

THE LUCAS DEVICE

A SMALL DEVICE. A HUGE DIFFERENCE.

Water Wheel Fire & Medical District is working to bring the LUCAS Device to our life-saving equipment. Your support will help us add this life-saving technology to our rural community.

WHAT IS THE LUCAS DEVICE?

The LUCAS Device (Lund University Cardiac Assist System) is a mechanical CPR system that delivers continuous, high-quality chest compressions at the proper depth and rate—exactly what patients in cardiac arrest need, especially during transport or in difficult conditions.

CONSISTENT. RELIABLE. PROVEN.
So our team can focus on saving lives.

WHY IT MATTERS FOR OUR DISTRICT

CONSISTENT COMPRESSIONS

Provides uninterrupted CPR at the correct depth and rate—even during long transports or in challenging conditions.

BETTER OUTCOMES

Helps maintain blood flow to vital organs and the brain—improving the chance of survival.

BUILT FOR RURAL CARE

Ideal for long transport times, rough terrain, and limited staffing—situations we face every day.

SUPPORTS OUR TEAM

Frees up our providers to focus on airway, medications, and advanced life-saving care.

ONE DEVICE. ENDLESS IMPACT.

STRONGER COMMUNITY

Investing in better tools means better care for our neighbors.

MORE LIVES. MORE HOPE.

Every second counts. This device helps turn those seconds into second chances.

A SMART INVESTMENT

A lasting addition that will serve our district for years to come.

Help Us Reach
OUR GOAL!

Our Sparks Auxiliary is hosting fundraisers to help make the LUCAS Device a reality.

TOGETHER, WE CAN MAKE A DIFFERENCE.

Thank you!

**WATER WHEEL
FIRE & MEDICAL DISTRICT**

*Proudly serving our community with
compassion, care, and commitment.*

**THANK YOU FOR SUPPORTING
YOUR LOCAL EMS TEAM!**

Your support today helps us save lives tomorrow.
