

We've helped clients optimise their SAP Ariba solution and realise the true benefits available

estrat **SAP Ariba** Services

Buyer-Focused Support

Most SAP Ariba deployments utilise only a small amount of the available capability. Many organisations struggle to realise the benefits of their investment due to a lack of skilled resources.

Our team of SAP Ariba experts can assist with:

- Best-practice process & solution architecture
- Incident resolution for Ariba S2C, SLP, P2P, Network, SAP ERP P2P processes
- New release readiness, system optimisation & expansion
- Training development & delivery

estrat Managed Services - a modern approach to cloud application support

Analyse

Evaluate your desired use versus current configuration & provide opportunity report

Optimise

Modify the system configuration to simplify current pain-points and utilise full capability. Resolve incidents quickly

Adopt and Realise

Evaluate & adopt improved features, train users regularly, and support the learning journey
