

A white axolotl with prominent pink, feathery gills is perched on a large, textured, brownish-grey rock. The axolotl's body is pale and translucent, and its long tail extends towards the bottom left. The background is dark and out of focus, suggesting an aquarium environment.

# axolotls

By Ammon g. golladay 2025/1/22.

# Their diet

small prey like worms, insects, and fish.

The one I want

# Where do axoaltols live

Lake Xochimilco and Lake Chalco in the Valley of Mexico.

# Are Axolotls endangered

yes

A white axolotl with prominent pink and blue feathery gills is shown in an aquarium. The axolotl is positioned in the center-right of the frame, facing towards the right. It has a white body and blue eyes. The background includes various green aquatic plants and a sandy substrate. The text "What they are" is overlaid in white, bold font, and "Amphibian" is overlaid in a smaller white font below it.

# What they are

Amphibian

# Pictures of axoalotls

# Their predators

large fish, birds, and human activities.

A pale, cream-colored salamander with brownish spots and feathery, pinkish appendages is centered in the frame against a dark, textured background. The text "The end" is overlaid in white, with "The" positioned to the left of the salamander's head and "end" to the right.

The end

# Any questions
