

CONSTRUCTION MANAGEMENT

BRYCE PERKINS

Managing multi million dollar projects from residential remodels has taught me that success lies within the fine details. Bringing together all the elements of a successful project requires precise communication and timing. The flawless execution of a well designed plan is always the best case scenario. But, what happens when things don't exactly go according to plan? A project manager with knowledge, and experience can make all the difference. The ability to problem solve on the fly, and effectively communicate changes is a talent not all possess. With over twenty years of experience in commercial, and residential construction I've put in the time to learn the lessons. Albeit sometimes the hard way.

PROJECT MANAGER

Highly skilled and experienced construction project management for all civil and architectural scopes of work.. As your project manager I schedule labor, delegate tasks, facilitate logistics, control quality and safety; reporting directly to you on the daily progress of your projects. Maintain schedule, quality and compliance for \$500 a week per project.
