

Your Guardian in Safety Tech

Presented by GRID Inc

HALO Impact Detection

- Only device sold directly to parents
- Modular: Works with all helmets
- Sends instant alerts
- Works over 3-mile range
- 6+ year battery (no charging/replacing)
- Affordable and simple

Market Opportunity

- Youth Football: \$400M
- Total Addressable Market: \$320 billion
 - Cycling
 - Skiing/Snowboarding
 - Construction
 - Military

The Problem

Parents and coaches can't see when a dangerous impact occurs. Concussions often go unnoticed, with over 1 million undiagnosed in youth sports every year.

The Solution

GRID Inc created HALO, the only real-time, head-impact detection device sold directly to parents—designed to alert, evaluate, and protect youth athletes with long-range communication and 6-year battery life.

The Stage

Proof of concept complete. Seeking funding to complete prototype development, field testing, and finalize manufacturing
