iCatalyst

Microsoft Power Platform

# The power behind business innovation and efficiency

Solve business challenges faster

Revolutionise your business operations with Microsoft Power Platform, powered by iCatalyst's team of senior solution experts.

We'll demonstrate you how end-to-end automation and process modernisation can **reduce reliance on manual or paper-based processes, eliminates time-consuming repetitive tasks**, and ultimately boost productivity and efficiency for everyone.
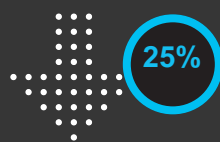

Take advantage of transformation projects offering rapid ROI and value to market

Increase in average ROI of

224%

Organisations using Power Platform report an average ROI of 224%.

Reduce time consumption by

25%

On average, employees save up to 25% of their time on tasks due to automation and streamlined processes.

Reduce time and effort

With extensive experience implementing Microsoft Business Applications, iCatalyst can help you eliminate more repetitive tasks through low-code solutions powered by Power Platform. Our expertise enables us to securely automate processes across your organisation with solutions that include Digital Process Automation (DPA), Robotic Process Automation (RPA), Conversational AI, and Process Mining.

Here are 3 benefits
when you optimise with automation

Impact through empowerment

Amplify process improvements to reduce errors and increase efficiencies; empowering your teams to achieve more with less.

Drive your engagement

Build secure, customisable Apps and solutions for customers and partners that boost engagement and cater to your needs.

Governance at scale

Equip your teams with built-in administration and security controls that enforce best practices while maintaining a secure, compliant organisation.

iCatalyst with Microsoft technologies is ensuring Western Australia's popular container recycling scheme continues to make an impact.[2]

> **Having built our solution on the Power Platform allows us to quickly respond to changing business needs. As WARRRL's needs evolve, the platform can be easily extended and customised to accommodate new capabilities, thus ensuring long-term value for WARRRL."**
>
