**FOR IMMEDIATE RELEASE**  
October 15, 2014

### **The greatest invention for Car Dealers since the paint meter!**

Invis-a-Beam LLC located in Naples Florida, has just released their new product called the LOT-MASTER™.

The LOT-MASTER™ is a single user, three part infrared system that uses two Infrared Head Units coupled with an RF Radio Receiver that has the capability to align objects in a straight line at distances of 20 feet to 330 feet (100 meters), accurate within 1/8 of an inch, making this system perfect for aligning automobiles, trucks, and RV's, giving an extraordinary presentation.

Using the latest infrared technology coupled with advanced optics, state of the art electronics and advanced software techniques our revolutionary products are in the forefront of precision long-range alignment systems.

Assembled in the USA, we only use quality electronic components, high quality materials and durable anodizing and powder coating along with extensive quality control testing, our products are held to the highest manufacturing standards.

Learn more about the LOT-MASTER™ and Invis-a-Beam LLC on our websites: [Invis-a-Beam.com](http://Invis-a-Beam.com) and [Lot-Master.com](http://Lot-Master.com) and our Production Video at: <https://www.youtube.com/watch?v=YmXJ-EWxGyw>.
