

Wall-art and Illuminated Towers

ABOUT

If you're looking to enhance your garden or outdoor area, our wall-art and illuminated tower products are designed to do just that. These products can be used against any wall in your garden area and we also have options available for indoors, too.

DESIGN AND MANUFACTURE

We have 5 standard design options available, however our team are at hand to bring your own visions to life if you require something more bespoke.

Wall-art and Illuminated Towers are manufactured using a mild steel, which can then be powder coated in a choice of your choice. All production takes place at our 23,000 sq.ft. production facility in Castle Donington, Derby, UK.

ADDITIONAL EXTRAS

Wall Art can be back-lit with IP65 outdoor or standard indoor RGB LED strips which allow you to choose the lighting effect for the setting or mood you want.
