FOR IMMEDIATE RELEASE
March 12,2015

Invis-a-Beam LLC receives Canadian IC Certification.

Invis-a-Beam LLC located in Naples Florida, has just released their approval of Canadian IC Certification of their products the LOT-MASTER® and the LINE-WIZARD®. Both products will be available to the Canadian market immediately.

Invis-a-Beam manufactures single user, long range, infrared aligning systems for the automotive and construction industries.

Using the latest infrared technology coupled with advanced optics, state of the art electronics and advanced software techniques our revolutionary products are in the forefront of precision long-range infrared alignment systems.

Assembled in the USA, we only use quality electronic components, high quality materials and durable anodizing and powder coating along with extensive quality control testing, our products are held to the highest manufacturing standards.
