Civil and Architectural Construction

800.716.7307 bryce@beesindustries.com

33 Kalamath Street, Denver, CO 80223

Bees Industries Incorporated, a registered Colorado company, has been doing business nationally from Colorado since 2011. We are a privately held, non-union, sole proprietary corporation with offices in Denver Colorado and Tampa Florida. Currently doing business as Hands On Tech, Wall Detail, and OWL Environmental – all limited liability companies owned by Bees Industries Inc. As a general contractor and subcontractor service provider we represent your organization with integrity. Contributing to the success of commercial and multifamily residential construction projects, including LEED and HUD certified projects. Currently working towards LEED and HUD certifications while holding national OSHA and SWPPP design/inspection certifications. Our completed projects include:

- High Rise Office
- Multifamily Residential
- Retail & Restaurant
- Manufacturing
- Health Care
- Schools & Institutions
- Church/Religious

As qualified construction professionals from Colorado we perform 100% of the work ourselves, we do not use agency labor. Your project is our only priority until completion. Never in our work history have we failed to complete or been terminated from a project.

***“Responsive, professional and a great value for design needs.
Their turnaround time was fast and accurate,
definitely using them again!” –Bryce Ballew***

Always a debt free and completely solvent company with extended lines of credit from our banks and vendors. Having never had a claim made, or a tax lien levied against our performance. Never have we pledged our accounts to factoring, been placed in receivership, or filed for bankruptcy.

Carrying appropriate insurance policies protects all our many employees, clients, and the public from all the things that could go wrong on a project jobsite and throughout the warranty period. With a minimum of \$2 million in general liability, commercial auto, and worker's compensation, we are all well protected but work diligently to never have to use it. Umbrella policies and project bonds are added as needed.

- General Liability – NXTCCQ939H-00-GL
- Professional Liability – NXTCCQ939H-00-GL
- Commercial Auto – Progressive Policy 961714657
- Worker's Compensation – Pinnacol Assurance Policy 4249241

Regulatory compliance is a critical aspect of our operations. Maintaining a safe and productive job site is our highest priority, which we believe directly affects the outcome of a precise finished product. To maintain quality control, we do not use temporary labor from staffing agencies. Listed below are the measures we take to ensure the expectations of our clients are exceeded.

- E-Verify and Federal Prevailing Wage Reporting.
- Pre-employment, random, and post-accident drug testing.
- Full-time safety director with a written safety program.
- Training program with weekly toolbox talks.
- Quality control program with regular job-site audits.

“I’ve had the pleasure of working with Bryce through my most successful seasons. He has helped me tremendously in a short period of time grow in a competitive industry.” –Patryk Holly

Our certified professional builders are well trained and highly capable of installing civil and architectural construction materials according to municipal code and manufacturer specifications. We safely operate all jobsite equipment and always follow every OSHA regulated safety procedure.

- Scaffolding
- Cranes, Pump Jacks, and Lifts
- Fall Protection
- Confined Spaces
- Electrical Safety

Employing a fulltime office staff in Denver and Tampa directing resources nationally with the intention of growing to meet existing and future demand. Please contact our management staff at any time with any questions or concerns that you may have regarding current or future projects. We are always available to help.
