

The power behind your existing technology

iCatalyst is here to help you **improve and extend your core systems.**

Optimise your current technology landscape by integrating with and extending the reach of your existing lines of business applications.

89%

of CIOs and IT pros surveyed say low code is effective in increasing efficiency.¹

Your teams have innovation at their fingertips

with iCatalyst and Microsoft Power Platform.

Are you currently managing your teams across multiple, disconnected business applications? We provide a host of low-code solutions to help simplify and ensure your core systems are optimised to interact together seamlessly, providing you with agility and flexibility across your business.

Improve processes and data transparency

Integrate existing, disparate technology and core third-party applications, including SAP, Oracle, Workday, ServiceNow, and Salesforce, for a common reporting solution.

Extend your core line of business (LOB) systems

Introduce business and industry processes tailored to your unique requirements using apps, flows, chatbots, and dashboards to enhance integration and user experience.

Leverage your existing investments

Implement a modern, cloud-based solution that can streamline manual processes often hindered by disjointed systems, enabling collaboration, boosting data transparency, and extending the life of your core systems.

Unlock company-wide insights and trends

Gather, integrate, and utilise disparate data sources to achieve real-time, actionable insights that inform strategic decisions and identify current business trends.

Achieve rapid return on investment

Unlock faster time to value, driving enhanced ability and efficiency by leveraging Power Platform's low-code solutions combined with iCatalyst's extensive expertise and best practice methodologies.

iCatalyst and Power Platform can help you:

Quickly build solutions

on top of your core systems data with 1000+ prebuilt connectors.

Build custom connectors

to consume and expose data through a secure gateway.

Empower a mobile workforce

through mobile-responsive apps enabling work from anywhere, on any device.

Extend your core systems

with native integration to the Microsoft ecosystem including Azure and Microsoft 365.

With Power Platform and iCatalyst, Proglity Global **delivers operational efficiencies**²
