

TTGStreamz Support Guide

How to Install & Set Up the App Using Downloader (All Compatible Devices)

This guide will walk you through reinstalling and logging into the TTGStreamz app on any compatible device, including Firesticks, Android TV Boxes, Smart TVs, and more.

Supported Devices:

- **Firestick / Fire TV**
 - **Android TV Boxes** (e.g., X96 Q Pro, Nvidia Shield, T95)
 - **Smart TVs with Android TV OS**
 - **Chromecast with Google TV**
 - **Android Tablets & Phones**
-

Step 1: Open the Downloader App

If you don't have it, download **Downloader** from your device's App Store.

Step 2: Enter Quick Install Code

In the Downloader app, enter the code below and press **Go**:

96248

This will begin downloading the TTGStreamz app.

Step 3: Install the App

- Click **Install** when prompted.

- After installation, click **Open** to launch the app.
-

Step 4: App Setup Instructions

Once the app opens:

1. Click “TV” and Save

- Select the **TV** option and press **Save**.

2. Click "Login with Xtream Codes API"

- This is the login method required for TTGStreamz.

3. Enter the Following Info:

- **Any Name:** This is a nickname for your account — it can be anything.
- **Username:** *(Enter exactly what was sent to you)*
- **Password:** *(Enter exactly what was sent to you)*
- **DNS / URL:** *(Must match what we provided — type it exactly)*

 All login fields must match the details we sent you **exactly** or it will not work.

Having Trouble Logging In?

If you're seeing a login error or cannot connect:

1. Double-check that the **username, password, and DNS** are entered exactly as provided.
2. If it still doesn't work, email us at:

 ttgstreamz0@gmail.com

Include a screenshot if possible, and we'll get you streaming ASAP.
