YOU HAVEN'T MISSED THE AI TRAIN.
## YOU'RE ALREADY ON IT.

Use the Microsoft tools you already have to start your AI journey with confidence.

AI projects fail without a plan

40% of agentic AI projects will be cancelled by 2027.[1]

Many AI projects stall early because organisations dive in without a clear plan, defined ROI, or understanding of their existing tools.

50% of companies will walk back plans to replace people with AI.[2]

[1] Gartner, 40% of Agentic AI Projects Cancelled, June 2025.
[2] Gartner, 50% to Abandon AI-Driven Workforce Cuts, June 2025.

iCatalyst helps you avoid costly missteps by building an AI plan around **what you already use.**

If you're using Microsoft 365 or Dynamics 365, you're already on the track

Most organisations don't realise Microsoft tools (e.g., Microsoft Dynamics 365 (D365) or Microsoft 365 (M365)) already include AI.

Your current licence may already include Copilot.

You don't need to rip anything out or start again.

You need a way to activate what's already there and use it well.

iCatalyst shows you how to turn on Copilot, train your team, and **get results quickly.**

01 Understand your current state
Assess AI readiness using the iCatalyst maturity model.

02 Activate what you already have
Identify which Copilot features your Microsoft licence includes, and train teams to use them.

Turn scattered efforts into a clear roadmap

03 Close the gaps
Extend off-the-shelf tools with Power Platform, Copilot Studio, or Azure integrations.

04 Build real solutions
Start small with focused agents and test and scale into multi-agent workflows.

Start where you are. Build from there.

Level 0	Level 1	Level 2	Level 3	Level 4
No Microsoft AI	Copilot is available as part of a Microsoft licence (D365/ M365) but is not used	Basic Copilot features are being used (e.g., conversational agents for summarising and drafting)	Copilot extended or custom configured to work in scope with business requirements	Autonomous agents are driving business processes

iCatalyst maps your AI maturity and helps you move forward with clarity and control.

Extensive expertise.
Global experience.
Local team.

- Senior expert consultants with deep knowledge in Microsoft Dynamics 365 ERP, CRM, and the Power Platform.
- Trusted by Australia's mid-sized businesses, leading enterprises, and government agencies.
- Strategy-first mindset grounded in business value.
- Hands-on, personalised service backed by local expertise.

Partners in business transformation

If your organisation uses Microsoft 365 or Dynamics 365, you already have the foundation for AI.

Let iCatalyst help you assess your AI readiness and map out a smarter path forward.
