Metal prints

- Sharp square edge, color corrected
- High gloss- shows off detail and vibrance
- Float mount hanger- attaches to the back, the art will sit 1/2inch from the wall. Sawtooth backing on the float hanger OR 3/4 inch inset frame so print appears to float away from the wall. You may choose French cleat or wire hanger. (see next sheet for details.)

Float Mount Hangers

Our Float Mount Hangers are attached to the back of the print, and float the print 1/2-inch off the wall when hung. Styles and selection vary based on the size of the print ordered.

3/4" Inset Frame

3/4" Inset Frames are a great alternative to our Float Mount Hangers. Inset Frames are recessed from the edges of the print, so the print appears to float away from the wall when hung. Available in silver, with your choice of a French Cleat or Wire Hanger.
