CompTIA A+ Core 1 (220-1101)

Eğitim İçeriği

1. **Installing Motherboards and Connectors**
    a. Summarize client-side virtualizatiomCable types and connectors
    b. Install and Configure motherboards, CPU and add-on cards
    c. Explain Legacy Cable Types

2. **Installing System Devices**
    a. Install and Configure Power Supplies and Cooling
    b. Select and Install Storage Devices
    c. Install and Configure System Memory
    d. Install and Configure CPUs

3. **Troubleshooting PC Hardware**
    a. Apply Troubleshooting Methodology
    b. Configure BIOS/UEFI
    c. Troubleshoot Power and Disk Issues
    d. Troubleshoot System and System and Display Issues

4. **Comparing Local Networking Hardware**
    a. Compare Network Types
    b. Compare Networking Hardware
    c. Explain Network Cable Types
    d. Compare Wireless Network Types

5. **Configuring Network Addressing and Internet Connections**
    a. Compare Internet Connection Types
    b. Use Basic TCP/IP Concepts
    c. Compare Protocols and Ports
    d. Compare Network Configuration Concepts

6. **Supporting Network Services**
   a. Summarize Services Provided by Networked Hosts
   b. Compare Internet and Embedded Appliances
   c. Troubleshoot Networks

7. **Summarizing Virtualization and Cloud Concepts**
   a. Summarize Client-side Virtualization
   b. Summarize Cloud Concepts

8. **Supporting Mobile Devices**
   a. Set up Mobile Devices and Peripherals
   b. Configure Mobile Device Apps
   c. Install and Configure Laptop Hardware
   d. Troubleshoot Mobile Device Issues

9. **Supporting Print Devices**
   a. Deploy Printer and Multifunction Devices
   b. Replace Print Device Consumables
   c. Troubleshoot Print Device Issues
