

Open Water®

NOT PLASTIC

7.0 pH

73%

RECYCLED MORE
Packed in the most often recycled beverage packaging on the planet.

ELIMINATE PLASTIC
Say bye, bye to 10+ grams of plastic every time you grab an Open Water instead.

BALANCED
Open Water has a neutral pH, just like your body.

MADE OF RECYCLED ALUMINUM
To drive down emissions.

SOURCING LOCALLY
Over 2/3 of the U.S. population lives under 500 miles from an Open Water source.

WHO THE HECK IS OPEN WATER?

If we were a “normal” water company, this is where we’d try to convince you to care about bazillion-year volcanic filtration or a faraway exotic island spring. And while Open Water is crafted to be the highest quality, best tasting water, we believe it’s about time to talk about something that matters even more: keeping plastic out of our oceans.

As a pioneer of the canned water space, Open Water has eliminated the need for over 150 million plastic bottles. Open Water measures its entire carbon footprint, reduces emissions where possible, and invests in offset projects. A portion of every sale also goes to our Sea Change Grants program, supporting ocean conservation non-profits.

Open Water products are available at thousands of grocery stores, restaurants, hotels, and attractions across the country and online at drinkopenwater.com.
