WHAT IS DEEP WATER HORIZON

- Deep Water Horizon was an oil rig that exploded taking the lives of 11 men. It was the biggest oil spill in history.

HOW DID IT HAPPEN

- BP was behind schedule and over budget on the project, and they tried to take shortcuts. For example, the cement used to seal the well was too weak to withstand the pressure of the oil and gas. BP had experienced this problem before in 2008, but didn't adjust their cement mixture and it caused it to explode.
