

2020 YEAR IN REVIEW

The Casa Grande Alliance provides friendly, culturally sensitive prevention education programming and family support services, youth development and leadership, community coalition leadership, and mental health resource navigation. The community coalitions we lead build networks of support dedicated to protecting and building resilience in the youth, adults and families living in our community.

STRONG PARENTS: Getting to Know the Protective Factors

The term "protective factors" refers to a set of characteristics that can help reduce the risk of Adverse Childhood Experiences and can increase the health and well-being of children and families. Put more simply, the protective factors are positive elements that have positive effects on children, families and the community as a whole.
