

Biobritte Quality Standards

The way we work

The following document is for information purpose for our all consumers, distributors and Importers.

**Quality Control Departement
2019-2020**

Introduction:

Biobritte Agro has been granted ISO affirmations for having built up and applying for the ISO 9001:2015 QMS, ISO 22000:2018, And GMP/cGMP after evaluation by Inspection Teams.

Biobritte Agro has a well-prepared group of lab specialists who guarantee that mushrooms fulfill every single universal rule. Biobritte Agro Mushrooms are handpicked, reviewed and stuffed quickly to look after freshness.

Biobritte Agro Farms sells more than 70 tons of strength mushrooms every year. Biobritte sells more than 50+ sort of mushrooms spawn and 12+ kind of mushrooms. Other than food unit manufacturers more than 200+ mushroom food items.

**Quality is our
responsibility.**

- d) To effectively communicate food safety issues to interested parties within the food chain.**
- e) To ensure that the organization conforms to its stated food safety policy.**
- f) To demonstrate conformity to relevant interested parties.**

GMP/cGMP

Good Manufacturing Practice (GMP) is a term that is recognized worldwide for the control and management of manufacturing, testing and overall quality control of food and pharmaceutical products. GMP takes quality assurance approach, which ensures that products are consistently produced and controlled to the quality standards appropriate to their intended use and as required by the marketing authorization.

GMP addresses issues including documentation, record keeping, personnel qualifications, sanitation, cleanliness, equipment verification, process validation, and complaint handling. Most GMP requirements are very general and

open ended, allowing each manufacturer to decide individually how to best implement the necessary controls.

The quality approach of GMP ensures manufacturing, enabling companies to minimize or eliminate instances of contamination, mix-ups, and errors. This in turn, protects the consumer from purchasing a product, which is not effective or even dangerous.

Internal Quality Monitoring Committee

In order to keep all International Standards *“Biobritte Agro Solutions Private Limited”* made an Internal Committee *“Internal Quality Monitoring Committee”* which monitors working of staff, packing of staff and quality of food products which are packed in packing houses. If necessary it suggests and gives trainings to new staff and arrange meetings if necessary with board of director to suggest any changes in our packing and distribution systems. This committee consist team of lab person, doctor, pharmacist and mushroom packing head.
