- Post Malone
- Playboi Carti
- Billie Eilish
- Luke Combs
- Tate McRae

# WHERE MUSIC CAME FROM

- The exact origins of music are unknown, but it's clear that music has been part of human society for thousands of years.

# HOW DO YOU MAKE MUSIC

- **Learn an instrument:** You can train your ears and learn to play an instrument.
- **Write music:** Practice writing music and melodies.
- **Set up a studio:** You can set up a studio at home or rent a space.
- **Use a DAW:** A digital audio workstation (DAW) is a software program that allows you to create, record, arrange, mix, and master sounds. Some free DAWs include GarageBand and Movavi Video Suite.
- **Record and mix:** Record vocals and instruments, and then mix the tracks together.
- **Master:** Master the final mix to improve the sound quality. Music production is a complex field that can take months or years of study and practice to master. However, anyone with a working set of ears can learn music production, even if they don't understand music theory.

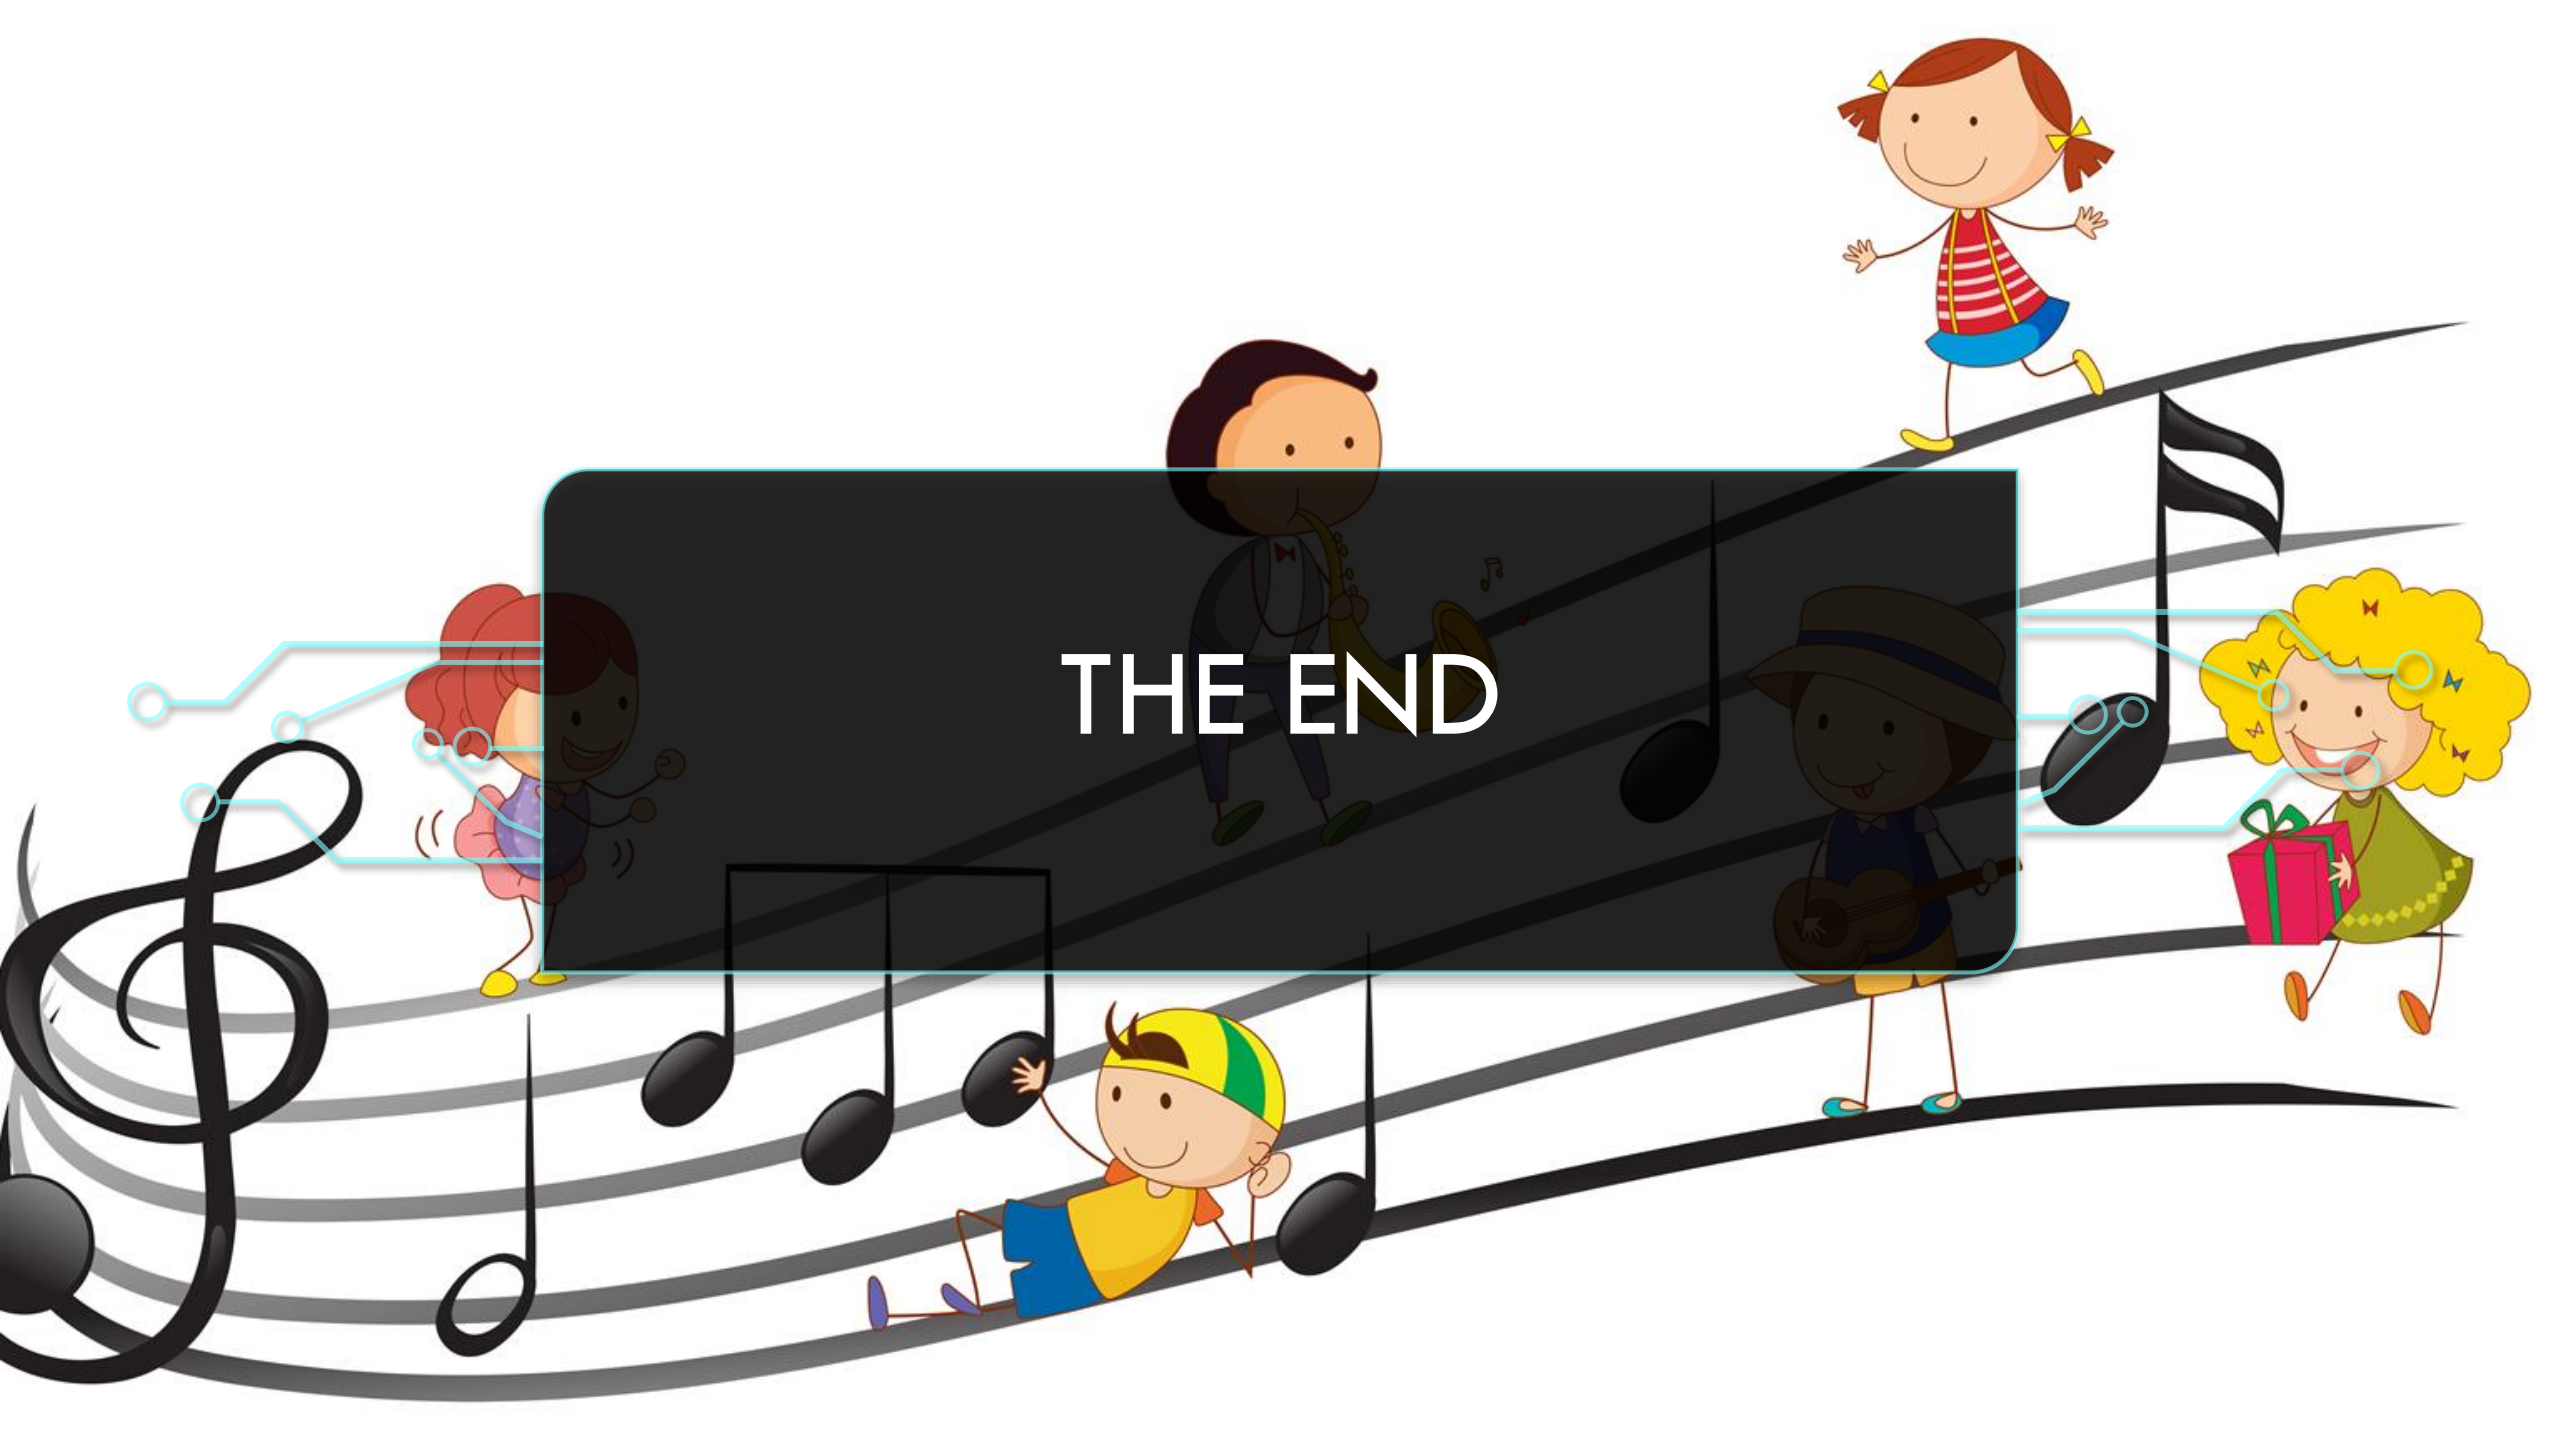

# FUN FACTS

- **Jazz origins:** Jazz was created by adding influences like blues, ragtime, marches, and early pop music from the 1900s.
- **Music and learning:** Music can help develop language and reasoning skills, improve memory, and increase coordination.
- **Singing benefits:** Singing can improve breathing, posture, and social skills, and can boost the immune system. It can also be a form of therapy and a workout.
- **Music and health:** Listening to music can improve mood, mental alertness, and sleep quality, and can reduce anxiety, pain, and blood pressure.
- **The oldest musical instrument:** The oldest known musical instrument is a flute made from mammoth ivory and a bird bone, found in the Swabian Alps in Germany, and estimated to be over 35,000 years old.
- **Music and perception:** Music can change the way you view the world.
- **Music and the heart:** Listening to music can have a positive effect on your heart.
- **Music and focus:** Music can be a great aid when you need to concentrate.
- **Music and termites:** Termites eat wood twice as fast while listening to heavy metal music.
- **Def Leppard drummer:** The drummer for the band Def Leppard only had one arm.
- **A single violin:** A single violin is made from over 70 individual pieces of wood.

The background is a dense field of 3D question marks in various shades of gray. A single question mark in the center is highlighted in a bright yellow color. A thin, light blue border with circuit-like patterns on the left and right sides frames the central text.
