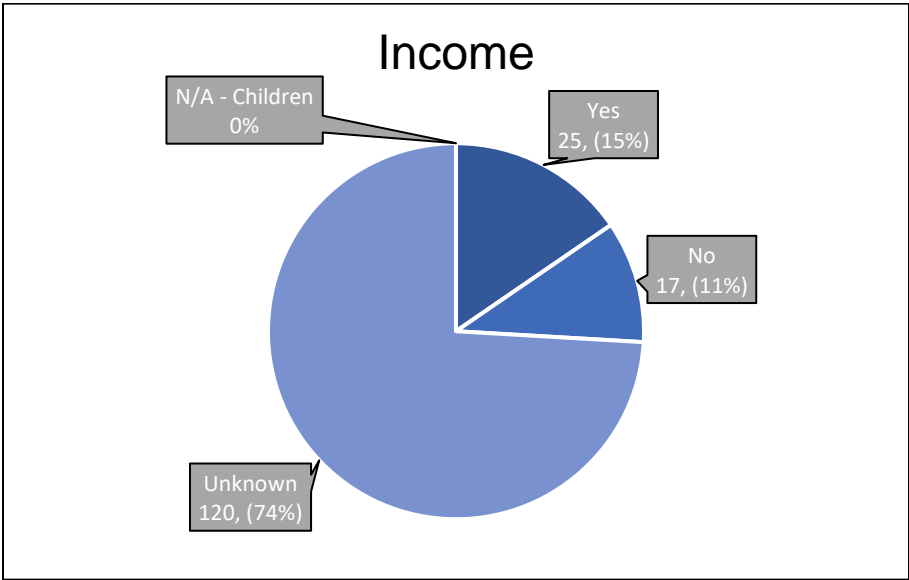

Personal Information

Questions related to Personal Information were only asked of **adults** experiencing both sheltered and unsheltered homelessness.

Animal Ownership

Eviction

Summary – 2024 Davis Data:

The 2024 count identified a total of 162 people in Davis experiencing homelessness on January 24, 2024. Of these 162 people, we found 123 people to be unsheltered and 39 to be considered sheltered. While comparing the number of individuals in Davis experiencing homelessness from 2022-2024, we can see an overall decrease of 10.5%. Countywide homelessness has consistently increased since 2009 with an overall significant increase from the years 2017-2022 (sheltered/unsheltered) of 62.5%. Additionally, in the current year the homeless population has increased to 942 individuals experiencing homelessness, an increase of 26.2%. Of the total number of individuals in Davis, we found that most of the people fall in the age range of 25+ with 95 individuals falling in this category compared to only 36 in the “Older Adults” category. The prevalent household type for those experiencing homelessness was people in households without children, compared to those with children which includes single individuals, coming in at 98%.

Based on gender, Davis findings show that 99 are males, 24 are females, and 39 are unknown. In terms of race and ethnicity, report found that of those experiencing homelessness 27% are White, 3% are White & Hispanic, 2% are American Indian/Alaska Native, 2% are Asian or Asian American, 5% are African American, 4% are Hispanic/Latino, 1% are Native Hawaiian or Pacific Islander, 2% are multiple races, and 54% are unknown.

The most reported ‘unsheltered’ location was “Outside”. Seasonal emergency shelter was among the top sheltered locations with 24 people utilizing them. The study also found that 23% of people are experiencing long-term homelessness, 14% of people are considered frequently homeless, and 21% of people are experiencing chronic homelessness. Among the 162

individuals found to be experiencing homelessness in Davis, 13% are suffering from Post-Traumatic Stress Disorder (PTSD), 17% have some form of Serious Mental Illness (SMI), 22% are dealing with a substance use disorder (SUD), 14% have a Development Disability, 25% have a Physical Illness or Disability, and 10% have Co-occurring Mental Health & Substance Use Disorders (COD).¹

Statistics show that only 15% are receiving some form of income while 10% have no income. 5% have become homeless because they were facing eviction. Based on results, we found that 16% have experienced domestic violence in the past and 12% of people are currently fleeing a domestic violence situation, with 64% of the Davis homeless population being unknown.

Limitations of the count:

When considering the numbers in the count it is important to recognize that they reflect only those persons identified as homeless within the county on a single day. Many people move in and out of homelessness during the year, meaning that the actual number of people experiencing homelessness in 2024 may be much higher than the numbers included in this report.

Additionally, the count does not include people who are doubled up in conventional housing; people who are couch surfing; adults living in a mental health facility, chemical dependency facility, criminal justice facility, or permanent supportive housing; or youth living in residential treatment facilities, emergency foster care, or detention facilities. People living in these circumstances do not meet the HUD definition of homelessness, and therefore, cannot be included in the count.

We also encountered more "unknowns" during this count because sheltered individuals were not required to complete the survey. In addition, a higher percentage of people who are unhoused either refused to complete the survey and/or teams conducting the count were unable to conduct the full survey, resulting in a larger number of visual counts. Thus, we were not able to capture all demographic data. Lastly, if an individual completed a survey outside the city limits their number count was included in the Winters/Rural Area totals. If a survey was not completed and the individual was not in a shelter, or an individual marked that they did not want to disclose their location, the system would assign a location of 0 latitude and 0 longitude, which placed them in Africa. These numbers were also included in the Winters/Rural Area count, thus the total homeless population may not be completely represented in these numbers.

¹ The above populations sizes are an estimate as there were X number of unknown results that may impact this data. Please refer to data tables for exact number of unknown results for each category.
