Flo-Gistics LLC

Mark Imbimbo

Mark,

We have installed the Gas clamps on our 2 William Davis 100HP low Nox Boilers and the results have been incredible. First thing we noticed is the color change on the actual burner flame, as it went to a dark shade of blue and we have been between 8.5% to 11% more efficient. When you spend over \$35k a month on Natural Gas, this is a game changer. Thank you for your innovative advice and help.

Regards,

Gordon E. Hickman
