

UK MoD – Inventory Management Transformation

Guy led a mixed team of EY consultants, civil servants and interim contractors in the design and delivery of a supply chain transformation program with the objectives of:

- creating a new supply chain strategy
- reducing inventory value
- reducing purchasing spend and
- creating sustainable structural change

Key achievements:

- Delivery of a Supply Chain Strategy, remodeled Supply Chain structure, process and S&OP adopted into policy and set of Inventory Management Strategic Objectives
- £375m inventory reduction and purchasing spend reduction of £27.25m per annum
- Developed key client stakeholder relationships in a highly challenging, complex environment
- Developed supplier relationship, process and procedure and delivered prime supplier contract amendments to include inventory management obligations
- Successful delivery of projects and value delivered to the client led to selling further work of £2.5m
