Our Site # 117. Our living room side was quite large, nicely shaded, fire ring, picnic table., and cement patio. Plenty of space for Indi and Rubi to explore while

leashed at our site. Rubi especially loved the birds. Camp site map (even though it says attractions): <http://niagaraheartlandrv.com/local-attractions>

 Our stay: Monday August 19 – Monday August 25 2024

 Cell/Internet/WiFi/Starlink/etc: There are plenty of large Willows and Weeping Willow trees, but our Starlink worked fabulously on top of our Pole Buddy extension from our ladder.

 Would we revisit? We would revisit the area but choose another campground for variety. Although we enjoyed our site very much and the people were very friendly, the condition of the majority of the seasonal RV's were run down. There were plenty of gnats and mosquitos due to the ponds and lakes throughout the grounds. Our Thermacell and fan made being outdoors much more enjoyable. Rules listed that no washer or dryers were allowed. For only a \$5 charge they allowed us to wash our RV and truck which was a plus. The grounds were well groomed and clean. We met several nice people and couples, some of whom were seasonal or some traveling through.

Area Attractions we did:
